### **One.** Letter to Shareholders

Ladies and gentlemen:

2022 is a year of changes and challenges. The semiconductor industry saw continuous economic growth in the first half of the year but came to a halt unexpectedly in the second half of the year. Despite the global economic changes and political turmoil, the Company continued to perform favorably in terms of operating income and profits, pushing the company again toward a new milestone.

#### **Business Plan Implementation Results**

The consolidated operating revenue was NT\$36.782 billion last year, up by 8.95%. Gross profit margin was 35.5%, an increase of 4.8% compared with previous year. Earnings per share (EPS) was NT\$5.59, also up by NT\$1.36 from previous year. The Company delivered favorable business performance in general.

A review of last year's performance up until Q3, customers have adjusted their inventories, which reflected the significant impact that the general political and economic environment has on demand. The establishment of economic recession resulted in low visibility, exposing the semiconductor industry to severe challenges. With the concerted efforts of our employees, the Company was able to further increase its operating revenue for the year, thanks to contributions in terms of automotive applications, industrial applications, servers, data center, network communication products, and increased production outsourcing by foreign customers. Our gross profit market increased considerably, which is attributable to increase in average unit price and improved cost management. Net income before tax also increased significantly owing to our adequate control of management and sales expenses. Over the years, the Company observed that recruiting talents is not easy. We have therefore continuously invested in resources to automate factory operations, adopt smart manufacturing practices, streamline processes, improve production efficiency, and reduce our reliance on labor work. Our investments have gradually come to fruition. The Company also continued making changes and improvements in the areas of production flexibility, technical know-how, quality standard, delivery speed, customer service satisfaction, information management, employee cultural literacy, ESG performance, and operational systems to unleash our powerful resilience in adapting to the fast-changing environment.

### Financial income and profit analysis

With respect to financial and profit status in 2022, the Company saw a sound financial structure, with debt to total assets ratio of 50.31% down slightly by 1.4% from previous year, and long-term capital to fixed assets ratio of 133.53%, up 5.4% compared

with last year. Current ratio and quick ratio increased by 48.92% and 47.22% from previous year, reaching 218.06% and 201.13%, respectively, which suggests favorable short-term liquidity. In terms of profitability, the Company's return on assets (ROA), return on equity (ROE), net profit margin, and earnings per share were 10.13%, 19.44%, 18.98%, and NT\$5.59, respectively, which increased by 1.88%, 3.14%, 3.48%, and NT\$1.36 compared with previous year, demonstrating record-high performance.

### **R&D** status

The Company's R&D center is not only committed to helping customers solve technical problems in product testing but also spares no effort in following a R&D blueprint to develop and improve the functions and performance of testing equipment and key components. We constantly update the specifications of our testing machines to meet customer needs and requirements for high-tech product development, while also focusing on ensuring the conversion compatibility of testing equipment adapters and testing platforms. With respect to testing software, we respond to the increased complexity of testing equipment and customer products by devoting to the development of testing software and adoption of artificial intelligence to improve production efficiency and user convenience. In terms of testing system integration, we endeavor to improve the scalability and functional performance of self-developed testing machines and burn-in ovens, both of which are available in abundance (1800+ machines) at KYEC and its subsidiaries. In the areas of self-developed equipment applications, our testing platform encompasses a broad category of products, including System on Chip (SoC), image sensor chip, driver chip, microelectromechanical chip, memory chip, and biochip, etc. We stay ahead of technological advancements by developing new testing technologies such as high-frequency, high-power, high-order packaging and heterogeneous packaging technologies to maintain our unique competitive edge in the field of IC testing.

#### Current business plan overview

We plan to develop our business by achieving breakthrough in performance growth targets, accurately deploying new investments, and promoting our self-developed machine business. Specifically, we strive to improve customer services by taking the lead in customer satisfaction evaluations, preventing significant quality costs, taking response measures and performing monitoring; improve production and manufacturing processes by reducing ineffective operations, enhancing production efficiency, expanding the scope of smart manufacturing and automation, and refining our professional competency and technical know-how; enforce cost control by focusing on the costs of materials and accessories and adopting mechanisms that ensure reasonable use of materials and strengthened inventory management; engage in R&D innovation with a focus on

developing core technologies, expanding the applications of key equipment and components, and continuing to ensure the quality of our intellectual properties and patents; and enhance human resources by retaining key talents, supporting management associates who show potential, and cultivating key technical competencies.

### Future development strategy

The environment of the semiconductor industry has changed in recent years, resulting in the concentration of high-end semiconductor manufacturing in Taiwan. The Company's future development strategy will be focused on two aspects. The first focus is on customer service, where we aim to strengthen the core value of the manufacturing supply chain, improve the operational efficiency and performance of systems used in the lengthy manufacturing process, support customers' product launch, and grow together with customers as their trusted partner. The second focus is on leveraging the Company's unique competitive advantages in the research and development of semiconductor testing to deepen customer adhesion toward our services.

We will also continue to expand the business of our fabless semiconductor design company in Europe, the United States, and Japan, cultivate potential customers, and increase the proportion of IDM outsourcing orders to strengthen and stabilize our profitability. Given the technological conflict between China and the United States and the fragmentation of the global semiconductor supply chain, the Company will, at all times, evaluate and adjust its supply chain plans in Taiwan and China to prepare for any possible changes in the environment.

# The effect of external competition, the legal environment, and the overall business environment

According to Gartner, a research and consulting firm, worldwide semiconductor revenue increased 1.1% in 2022 to a total of \$602 billion, and is projected to decrease 6.5% in 2023 to US\$563 billion. The World Semiconductor Trade Statistics (WSTS) expected the worldwide semiconductor market to reach 4.4% growth or US\$580 billion in 2022, followed by a decline of 4% in 2023 to US\$557 billion. Destocking of both memory and logic products remains prevalent in the first half of this year, while a new product inventory cycle will be established in the second half of the year. Most semiconductor operators were generally conservative about the annual growth of the worldwide semiconductor industry due to global overall economic and political uncertainties.

The IMF's global growth forecast for 2022 was at 3.2% while its projection for 2023 was lowered to 2.7%. The World Bank predicted that global GDP will grow by 2.9% in 2022 and slashed its estimates to 1.7% for 2023. This year's global economic

growth is extremely concerning due to uncertainties from a mixture of factors such as inflation, interest rate, exchange rate, unemployment rate, consumer spending power, U.S. dollar liquidity, U.S. debt ceiling, and complex geopolitical issues.

In terms of external competition, the node of worldwide semiconductor IC design and manufacturing has reached the limitations of Moore's Law, and advanced manufacturing and packaging technologies have been mass-produced for use by major international design companies. Taiwan dominates the outsourcing of semiconductor manufacturing, and much of that dominance comes down to only a handful of companies. KYEC has become the second largest manufacturer in the world in the field of semiconductor IC testing, making significant strides to stay ahead of its competitors. Taiwan accounts for 62% and 61.5% of the global wafer manufacturing marker and packaging and testing industry, both ranking No. 1 in the world. In the worldwide semiconductor manufacturing supply chain, Taiwan holds 97% of the share of packaging and testing capacity in the Asian market. The semiconductor industry has an extremely extensive and complex ecosystem consisting of tens of thousands of upstream and downstream suppliers that specialize in consumer demand, IC design, manufacturing, system combination, hardware sales, and product applications for different industrial sectors, which render cluster formation, migration, and replication difficult. Semiconductor OEMs in Taiwan have held strong advantages in terms of technology, cost, experience, talent, and efficiency. The formation of a semiconductor supply chain in China and the establishment of semiconductor fabrication plants in the United States, Japan, and Europe are undoubtedly a competition for Taiwanese manufacturers.

In terms of laws and the general business environment, the United States has in recent years clamped down on China's technology and semiconductor development by enforcing more stringent laws. China's semiconductor industry will become an integrated entity confined to the field of mature manufacturing products. In the United States, crack down on China and championing deglobalization will affect the restructuring of certain industry chains in various countries. Although there are inquiries in the semiconductor sector, feasibility consideration remains difficult.

Against the backdrop of rapid global inflation, U.S. interest hikes, and tightened monetary policy in the previous year, the ripples of the economic shock have caused shrinking demand, GDP decline, and uncertain economic outlook. Governments worldwide will have their own challenges to tackle in the future. This year, regardless of political interferences, the world remains situated in a highly uncertain environment characterized by high inflation, high unemployment rate, high interest rate, and low economic growth.

Looking forward to 2023, unfavorable factors are improving; for instance,

pandemic restrictions have been lifted, the economy is recovering slowly, the alleviation of supply chain disruption has lifted tensions around semiconductor manufacturing, inflation and sharp interest hikes have eased; the resumption of the semiconductor business cycle is anticipated in the second half of the year following a year of supply-demand adjustments to address the destocking problem. Asian countries with high population density such as China and India may see faster growth opportunities.

In light of science and technology advances, humans are working more efficiently in pursuit of more convenient and comfortable lifestyles; therefore, more functions and new applications for technological products and services will be developed. The rapid development of advanced semiconductor manufacturing processes and high-end advanced packaging technologies will make people's dream come true through 5G, AI, IoT, HPC, Metaverse scenarios, and other everyday solutions. Because of the increasing complexity of the core SoC for advanced processes, the upgrading of peripheral mature process chip is promoted so as to increase the silicon content of end products. Base stations and network communication products have emerged as needed to keep pace with transmission bandwidth and speed in communication. Smart cars, smart homes, smart cities, smart health care, smart manufacturing, smart robots, smart stores, which are vigorously developed concepts, will create infinite possibilities and bright prospects for the development of worldwide semiconductor industry.

Feeling optimistic about future business opportunities, the Company will continue to invest in talent development and equipment operations, serve customers, and work closely with suppliers in order to prosper together and deliver favorable performance that will increase shareholders' equity. Finally, I would like to thank our shareholders for their long-term support, and I look forward to maintaining a longstanding relationship with all shareholders to create a more promising outlook.

Chin-Kung Lee, Chairman

An-Hsuan Liu, President

## Two. Company profile

## I. Date of incorporation: May 28, 1987

## II. Corporate history:

| 1987 | May       | officially, with the authorized capital in the amount of NT\$7 million and |

| August Capital increase by recapitalization of retained earnings, and the Company's capital increased to NT\$12.80854009 billion.  |
| Company's capital increased to NT\$12.80854009 billion.  |
|  |
|  |
| November Passed OHSAS18001:2007 for revision certification.  |
| Passed TOSHMS certification.   |
| 2009 August Capital increase by recapitalization of retained earnings, and the   |
| Company's capital increased to NT\$12.59735760 billion.  |
| December Passed ISO14001, OHSAS18001 and TOSHMS for annual follow-up audit.  |
| 2010 October Issued the overseas convertible bonds in the amount of USD40 million.   |
| December Passed ISO14001/OHSAS18001/TOSHMS for annual follow-up audit.   |
| 2011 October Honored as the excellent plant for cleaner production in TSMC   |
| Center-Satellite system.   |
| 2012 December Passed TOHMAS for conversion into CNS15506:2011.   |
| Chunghua Factories passed the AEO safety accreditation.  |
| 2013 February Commenced the construction of Tongluo Factory for Stage 1.   |
| December Completed the construction of Tongluo Factory for Stage 1.  |
| 2014 December Commenced the construction of Tongluo Factory for Stage 2.   |
| 2015 December Chu-Nan Factory was honored as the excellent entity for "Low Carbon  |
| Action Award" conferred by the Environmental Protection Administration,<br>Executive Yuan.   |
| 2016 January Completed the construction of Tongluo Factory for Stage 2.  |
| April Tongluo Factory for Stage 1 received the "Green Building—Bronze Medal"   |
| awarded by the Ministry of Interior.   |
| July Issued the overseas convertible bonds in the amount of USD50 million.   |
| Purchased green power and awarded the "2016 Green Power Logo" by the   |
| Ministry of Economic Affairs.  |
| October Tongluo Factory received the "Green Power Plant Label" awarded by the  |
| Industrial Development Bureau, Ministry of Economic Affairs.   |
| November Received the excellence award for the "2015 Green Procurement   |
| Implemented by Private Enterprises and Groups" conferred by the  |
| Environmental Protection Bureau of Miaoli County Government.   |
| Chu-Nan Factory passed ISO50001 for energy management accreditation.   |
| 2017 September Purchased green power and awarded the "Green Power Logo" by the   |
| Bureau of Energy, Ministry of Economic Affairs.  |
| November Honored as the excellent entity for "2016 Green Procurement" awarded by   |
| the Environmental Protection Administration, Executive Yuan.   |
| Received the excellence award in "Landscaping and Environmental  |

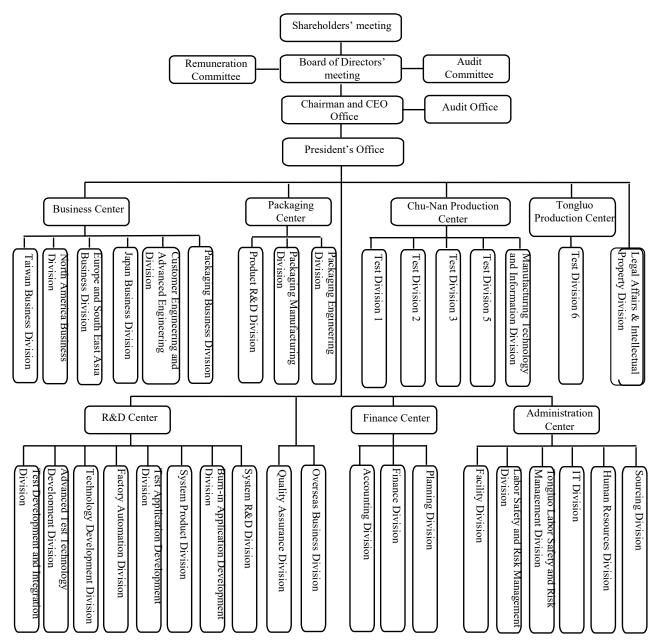

|      | December  | Maintenance Competition" organized by Hsinchu Science Park.<br>Received the excellence award for the "2016 Green Procurement<br>Implemented by Private Enterprises and Groups" conferred by the<br>Environmental Protection Bureau of Miaoli County Government. |
|------|-----------|---|
| 2018 | November  | Tongluo Factory passed ISO50001 for energy management accreditation.<br>Received the excellence award in "Landscaping and Environmental<br>Maintenance Competition" organized by Hsinchu Science Park.  |
|      | December  | Received the excellence award for the "2017 Green Procurement   |
|      |           | Implemented by Private Enterprises and Groups" conferred by the Environmental Protection Bureau of Miaoli County Government.  |
| 2019 | November  | Received the excellence award in "Landscaping and Environmental   |
|      |           | Maintenance Competition" organized by Hsinchu Science Park.<br>Honored as the excellent entity for "2018 Green Procurement" awarded by  |

|      |           | Environmental Protection Bureau of Miaoli County Government.  |
| 2020 | September | Honored as the excellent entity for "2019 Green Procurement" awarded by   |
|      |           | the Environmental Protection Administration, Executive Yuan.  |
|      | November  | Received the excellence award in "Landscaping and Environmental   |
|      |           | Maintenance Competition" organized by Hsinchu Science Park.   |
|      |           | Received the excellence award for the "2019 Green Procurement   |
|      |           | Implemented by Private Enterprises and Groups" conferred by   |
|      |           | Environmental Protection Bureau of Miaoli County Government   |
|      | December  | Passed OHSAS18001 for conversion into ISO45001:2018.  |
|      |           | Passed CNS15506 for conversion into CNS45001:2018.  |
|      |           | Passed ISO22301:2019 business continuity management system.   |
|      |           | Commenced the construction of Tongluo Factory for Stage 3.  |
| 2021 | September | Received "The 210 National QCC Headquarters" special merit award by   |
|      |           | Association of Pioneer Quality Control Research.  |
|      | October   | Received "Excellent Bonded Factory" by Customs Administration,  |
|      | NT 1      | Ministry of Finance.  |
|      | November  | Received "Miaoli 2021 Gold Industrial Vendor Excellence Award" – for  |
|      |           | Sustainable Development Award by Miaoli County Government.  |
|      |           | Received the "Golden Trade Award" for the Best Trade Contribution Award   |
|      |           | in the electrical and electronics category by Bureau of Foreign Trade.  |
|      |           | Received the bronze award for "2021 Taiwan Corporate Sustainability   |
|      |           | Award" by the TAISE.<br>Received the excellence award for the "2020 Green Procurement   |
|      |           | Implemented by Private Enterprises and Groups" conferred by   |
|      |           | Environmental Protection Bureau of Miaoli County Government - special   |
|      |           | merit award.  |
|      |           | mont award.   |

|      | December | Honored as the excellent entity for "2020 Green Procurement" awarded by            |
|------|----------|--|
|      |          | the Environmental Protection Administration, Executive Yuan.                       |
|      |          | Received the bronze award for the "2021Taiwan Continuous Improvement               |
|      |          | Award" by CSD.   |
| 2022 | June     | Passed ISO14064-1:2018 verification for GHG Inventory.                             |
|      | October  | Hsinchu Factory passed ISO50001 for energy management accreditation.               |
|      | November | Received the "National QCC Headquarters" Gold Award by Association of              |
|      |          | Pioneer Quality Control Research.  |
|      |          | Received the bronze award for "Taiwan Sustainability Award" by the                 |
|      |          | TAISE.   |
|      |          | Received the excellence award for the "2021 Green Procurement                      |
|      |          | Implemented by Private Enterprises and Groups" conferred by                        |
|      |          | Environmental Protection Bureau of Miaoli County Government - special merit award. |
|      | December | Received the silver award for the "Taiwan Continuous Improvement                   |
|      |          | Award" by CSD.   |
|      |          | Honored as the excellent entity for "2021 Green Procurement" awarded by            |

### Three. Corporate Governance Report

### I. Organization

(I) Organizational structure

|  | Responsible for the decision making of the Group's  |
|--|---|
| Chairman and CEO office  | overall operations.   |
| President's Office   | Establish the Company's business objectives and<br>strategies, take charge of the Company's business plans<br>and annual business policy, establish the Company's<br>quality policy, and communicate, coordinate with and<br>supervise the Company's departments/divisions.   |
| Audit Office   | Responsible for setting up the Company's internal control<br>system, formulating and implementing the annual audit<br>plan, preparing an audit report after it has conducted an<br>audit, reporting audit deficiencies and anomalies,<br>follow-up and improvement, and regularly report audits<br>to the independent directors and the audit committee, the<br>reports of which are then submitted to the board of<br>directors. |
| Business Center<br>(Including Taiwan Business<br>Division, North America<br>Business Division, Europe<br>and South East Asia<br>Business Division, Japan<br>Business Division and<br>Customer Engineering and<br>Advanced Technology<br>Engineering Division,<br>Packaging Business<br>Division) | Responsible for verifying the market condition, planning<br>the merchandising in domestic/overseas markets,<br>concluding sales contracts, providing forecasts to ensure<br>delivery conditions which ensure the satisfaction of<br>production schedule with customers' demand, and<br>proceeding with annual marketing plans and customized<br>engineering solutions and new product introduction<br>services, etc.              |
| Chu-Nan Production Center  | Establish and execute the business plans to achieve<br>profitability and turnover objectives; responsible for the<br>financial and operational results; responsible for<br>maintaining fair relationships with key customers and<br>partners; promote and execute the customer demand to<br>practice the promotion and execution of projects in the<br>production lines; balance the vision and business<br>purposes.             |
| Test Division 1  | Provide diversified Wafer and CIS IC testing service;<br>develop and introduce testing technology; control the<br>production to meet the shipping requirements; provide<br>customers with excellent testing environment and fair<br>testing quality.  |
| Test Division 2  | Responsible for such processing operations as wafer<br>fabrication, grinding, cutting, selection and testing;<br>control the production, delivery date and quality required<br>under purchase orders; improve production technology,  |

|  | and establish standard operating procedures; assess,   |
|--|--|
|  | introduce and maintain production equipment, jigs, knives and measuring tools.   |
| Test Division 3                                      | Responsible for supervising and assessing logical<br>reasoning test and mixed signal test of finished IC goods;<br>responsible for supervising and assessing various<br>departments' performance; control the production to meet<br>the shipping requirements; test technology development<br>and introduction; control product quality.   |
| Test Division 5                                      | Provide tests of finished IC goods and burn-in services:<br>responsible for supervising and assessing various<br>departments' performance; control the production to meet<br>the shipping requirements; test and burn-in technology<br>development and introduction; control product quality.  |
| Manufacturing Technology<br>and Information Division | Plan, design and develop the automation equipment and<br>manufacturing management information systems required<br>by various business divisions' production process, and<br>provide any support required by the production process to<br>upgrade the output.   |
| Tongluo Production Center                            | Establish and execute the business plans of Tongluo<br>Factory to achieve profitability and turnover objectives;<br>responsible for the financial and operational results;<br>responsible for maintaining fair relationships with key<br>customers and partners; promote and execute the<br>customer demand to practice the promotion and<br>execution of projects in the production lines; balance the<br>vision and business purposes. |
| Test Division 6                                      | Provide customers with chips and IC test services;<br>control the production to meet the shipping requirements;<br>test technology development and introduction; control<br>product quality.   |
| R&D Center   | Plan and execute R&D strategies, integrate and control R&D resources, integrate cross-group R&D projects, and lead the key R&D programs.   |
| Test Development and<br>Integration Division         | Evaluation, development, and mass production of new<br>products for image sensors of new customers.<br>Development and integration of new testing technology<br>for image sensors and test applications for proprietary<br>test machines; provide customers with comprehensive<br>test solutions, mass production service, and assist in the<br>resolution of engineering problems on the production<br>line.                            |
| Advanced Test Technology<br>Development Division     | Take charge of PCB design, manufacturing and<br>stimulation technology, development and research of new<br>test technology, develop system diagnostic technology,<br>produce the automatic test programs and develop<br>conversion systems, and design and manufacture new test  |

|  | machine interfaces.   |
|--|---|
|  |   |
| Factory Automation<br>Division                       | Creation and implementation of test environment;<br>research and development of technologies needed to<br>produce key components and perform specialized tests.   |
| Test Application<br>Development Division             | Applying self-manufactured test equipment to provide<br>customers with comprehensive IC test solutions. Planning<br>and designing a customized test environment for<br>differentiated test services to match with special test<br>conditions.                                       |
| System Product Division                              | Self-make test machines, produce and maintain Burn-in<br>Oven and the development platform for mass production<br>of parts to improve the stability of production lines.  |
| Burn-in Application<br>Development Division          | Applying the self-developed burn-in machine to design<br>customized systems and programs based on customer<br>specifications and provide a comprehensive and<br>high-quality burn-in process.   |
| System R&D Division                                  | Research and development of self-made test machines<br>and high-power burn-in machine system/equipment, and<br>focus on the functional expansion/upgrade of self-made<br>test machines.   |
| Technology Development<br>Division                   | Set up a testing environment and smart facilities required<br>for a smart factory, develop visual and control systems,<br>and provide each business division with accessories and<br>transport equipment required for production process and<br>output problem improvement.         |
| Administration Center                                | Integrate the Group's administrative resources and<br>support the Group's operation to seek maximum interest<br>for the Company at the lowest cost.   |
| Facility Division                                    | Responsible for factory layout, facility planning and construction as well as operation and maintenance of system.  |
| Labor Safety and Risk<br>Management Division         | Responsible for assessing risk over factory premises and planning/executing EHS operations.   |
| Tongluo Labor Safety and<br>Risk Management Division | Responsible for assessing risk over factory premises and planning/executing EHS operations at Tongluo Factory premises.   |
| IT Division  | Responsible for planning, implementing, reviewing and<br>improving the Company's information system, and<br>maintaining, safeguarding and supervising information<br>systems.   |
| Human Resources Division                             | Responsible for establishing, reviewing and revising the Company's HR development plans.  |
| Sourcing Division                                    | Responsible for procuring raw materials and supplies and<br>equipment, warehousing & logistics and import and<br>export management, and bonding for the Company.  |
| Quality Assurance Division                           | Coordinate the product quality upgrading, establish<br>quality strategies, improve quality systems, control<br>company documentation, conduct quality activities, serve<br>as an analysis and calibration laboratory for equipment<br>and instruments, and manage supplier quality. |

| Finance Center                                    | Formulate financial strategies for the Company and the<br>Group, plan related affairs such as finance, accounting,<br>investment, corporate governance, corporate<br>communication, and maintain relationships with the<br>media.   |
|---|---|
| Planning Division                                 | Responsible for relationship management and communication with institutional investors, media relations, public affairs and coordination of cross-department projects.  |
| Accounting Division                               | Comprehensive management of the Company's tax<br>planning, budgeting, account settlement, customer credit<br>management, fixed asset management and operations and<br>cost analysis.  |
| Finance Division                                  | Responsible for matters including comprehensive<br>management of the Company's stock affairs and<br>corporate governance, working capital finance and<br>schedules, and financial risk management.  |
| Legal Affairs & Intellectual<br>Property Division | Oversees legal affairs, including management of contractual arrangements, patents and other intellectual property rights, litigations etc.  |
| Overseas Business Division                        | A unit prepared to assign overseas employees.   |
| Packaging Center                                  | Establish and execute the business plans to achieve<br>profitability and turnover objectives; responsible for the<br>financial and operational results; responsible for<br>maintaining fair relationships with key customers and<br>partners; promote and execute the customer demand to<br>practice the promotion and execution of projects in the<br>production lines; balance the vision and business<br>purposes. |
| Product R&D Division                              | Responsible for the development and implementation of<br>new packaging machinery, development of new<br>products/technologies, layout design and<br>assessment/introduction of new suppliers.   |
| Packaging Manufacturing<br>Division               | Plan, execute and monitor progress of the production<br>schedule; develop standardized operating guidelines and<br>operational environment needed to deliver excellent and<br>timely packaging service; responsible for improving<br>production efficiency and supervising accomplishment of<br>performance targets.  |
| Packaging Engineering<br>Division                 | Responsible for the planning, assessment and<br>implementation of new packaging process and equipment<br>purchase; responsible for making improvements to<br>packaging yield, output, production process and use of<br>materials to deliver customers' requirements toward the<br>quality of packaging service.   |

|          |                          | Remarks  |                                   | Note 4  | None                           | None  | None  |

The representative of corporate director Yann Yuan Investment Co., Ltd. stepped down on February 15, 2022. The representative of corporate director Yann Yuan Investment Co., Ltd. assumed office on February 15, 2022. Note 2. Note 3. Note 4.

Where the company's chairman and president or person of an equivalent post (the highest-level manager) of a company are the same person, spouses or relatives within the first degree of kinship, an explanation shall be given of the reason, reasonableness, necessity thereof, and the measures (such as adding independent directors, and more than half of the directors not serving as concurrent employees or managers of another company) adopted in response thereto:

In order to enhance operating efficiency and decision execution, the Company's chairman also serves as the CEO. In addition, the chairman also closely communicates with the Company's directors on business operations, and formulates policies to implement corporate governance. In the future, depending on the development situations, the Company also plans on eliminating the chairman of the board of directors from serving as the CEO or adding independent directors to enhance the functions of the board of directors from serving as the CEO or adding independent directors to enhance the functions of the board of directors and strengthen supervision. Currently, the Company has also set up the following specific measures:
 The current three independent directors are specialized in fields such as finance and the semiconductor industry in order to achieve effective supervision.
 Each director is encouraged to take part in professional courses of external organizations such as the Securities and Futures Institute on an annual basis, in the aim of improving the operational efficiency of the board of the board of the board of the board of the securities and Futures Institute on an annual basis, in the aim of improving the operational efficiency of the board of the courties and strengthen such as the Securities and Futures Institute on an annual basis, in the aim of improving the operational efficiency of the board of th

- directors.
  - Independent directors can fully discuss and make suggestions for the board of directors in each functional committee in order to implement corporate governance.
  - More than half of the directors did not serve as concurrent employees or managers of another company. *ω*. 4.

### (II) Independence of Board of Directors:

The Company's Board of Directors consists of nine directors, including three independent directors, which account for 33% of the total number of directors. The Board conducts assessment and evaluation on the independence of independent directors in accordance with applicable laws. Three independent directors have served 3–9 years and not more than three consecutive terms. Two directors are concurrently serving as managerial officers at the company, accounting for 22% of all directors, which did not exceed one-third of the total number of board members.

The independent directors of the Company have complied with the provisions of Article 26-3, paragraphs 3 and 4 of the Securities and Exchange Act, including the provision concerning spousal relationship or familial relationship within the second degree of kinship that may exist between any directors, between any supervisors, or between any director(s) and supervisor(s).

Note 1: Calculated based on the outstanding common stock on the date of suspension of stock transfer by the general shareholders' meeting.

Note 2: Dismissed on October 6, 2022.

Note 3: Promoted on October 6, 2022.

Note 4: Appointed on October 6, 2022.

Note 5. Where the company's chairman and president or person of an equivalent post (the highest-level manager) of a company are the same person, spouses or relatives within the first degree of kinship, an explanation shall be given of the reason, reasonableness, necessity thereof, and the measures (such as adding independent directors, and more than half of the directors not serving as concurrent employees or managers of another company) adopted in response thereto:

In order to enhance operating efficiency and decision execution, the Company's chairman also serves as the CEO. In addition, the chairman also closely communicates with the Company's directors on business operations, and formulates policies to implement corporate governance. In the future, depending on the development situations, the Company also plans on eliminating the chairman of the board of directors from serving as the CEO or adding independent directors to enhance the functions of the board of directors and strengthen supervision. Currently, the Company has also set up the following specific measures:

The current three independent directors are specialized in fields such as finance and the semiconductor industry in order to achieve effective supervision. Ξ.

Each director is encouraged to take part in professional courses of external organizations such as the Securities and Futures Institute on an annual basis, in the aim of improving the operational efficiency ä

- Independent directors can fully discuss and make suggestions for the board of directors in each functional committee in order to implement corporate governance. of the board of directors.
  - More than half of the directors did not serve as concurrent employees or managers of another company. <u></u>. 4.

Remuneration to Directors, Presidents and Vice Presidents of the Company in the most recent year (I) Remuneration to Directors and Independent Directors in 2022 III.

Units: NTD thousand

Note: The remuneration to employees means the amount proposed to be allocated.

2. Remuneration policies, standards and packages, procedures for determining remuneration and its linkage to operating performance and future risk exposure:

For the remuneration of the Company's directions (including independent directors), subject to the profit sought for the current year, the Company shall allocate no more than 1% of the profit as the remuneration to directors according to the Company's Articles of Incorporation. However, if the Company has cumulative losses, an amount sufficient to make up losses shall be retained. The Company may, by a resolution adopted by a majority vote at a meeting of board of directors attended by two-thirds of the total number of directors, have the profit distributable as directors' compensation, and in addition thereto a report of such distribution shall be submitted to the shareholders' meeting. According to the Company's Articles of Incorporation, the remunerations to all directors (including independent directors) shall be commensurate with their level of participation and value of contribution to the operation of the Company with reference to industry standard, and shall be determined by the board of directors under authorization. Accordance with the regulations of the Company's Charter for the Remuneration Committee, the remuneration to directors (including independent directors) shall require the approval of one-half or more of all Remuneration Committee members, and furthermore shall be submitted for a resolution by the board of directors.

The remuneration to the Company's managerial personnel shall be handled in accordance with the Company Act and the Company's Charter for the Remuneration Committee, as required by the Company's Articles of Incorporation. Besides referring to the overall business performance of the Company, the position of all managerial personnel, the contribution to the Company's operation, individual performance, and reference to payment in industry standard, the remuneration committee reviews and evaluates the overall remuneration rationality and then submits to the board of directors for resolution. The committee also considers the rationality between the relation of individual performance, the Company's business performance and future risk.

# IV. Status of Corporate Governance

# (I) Information about operation of the Board of Directors

1. The board of directors met 10 times in 2022. The details of attendance are as follows:

| Term | Title                | Name   | Actual attendance | Attendance<br>by proxy | Actual<br>attendance<br>rate (%) | Remarks |
|------|----------------------|--|-------------------|------------------------|----------------------------------|---------|

**2022** Performance Evaluation for the Board of Directors of King Yuan Electronics Co., Ltd. To implement corporate governance and improve the function of the board of directors, the Company executes the 2022 performance evaluation for the board of directors based on the "Performance Evaluation Rules for the Board of Directors" of the Company. The performance evaluation of the Company's board of directors includes the entire board, each member and the functional committees; the evaluation methods include self-evaluations by the board of directors and individual board members. After collecting relevant questionnaires such as the "Self-Evaluation Questionnaire for Performance of the Board of Directors," the "Self-Evaluation Questionnaire for Performance of Board Members," and the "Self-Evaluation Questionnaire for Performance of the Functional Committees," the execution unit records the evaluation results in a report based on the evaluation indexes in Article 8 of the "Performance Evaluation Rules for the Board of Directors." Performance evaluation self-assessment questionnaire results for 2022 (evaluation period: January 1 to December 31, 2022) are as follows:

- I. Performance evaluation personnel:
  - (I) Self-evaluation questionnaire of board of directors: Corporate Governance Officer.
  - (II) Self-evaluation questionnaire of board members: Chairman Chin-Kung Lee, Vice Chairman Chi-Chun Hsieh, Director An-Hsuan Liu, Director Ping-Kun Hung, Director Kao-Yu Liu, Director Kuan-Hua Chen, Independent Director Hui-Chun Hsu, Independent Director Dar-Yeh Hwang and Independent Director Semi Wang, totaling nine persons.
  - (III) Self-evaluation questionnaire of the functional committee:Corporate Governance Officer.
- II. Performance evaluation statistical results:
  - (I) Performance evaluation of the board of directors

The performance evaluation of the board of directors covers five aspects. The average score is 4.47 and the full score is 5.

| Scope of Assessment   | Number of<br>Questions | Average score |
|---|------------------------|---------------|
| A. Participation in the operation of the company                                  | 12                     | 4.42          |
| B. Improvement of the<br>quality of the board of<br>directors' decision<br>making | 12                     | 4.83          |
| C. Composition and<br>structure of the board of<br>directors                      | 7                      | 4.57          |
| D. Election and continuing<br>education of the directors                          | 7                      | 3.86          |

The performance evaluation of the board members covers six aspects. The average score is 4.68 and the full score is 5.

| Scope of Assessment                                      | Number of<br>Questions | Average score |
|--|------------------------|---------------|
| A. Alignment of the goals and missions of the company    | 3                      | 4.81          |
| B. Awareness of the duties of a director                 | 3                      | 4.85          |
| C. Participation in the operation of the company         | 8                      | 4.54          |
| D. Management of internal relationship and communication | 3                      | 4.70          |
| E. Director's professionalism and continuing education   | 3                      | 4.70          |
| F. Internal control                                      | 3                      | 4.70          |
| Total/Average score                                      | 23                     | 4.68          |

(III)Performance evaluation of the functional committees

The performance evaluation of the functional committees covers five aspects. The average score is 4.67 and the full score is 5.

| Scope of Assessment   | Number of<br>Questions | Average score |
|---|------------------------|---------------|
| A. Participation in the operation of the Company                      | 4                      | 5.00          |
| B. Awareness of the duties of the functional committees               | 7                      | 4.29          |
| C. Improving the decision quality<br>of the functional committees     | 7                      | 5.00          |
| D. Composition and member<br>election of the functional<br>committees | 3                      | 4.67          |
| E. Internal control   | 3                      | 4.33          |
| Total/Average score   | 24                     | 4.67          |

III. Overall comment:

(I) Performance evaluation of the board of directors

The Board of Directors operated smoothly as a whole and is able to provide timely advice for the management team; however, its role in supervising the design and execution of

### internal control system requires reinforcement.

(II) Performance evaluation of the board members

| Chairman<br>Chin-Kung Lee | Fulfilled his responsibilities                                     |
|---------------------------|--|
|                           | The Decard of Directory or created for creately with all directory |
| Director An-Hsuan         | The Board of Directors operated favorably, with all directors      |
| Liu                       | demonstrating a full understanding of the company's                |
|                           | strategies and operations and the capability to reach              |
|                           | consensus on material issues.                                      |

Other supplementary description

Independent director Hui-Chun Hsu: Internal control should be strengthened in relation to auditing on subsidiaries and the parent company's procurement activities and cybersecurity. (III) Performance evaluation of the functional committees

All functional committee members are aware of the scope of their duties and have fully performed their functions in practical operations.

In summary, the operating status of the Board of Directors and all functional committees is generally sound. The Company will continuously improve the functions of the Board of Directors according to the performance evaluation results to further strengthen the effectiveness of corporate governance.

IV. Improvement project:

Continue to improve the performance evaluation aspects of the Board and its members so as to improve the effectiveness of each aspect. Strengthen the monitoring of internal control system design and execution and encourage continuing education among directors.

- IV. An evaluation of targets for strengthening the functions of the board during the current and immediately preceding fiscal years:
  - (I) On June 10, 2020, the re-election of overall directors was conducted on the general shareholders' meeting; a total of nine directors were elected including three independent directors to strengthen the functions of the board and corporate governance.
  - (II) To reinforce the Company's risk management and safeguard shareholders' equity, the Company purchases liability insurance for its directors and managers. This agenda has been reported at the 19th meeting of the 14th-term Board of Directors on October 6, 2022.
  - (III) As a means to implement corporate governance while improving the functions of the board of directors to strengthen its efficiency, the "Board of Directors Performance Evaluation" was approved by resolution from the board of directors' meeting held on December 27, 2019, and was approved for amendments at the board of directors' meeting held on December 25, 2020. The evaluation results shall be completed by the end of the first quarter of the following year and submitted to the Board of Directors for report. The board evaluation results for 2022 were presented at the 24th meeting of the

The board evaluation results for 2022 were presented at the 24th meeting of the 14th-term Board of Directors on March 2, 2023.

2. 2022 continuing education for directors and independent directors:

### (II) Information on Operation of the Audit Committee

On June 24, 2014, the Company established an Audit Committee to replace the supervisory system. The committee members are independent directors (three seats) of the board of directors and all members elect an independent director to serve as the convener and chairman of the meeting. Operation Handled in accordance with the Company's "Charter for the Audit Committee" and matters that are audited by the Audit Company mainly cover:

- 1. Adoption or amendment of an internal control system pursuant to Article 14-1 of the Securities and Exchange Act.
- 2. Assessment of the effectiveness of the internal control system.
- The Company has assessed the effectiveness of the 2022 internal control system design and implementation in accordance with the criteria provided in the "Regulations Governing the Establishment of Internal Control Systems by Public Companies." The 2022 Statement on Internal Control was released after review and approval at the 18th meeting of the 3rd-term Audit Committee (2023.03.02) and resolution at the 24th meeting of the 14th-term Board (2023.03.02).
- 3. Adoption or amendment, pursuant to Article 36-1, of handling procedures for financial or operational actions of material significance, such as acquisition or disposal of assets, derivatives trading, extension of monetary loans to others, or endorsements or guarantees for others.
- 4. Matters bearing on the personal interest of a director.
- 5. Asset transactions or derivatives trading of a material nature.
- 6. Loans of funds, endorsements, or provision of guarantees of a material nature.
- 7. Offering, issuance, or private placement of equity-type securities.
- 8. Appointment, dismissal of, or remuneration of certified public accountants.
- 9. Appointment or discharge of a financial, accounting, or internal audit officer.
- 10. Annual financial statements signed or sealed by the chairman, managers and accounting officer, and the Q2 financial statements audited by the CPA.
- 11. Review merger and acquisition matters of the Company.
- 12. Other material matters as may be required by the Company or by the competent authority.

Pursuant to Article 31 of the Corporate Governance Best-Practice Principles, the independence and suitability of the appointed accountants shall be evaluated on a regular basis (at least once a year): The Company's Audit Committee conducts an independence assessment of CPAs on a regular basis (at least once a year) in accordance with the independence statement provided by the CPAs. The assessment result is then submitted to the Board of Directors.

The Audit Committee met 7 times in 2022. The details of the attendance are as

| Title                   | Name          | Actual attendance | Attendance by proxy | Attendance rate<br>(%) | Remarks                     |

- (2) Communication between independent directors and CPAs:
  - 1. From time to time, the Company's CPAs will report to the Audit Committee the audit of the company's financial status and other matters, and will also promptly report any special circumstances to members of the Audit Committee. The communication between the Company's audit committee and CPAs is fair.

|       | board of directors as                                  | meeting held on December 25, 2020. The  |             |
|       | reference for the                                      | performance evaluation of the Company's   |             |
|       | remuneration of individual                             | board of directors, including the entire  |             |
|       | directors and the nomination                           | board, each member and the functional   |             |
|       | of candidates?   | committees. The Company has been  |             |
|       |  | conducting an annual board evaluation as required by law in 2020. The performance       |             |
|       |  | evaluation outcome of the board of  |             |
|       |  | directors is submitted to the board meeting   |             |
|       |  | for reporting prior to the end of the first   |             |
|       |  | quarter each year. The performance  |             |
|       |  | evaluation outcome is also reported to the  |             |
|       |  | Exchange. The indicators for the  |             |
|       |  | performance evaluation of the board are   |             |
|       |  | based on the Company's operations and needs. Contents of the indicators are             |             |
|       |  | determined to be consistent and suitable  |             |
|       |  | for the Company to enforce the  |             |
|       |  | evaluation. The remuneration committee  |             |
|       |  | reviews these contents on a regular basis   |             |
|       |  | while also providing suggestions. The   |             |
|       |  | results of the Company's performance  |             |
|       |  | evaluation of the board of directors will<br>also serve as a reference in the selection |             |
|       |  | or nomination of directors. In February   |             |
|       |  | 2023, the Company completed the 2022  |             |
|       |  | evaluation of the performance of the board  |             |
|       |  | as a whole, individual board members, and   |             |
|       |  | functional committees. The evaluation   |             |
|       |  | results indicated favorable operation as a  |             |
|       |  | whole. The results were then reported to  |             |
|       |  | the board of directors on March 2, 2023<br>and provided to the Remuneration             |             |
|       |  | Committee for reference.  |             |
| (IV)  | Is CPAs' independence v                                | Changes of CPA are reviewed and   | No          |
| ()    | assessed on a regular basis?                           | approved by the Company's Audit   | significant |

IX. Please explain the improvements made, based on the latest Corporate Governance Evaluation results published by TWSE Corporate Governance Center, and propose enhancement items and measures for any issues that are yet to be improved.

As a means to enhance corporate governance, we continue to make gradual improvements according to the results of the corporate governance evaluation. Improvements we have made for the items we did not score in the Company's 9th corporate governance evaluation are as follows:

- (1) The Company's financial report was approved by or presented to the Board of Directors 7 days before the announced deadline, and published within 1 day after the date of approval or presentation.
- (2) The Company uploaded the English version of its sustainability report to the MOPS and the company website.
- (3) The Company disclosed the professional qualifications and experience of the Audit Committee members as well as the key tasks and status of operations of the Audit Committee for that fiscal year on the MOPS and the company website.
- (4) The Company disclosed in its annual report and on MOPS information on environmental, social, and governance (ESG) practices.
- (5) For the items that were not yet scored, the Company continues evaluate and consider possible improvement options.

| period:    |                                 |

## Description

- The procedures for the independence evaluation of Certified Public Accountants are based on the Certified Public Accountant Act, the Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and Statements on Auditing Standards.
- According to the Bulletin of the Norm of Professional Ethics for Certified Public Accountant of the Republic of China No.10 "Integrity, Objectivity and Independence," the definitions are as follows:

**Financial interest:** An interest in an equity or other security, debenture, loan or other debt instrument of an entity, including rights and obligations to acquire such an interest and derivatives directly related to such interest.

### **Direct financial interest:**

- Owned directly by and under the control of an individual or entity, including those managed on a discretionary basis by others.
- Beneficially owned through a collective investment vehicle, estate, trust or other intermediary over which the individual or entity has control, or the ability to influence investment decisions.

**Indirect financial interest:** A financial interest beneficially owned through a collective investment vehicle, estate, trust or other intermediary over which the individual or entity has no control or ability to influence investment decisions.

Family: A spouse (or equivalent) or underage children.

Immediate family: Lineal, immediate affinity and sibling.

| III.  | Environmental issues   |   |  |                            |
|-------|--|---|--|----------------------------|
| (I)   | Whether the Company<br>establishes environmental<br>policies suitable for the<br>Company's industrial<br>characteristics?  | V | All factories and mainland China subsidiaries<br>have established an environmental<br>management system in accordance with ISO<br>14001 and continued to undergo third-party<br>verification. Inventory of GHGs is conducted<br>annually in accordance with the ISO 14064-1  | significant<br>differences |
| (77)  |  |   | regulations to track the effectiveness of<br>carbon footprint reduction. The results are<br>disclosed in sustainability reports and on<br>company website.<br>(http://www.kyec.com.tw/csr/csrreport.aspx)  |                            |
|       | Is the company committed<br>to enhancing the utilization<br>efficiency of energy and<br>use renewable materials<br>that are with low impact on<br>the environmental?                                     | V | Every year, the Company follows the ISO 50001 management system standards to identify significant energy use and equipment with improved energy performance. We also adopt energy-saving solutions, such as replacing in-plant equipment that uses a significant amount of energy. In addition to improving existing facilities, we opted to purchase energy-efficient products, such as high-efficiency or thermal recycling machines, high-efficiency rotational motors, and energy-saving products. In 2021, the total electricity consumption of our plants and mainland China subsidiaries was 756,304MWh, up 59,448MWh from 696,856MWh in 2020, representing an increase of 8.5%. Such increase in power consumption was due to plant expansion. For the sake of corporate growth and sustainable development, the Company continues to adopt power/energy-saving solutions across our plants to increase energy efficiency and reduce the environmental impact of business growth. Our electricity consumption intensity is decreasing annually, to 6.9% compared with that in 2020. As for green manufacturing, we reduce unnecessary resource waste and seek technology development on waste reduction and resue. We will work together with our upstream and downstream partners of the value chain to recycle and reuse packaging materials, maximizing the benefits of a circular economy. We strive for creating circular value through recycling of process materials and waste reduction. | significant<br>differences |
| (III) | Has the company assessed<br>the potential risks and<br>opportunities for business<br>operations now and in the<br>future regarding climate<br>change and will the<br>company adopt response<br>measures? | V | Global warming has been extreme weather in<br>Taiwan, such as as typhoons, floods,<br>rainstorm, and droughts, which are becoming<br>more and more noticeable. In light of<br>changing natural disasters, we have been<br>carrying out operations under the ISO 22301<br>business continuity management system<br>model. By taking this approach, we reduce  | significant                |

|      |  |   | operational imp          | losses and irreve<br>pacts brought by | natural or             |             |

|---|---|---|--|--|
| Year  | 2020  | 2021  |  |  |
| Total water<br>consumption  | 3,361.272   | 3,753.632   |  |  |
| Water   | 1,790.237   | 1,820.439   |  |  |
| Company's subsidiaries<br>Approximatel<br>water used<br>supply, accom-<br>water consum-<br>recycled from<br>treatment sy<br>liters, accoun<br>consumption.<br>recycling and<br>recycling or | In 2021, the total water consumption of the<br>Company's factories and mainland China<br>subsidiaries was 3,753.632 million liters.<br>Approximately 2,339.585 million liters of<br>water used were sourced from raw water<br>supply, accounting for 62.3% of the total<br>water consumption. The amount of water<br>recycled from process wastewater or water<br>treatment system was 1,490.979 million<br>liters, accounting for 37.6% of the total water<br>consumption. We will continue to implement<br>recycling and reuse projects including the<br>recycling or recovery of UF and RO<br>concentrated water and rainwater/condensate. |   |  |  |

| As we continue to carry out recycling and reuse   |
|---|
| of process and water systems, through   |
| promoting a variety of water-saving projects,   |
| our Chu-Nan Plant and subsidiary saved a total  |
| of 883.01 million liters of water and reduced   |
| carbon emissions by 488.3 tons in 2021. In  |
| 2022, we continued planning and implemented   |
| water conservation projects, setting water  |
| consumption reduction targets for for Chu-Nan   |
| Factory and subsidiary, which are our main  |
| consumers of water. We will improve our pure  |
| water system and evaluate the addition of   |
| recycling systems. Our Chu-Nan Factory is   |
| expected to invest NT\$23 million in RO   |
| recycling and ROR recycling and reuse for a   |
| recycling period of approximately 2.5 years,  |
| while subsidiaries in China (King Long and  |
| Zhen Kun) will continuously improve pure  |
| water processes to save water and reduce waste.   |
| With our dedication to environmental  |
| protection, we have established waste reduction   |
| plans. Each quarter, we carry out a performance   |
| review and internal and external audits. In   |
| 2020, all plants and subsidiaries of China  |
| passed the ISO 14001 environmental  |
| management system certification. The  |
| Company is mainly involved in semiconductor   |
| testing, packaging, and grinding/dicing   |
| processes. All client-commissioned products<br>(wafer/IC) are delivered to clients. We do not |
| have our own products. The wastes we generate   |
| are mostly discarded packaging materials. The   |
| Company does not use toxic substances, so our   |
| testing processes do not contribute to air  |
| pollution problems. The organic gasses of COG   |
| cutting, grinding and alcohol wiping of the   |
| subsidiary of China are treated by  |
| photocatalysis and discharged via a   |
| 15-meter-high exhaust pipe; hence, there is only  |
| wastewater treatment and waste generation.  |
| Waste generated is treated by outsourced  |
| qualified vendors; no waste is being transported  |
| outside of Taiwan. Each year, we take into  |
| account the Company's environmental policy  |
| and establish various waste and energy  |
| reduction objectives and periodically and track   |
| waste and energy reduction within the plant.  |
| Furthermore, we have also built an auditing   |
| system on waste treatment vendors and perform   |
| audits on a consistent basis without early  |
| warning, ensuring the legality of our outsourced  |
| treatment vendors. Waste generation intensity   |
| for the past 2 years. (all plants and subsidiaries)   |
|   |

| specifies the Company's principles with respect  |                           |   | all employees and    | d managers. The policy        |             |

| <br>  |
|---|
| to the implementation of occupational and         |
| health improvement actions, overall safety and    |
| health objectives, and commitment to              |
| improving safety and health performance. We       |
| use the ISO 45001 occupational safety and         |
| health management system as the structure and     |
| the autonomous management spirit of PDCA          |
|   |
| continuous improvement to formulate various       |
| safety and health management processes and        |
| work rules. As well as this, by following the     |
| guidelines for operating activities, not only are |
| we able to reduce the incidence of occupational   |
| hazards, but at the same time we also minimize    |
| the damage and impact to property, personal       |
| and environment. In 2021, the Group recorded      |
| 25 occupational injury-related incidents.         |
| Occupational injury-related mortality rate was    |
| 0. Severe occupational injury rate was 0.         |
| Recordable rate of occupational injury was        |
|   |
| 1.32. Occupational injury-related deaths and      |
| rate were 0. Recordable cases of occupational     |
| disease were 0. We continue to conduct risk       |
| assessments each year and implement               |
| improvement measures for major risks and          |
| hazards, effectively reducing the incidence of    |
| occupational disasters.                           |
| Monitoring the workplace                          |
| To ensure that workers are protected from         |
| hazards of harmful substances in the workplace    |
| and provide them with a healthy and               |
| comfortable workplace, we conduct workplace       |
| monitoring twice a year. In doing this, we are    |
| able to better understand the actual state of     |
|   |
| exposure of workers to hazards.                   |
| Work safety inspection                            |
| We perform a work safety inspection on a          |
| monthly basis and unscheduled inspections on      |
| vendors. We issue monthly NCR improvement         |
| according to suggestions made from the            |
| inspections conducted, and review deficiencies    |
| on the monthly meeting with vendors.              |
| Machinery and equipment safety management         |
| The safety of the Company's machinery and         |
| equipment is managed at source. Prior to the      |
| introduction of equipment, hazard identification  |
| and risk level assessment are conducted. We       |
|   |
| also implement change management procedures       |
| and personnel education and training, to further  |
| reduce the incidence of disasters and accidents.  |
| To ensure the safety of operators, a Release      |
| system is implemented after the machinery has     |
| been installed. This way, we ensure that the      |
| safety devices function properly and other        |
| safety facilities or labeling are completed.      |
| Normal production and operation can only be       |
| carried out, provided the safety requirements     |
| are met. The safety devices and hazard warning    |
| and meet the survey devices and huzard warming    |

|   |   | labeling of machinery and equipment are<br>included in the procurement and acceptance<br>criteria. Safety operation standards for<br>equipment removal, installation, operation,<br>maintenance and repairs are established. Safety<br>protection functions at routine maintenance or<br>repair of equipment are included in the<br>inspection items.Work safety education and training and<br>emergency response drills for the past 3 years<br>(all plants and subsidiaries)Work safety and education and training:Year201920202021 |   |   |   |                            |  |  |  |

- VI. Has the Company established its own Sustainability Development Best-Practice Principles based on "Sustainability Development Best-Practice Principles for TWSE/TPEx Listed Companies"? If any, please describe any discrepancy between the principles and their implementation: The Company's Board of Directors approved the formulation of the "Corporate Social Responsibility Best-Practice Principles" in April 2015 and amendments to the Principles were approved by the Board of Directors in March 2017 to strengthen the implementation of our corporate social responsibility. The actual operation is not significantly different from the Principles.
- VII. Other important information that helps understand the implementation of sustainable development:
- (I) The Company values the energy management, environmental protection and occupational safety & health areas very much. Hsin-Chu Factory and Chu-Nan Factory have won the "Five-Star Award" for labor safety and health from the Council of Labor Affairs, Executive Yuan in 2010 and 2013. In order to fulfill the Company's corporate social responsibility, the Company participates in the adoption of peripheral roads by Chu-Nan Factory each year. The Company is used to promoting the effective resource utilization voluntarily. In 2015, the Company was honored as the excellent entity for the "Low Carbon Action Award" by the Environmental Protection Administration, Executive Yuan. In 2018, the Company's factory premises received the "Badge of Accredited Healthy Workplace" from the Health Promotion Administration. In 2020, Chu-Nan Factory and Tongluo Factory were honored as the excellent entities for "2019 Green Procurement" by the Environmental Protection Bureau of Miaoli County, and Chu-Nan Factory was honored as the excellent entity for "2019 Green Procurement" awarded by the Environmental Protection Administration, Executive Yuan. Tongluo Factory for Stage 1 received the "Green Building-Bronze Medal" awarded by the Ministry of Interior in 2016, and received the excellence award in "Landscaping and Environmental Maintenance Competition" organized by Hsinchu Science Park during 2017 to 2020. In 2021–2022, the Company received the "2020 Green Procurement by Private Companies and Groups" Special Merit Award by Environmental Protection Bureau of Miaoli County Government and "2020 Green Procurement" by the Environmental Protection Administration, Executive Yuan.
- (II) The Company is engaged in the technical service industry for the IC industry and, therefore, there is no such problem about discharge of pollutants in the process of production. Meanwhile, the management values the various pollution prevention works very much. The various inspections all comply with the governmental laws and regulations. The Company has obtained the following certifications: ISO14001 environmental management system (changed to ISO14001:2015 in 2017), OHSAS18001 occupational health and safety management systems (changed into ISO45001:2018 in 2020), ISO14064 for international GHG system (changed to ISO 14064-1:2018 in 2021), and TOSHMS Taiwan occupational safety and health management system certification in 2008 (changed CNS45001:2018 in 2020). Chu-Nan Factory passed ISO50001 energy management system certification in 2017. It was converted into ISO50001:2018, and the packaging factory was included into the scope of certification in 2019. Passed ISO22301:2019 business continuity management system in 2020.
- (III) The Company responds to the multiple employment plans prepared by the government. It received the "Employment Creation Contribution Award" for the agricultural and industrial group awarded by the Ministry of Economic Affairs and Council of Labor Affairs, Executive Yuan on November 30, 2010. Meanwhile, the Company establishes the Employees' Welfare Committee, implements the pension system, organizes various employee training programs and group insurance, arranges periodic health checkups and values the harmonious labor–management relationship. The Company also actively works with local schools. For

the time being, it is working with the schools including National Kaohsiung University of Science and Technology, National Yunlin University of Science and Technology, National Changhua University of Education, National United University, National Quemoy University, Chaoyang University of Technology, National Formosa University and Yu Da University of Science and Technology, etc. The Company not only fulfills its social responsibility but also trains professional human resources. It has been 16 years since the Company adopted the industry–academia cooperation, and a total of 2,588 persons have been involved in the industry–academia cooperation already.

- (IV)For social involvement, the Company established the KYEC Care Association. The Company takes care of disadvantaged groups, cares for the independent-living elderly, participates in community activities and actively sponsors various activities organized by city/county governments as its mission and philosophy. It will also set up public welfare booths in large-scale activities of the Company each year and work with various public welfare groups in some bazaars. It spares no effort in boosting the fund-raising activities organized by the public welfare groups. At the same time, it hopes to fulfill its corporate social responsibility.
- (V) The Company has prepared sustainability reports, which can be found on the Company's website at http://www.kyec.com.tw/, under CSR > Report.

(VI.) The state of the company's performance in the area of ethical corporate management, any variance from the Ethical Corporate Management Best-Practice Principles for TWSE/TPEx Listed Companies, and the reason for any such variance

|      |  |     |    | Status   | Deviation<br>from Ethical<br>Corporate  |
|------|--|-----|----|--|---|
|      | Scope of Assessment  | Yes | No | Summary  | Management<br>Best Practice<br>Principles<br>for<br>TWSE/TPEx<br>Listed<br>Companies<br>and reasons |
| I.   | Enactment of ethical<br>management policy and<br>program   |     |    |  |   |
| (I)  | Has the Company<br>formulated an ethical<br>policy approved by the<br>board of directors and<br>does the Company<br>expressly state the ethical<br>policy andits fulfillment by<br>the boardof directors and<br>themanagement in its<br>Articles of Incorporation<br>and public documents?   | V   |    | The "Ethical Corporate<br>Management Best-Practice<br>Principles" and "Procedures<br>for Ethical Management and<br>Guidelinesfor Conduct" are<br>adopted to assist the<br>Companyto foster a<br>corporate culture of ethical<br>management and sound devel<br>opment, and offer a<br>reference framework for<br>establishing good commercial<br>practices.   | No<br>significant<br>differences  |
| (11) | Does the company<br>establish appropriate<br>precautions against high<br>potential unethical<br>conducts, with analysis and<br>assessments onbusiness<br>activities of high potential<br>unethical conducts, and for<br>mulate a prevention plan<br>stated in Article 7,<br>Paragraph 2 of the Ethical<br>Corporate Management<br>Best-Practice Principles for<br>TWSE/TPEx Listed<br>Companies? | V   |    | The Company has<br>Formulated the "Ethical<br>Corporate Management<br>Rules" approved by the<br>Board of Directors. A risk<br>assessment mechanism<br>against unethicalconduct has<br>also been set upto<br>periodically analyze and<br>assess business activities of<br>relatively higher unethical<br>conduct risks within the<br>business scope. Based on<br>this, we establish preventive<br>programs accordingly and<br>review the adequacy and<br>effectiveness of the<br>preventive programs<br>periodically, while<br>strengthening relevant<br>preventive measures. The<br>preventive programs<br>established by the Company<br>cover the following | No<br>significant<br>differences  |

|                                 | I T | prevention of conduct:                 |
|---------------------------------|-----|--|
|                                 |     | I. Offering and acceptance             |
|                                 |     | of bribes.                             |
|                                 |     | II. Illegal political                  |
|                                 |     | donations.                             |
|                                 |     | III. Improper charitable               |

(VII) If the company has established corporate governance principles or other relevant guidelines, references to such principles must be disclosed:

Please visit the MOPS at https://mops.twse.com.tw/ or the Company's website at https://www.kyec.com.tw/csr/csrreport.aspx.

(VIII) Disclosure of other information enabling better understanding of the Company's corporate governance: The Company has established the Procedures for Handling Material Inside Information to avoid improper disclosure of information and ensure that the information disclosed is consistent and accurate.

#### (IX.) Implementation of the internal control system

1. Declaration of Internal Control System

King Yuan Electronics Co., Ltd. Declaration of Internal Control System

Date: March 2, 2023

The following declaration had been made based on the 2022 self-assessment of the Company's internal control system:

- I. The Company acknowledges and understands that the establishment, implementation and maintenance of the internal control system are the responsibility of the board and managers, and that such a system has been implemented within the Company. The purpose of this system is to provide reasonable assurance in terms of business performance, efficiency (including profitability, performance, asset security, etc.), reliability, timely and transparent financial reporting, and regulatory compliance.
- II. The internal control system is designed with inherent limitations. No matter how perfect the internal control system is, it can only provide a reasonable assurance to the fulfillment of the three objectives referred to above. Moreover, the effectiveness of the internal control system could be affected by the changes of environment and circumstances. However, a self-monitor mechanism is installed in the internal control system of the Company. The Company will make corrections once the deficiencies are identified.
- III. The Company has assessed the effectiveness of the internal control system design and implementation in accordance with the criteria provided in the "Regulations Governing the Establishment of Internal Control Systems by Public Companies" (hereinafter referred to as "The Regulations"). Criteria introduced by "The Regulations" consists of five major elements, each representing a different stage of internal control: 1. Control environment; 2. Risk evaluation; 3. Procedural control; 4. Information and communication; and 5. Supervision. Each element further encompasses several sub-elements. Please refer to the Regulations for details.
- IV. The Company has adopted the abovementioned criteria to validate the effectiveness of its internal control system design and execution.
- V. The following major deficiencies were identified in the Company's evaluation: (See Attachment for details on each deficiency)
- VI. Based on the results of evaluation, the Company believes that the design and implementation of its internal control system (including its supervision and management of subsidiaries) on December 31, 2022, encompassing internal controls for knowledge of the degree of achievement of operational effectiveness and efficiency objectives, reliability, timeliness, and transparency of reporting, and compliance with applicable laws and regulations, are effective, except for the items mentioned in the preceding paragraph.
- VII. This Statement of Declaration will be the major content of the annual report and prospectus of the Company and disclosed to the public. Any falsehood, concealment, or other illegality in the content made public will entail legal liability under Articles 20, 32, 171, and 174 of the Securities and Exchange Act.
- VIII. This declaration was passed unanimously without objection by all 9 directors present at the board meeting dated March 2, 2023.

- (XII) Where a director has expressed a dissenting opinion with respect to a material resolution passed by the board of directors, and said dissenting opinion has been recorded or prepared as a written declaration, disclose the principal content thereof in the most recent fiscal year or up to the date of publication of the annual report:
  - Agenda #1 in matters to be discussed at the 18th meeting of the 14th-term Board of Directors on September 7, 2022: Regarding the discussion of matters recommended by the Company's Audit Committee with respect to the current internal audit report, the chair has put the matter before all directors present at the meeting. The Chairman Chin-Kung Lee and Vice Chairman Chi-Chun Hsieh both opposed the motion. The other directors agreed to suspected involvement in non-arm's length transactions, for further investigation.
  - 2. Agenda #2 in matters to be discussed at the 23th meeting of the 14th-term Board of Directors on January 16, 2023: The Company's disciplinary action against the person responsible for the violation and any other matters related to accountability, based on factual findings uncovered during the non-certifying accountant's review of the purchase and payment cycle between January 1, 2021 and September 30, 2022. The chairman has put the matter before all directors present at the meeting. Except for Diretor Ping-Kun Hung, the others agreed to follow the company's personal reward and punishment method.
  - (XIII) A summary of resignations and dismissals of the Company's chairman, president, chief accountant, executive financial officer, chief internal auditor, corporate governance officer and chief research and development officer in the most recent fiscal year or up to the date of publication of the annual report: None.

# V. Information on the Professional Fees of the Attesting CPAs

Amount unit: NTD thousand

1. When the company changes its accounting firm and the audit fees paid for the financial year in which the change took place are lower than those paid for the financial year immediately preceding the change, the amount of the audit fees before and after the change and the reason shall be disclosed: None.

2. Any reduction in audit remuneration by more than 10% compared to the previous year; state the amount, the percentage and reason of such variation: None.

### VI. Change of auditor

Due to the readjustment of the internal organization of the accounting firm, from the Q1, 2022, accountants Shao-Pin Kuo and Wen-Fun Fuh replaced by Shao-Pin Kuo and Hsin-Min Hsu.

Note: The Company's investment using the equity method.

- Note 1: Acts as the agent for business in the territories of the U.S.A. and related communications.
- Note 2: Acts as the agent for business in the territories of Southeast Asia and Europe and related communications.
- Note 3: Engages in electronic parts manufacturing and trading, and acts as the agent for business in the territories of Japan and related communications.
- Note 4: General investment.
- Note 5: Research and development, design, manufacturing, packaging, testing, processing and maintenance of semiconductor integrated circuits, transistors, electronic components, electronic materials, analog or hybrid automatic data processors, solid-state memory systems
  - , heating ovens and related products and components. Integrated circuit-related technology transfer, technical consultation, technical services, sales of the Company's products and after-sales services.
- Note 6: Research and development, production (packaging, testing), processing of large-scale integrated circuits for electronic components, electronic materials, analog or hybrid automatic data processing machines, solid state memory systems, and heating oven controllers, sales of independently produced products, and provision of related after-sales services; integrated circuit-related technology transfer, technical consultation, technical services.
- Note 7: (1) Since 2002, the Company has been indirectly investing in King Long Technology (Suzhou) Ltd. in mainland China through KYEC Investment International Co., Ltd. (BVI) and KYEC Microelectronics Co., Ltd. (CAYMAN). As of December 31, 2022, the Company has made cumulative investments totaling USD116,155 thousand.
  - (2) On November 1, 2003 and in November 2009, the Company contributed technical skills as a form of investment in KYEC Technology Management Co., Ltd. (SAMOA), thus indirectly investing in King Long Technology (Suzhou) Ltd. through KYEC Microelectronics Co., Ltd. (CAYMAN). The investments amounted to USD5,325 thousand and USD2,175 thousand, respectively, both of which were approved by the Investment Commission, Ministry of Economic Affairs, under Letter No. (92)-Jing-Shen-2-092031647 dated October 20, 2003 and (98)-Jing-Shen-2-09800350290 dated October 21, 2009, respectively.
- Note 8: (1) The Company has successively invested in Suzhou Zhen Kun Technology Ltd. in mainland China, indirectly, via KYEC Investment International Co., Ltd. (BVI) and Sino-Tech Investment Co., Ltd.(SAMOA) since September 2009. On March 6, 2019, Sino-Tech Investment Co., Ltd. transferred RMB 53,226 thousand in ownership of Suzhou Zhen Kun Technology Ltd. to King Long Technology (Suzhou) Ltd., and remitted an equivalent amount of investment capital in December 2019. Sino-Tech Investment Co., Ltd. has completed the liquidation and cancellation processes in 2020Q1. As of December 31, 2022, the Company has accumulated an outward remittance of investment capital totaling USD32,431 thousand.
  - (2) The Company has successively invested in Suzhou Zhen Kun Technology Ltd. in Mainland China, indirectly, via KYEC Investment International Co., Ltd. (BVI) and Strong Outlook Investments Limited (BVI) since September 2010. On March 6, 2019, Strong Outlook Investments Ltd. transferred RMB 32,789 thousand worth of ownership of Suzhou Zhen Kun Technology Ltd. to King Long Technology (Suzhou) Ltd., and remitted an equivalent amount of investment capital in December 2019. Strong Outlook Investments Ltd. has completed the liquidation and cancellation processes in 2020Q1. As of December 31, 2022, the Company has accumulated an outward remittance of investment capital totaling USD16,337 thousand.
- Note 9: Manufacturing of electronic parts, wholesale and retail of electronic materials, and repairing of electric appliances and electronic products.
- Note 10: Manufacturing of electronic parts, wholesale and retail of electronic materials, and repairing of electric appliances and electronic products.
- Note 11: CNC & milling machine processing design and manufacturing of various precision mechanical parts.

#### net worth per share, earnings per share and dividends per share

Note 1: To be determined after resolution at the 2023 general shareholders' meeting.

Note 2: P/E ratio = Average closing price per share for the current year/Earnings per share.

Note 3: P/D ratio = Average closing price per share for the current year/Cash dividend per share.

Note 4: Cash dividend yield = Cash dividend per share/Average closing price per share for the current year.

#### (VI) Dividend policy and implementation

1. The dividend policy defined by the Articles of Incorporation:

If the Company's final statement for the year shows earnings, funds shall first be set aside for tax payments and to make up past losses, and another 10% shall be then be set aside as a statutory reserve; Furthermore, depending on the Company's operating needs and the requirements of laws and regulations, the Company may set aside or reverse a special reserve; if their are still earnings and undistributed earnings at the beginning of the period, the board may draft a proposed earnings distribution plan, which shall be presented to the shareholders meeting for resolution.

The Company's dividends distribution policy shall be determined on the basis of the Company's current and future investment environment, need for funds, state of domestic and foreign competition, and funds need budget, etc., and should also reflect shareholders' interests and strike a balance between dividends and the Company's long-term financial plans. In accordance with law, the Board shall draft an annual distribution plan, which shall be reported to the shareholders meeting. Since the industry in which the Company is situated is currently at the growth stage, and the Company expects to have future expansion plans and funding needs, with regard to the distribution of shareholders' dividends for the year, cash dividends shall comprise no less than 20% of all shareholders' dividends.

2. Distribution of dividend proposed in the current shareholders' meeting:

Unit: NT\$

|               |                | +   |
|---------------|----------------|---|
| Amount        |                | Projected dividend yield  |
|               | 6,432,521,333  |   |
| 6,836,609,104 |                |   |
| (55,209,588)  |                |   |
|               | 6,781,399,516  |   |
|               | (678,139,952)  |   |
|               | 12,535,780,897 |   |
|               |                |   |
|               | 4,279,607,728  | NT\$3.5 per share   |
|               | 4,279,607,728  |   |
|               | 8,256,173,169  |   |
|               | 6,836,609,104  | 6,432,521,333         6,836,609,104         (55,209,588)         6,781,399,516         (678,139,952)         12,535,780,897         4,279,607,728         4,279,607,728 |

Note: 1. According to the Company's distribution policy, the allocable earnings for 2022 shall be allocated as the first priority. The deficit, if any, shall be allocated from the allocable earnings accumulated for the previous year according to the first-in first-out policy in the order of the years in which the earnings were generated chronically.

- 2. The distribution yield is calculated based on the outstanding common stock totaling 1,222,745,065 shares when the board of directors' meeting was held.
- 3. The cash dividend shall be rounded to the whole dollar amount according to the allocation rate. The total of the odd lots less than NT\$1 included in the distribution shall be transferred to the Employees' Welfare Committee.
- 4. Should the Company encounter a change of share capital that changes the number of outstanding shares on a later date, the Board of Directors shall be fully authorized to make the necessary adjustments to the percentage of cash dividends allocated to shareholders.
- 5. The base date for allocation of cash dividends and matters thereto shall be set by the board of directors with authorization upon resolution by the general shareholders' meeting.

3. Expected change in dividend policy: None.

# (VII) Impacts of proposed stock dividends on the Company's business performance and earnings per share: Not applicable.

#### (VIII) Employee and directors' remuneration

1. The percentage or range of remuneration to employees and directors specified in the Company's Charter:

Where there is a profit in the current year, the Company shall allocate 8 percent–10 percent of the profit as the remuneration to employees, and no more than 1 percent thereof as the remuneration to Directors. However, profits must first be taken to offset against cumulative losses if any.

2. The basis for estimating the amount of employee and director remuneration shall take into account the number of shares to be distributed as stock bonuses, and the accounting treatment of any discrepancy between the actual distributed amount and the estimated figure for the current period:

The profit sought by the Company in 2022 totaled NT\$9,328,704,652 (namely, the earnings before tax less remuneration to employees and directors), 8% or NT\$746,296,373 thereof were allocated as remuneration to employees in cash, and 0.8% or NT\$74,629,637 thereof as director's remuneration. There was no difference from the estimate for 2022.

- 3. Board of directors passed remuneration distribution:
  - Remuneration to employees/directors in cash or shares. Any discrepancy between the annual recognized distributed amount and figure, the difference, reason and response should be disclosed: The 2022 remuneration to employees and directors resolved at the board meeting on March 2, 2023 was NT\$746,296,373 and NT\$74,629,637, respectively. There was no discrepancy with the estimates for 2022.
  - (2) Proposed distribution of remuneration to employees in the form of stock bonus as a percentage to net profit after tax plus remuneration to employees in the entity or individual financial statement for the current period:

Not applicable. Remuneration to employees was not distributed in stock dividends for the current period.

4. The actual distribution of remuneration to employees and directors for the previous fiscal year (with an indication of the number of shares, monetary amount, and stock price, of the shares distributed), and, if there is any discrepancy between the actual distribution and the estimated remuneration to employees and directors, additionally the discrepancy, cause, and how it is treated:

The 2021 remuneration to employees and directors resolved on the board meeting held on March 4, 2022 was NT\$569,335,713 and to NT\$56,933,571, respectively. There is no discrepancy with the 2021 estimates.

#### (IX) Repurchase of the Company's shares: None.

- II. Instance of corporate bonds: None.
- III. Instance of preference shares: None.
- IV. Issuance of Overseas Depository Receipts: None.
- V. Information about new restricted employee shares: None.
- VI. Status of New Shares Issuance in Connection with Mergers and Acquisitions: None.
- VII. Implementation of Capital Utilization Plan: None.

## Five. Overview of Operations

#### I. Business Contents

#### (I) Scope of business

- 1. Major lines of business: Design, manufacturing, test, accessories, processing, packaging and sale of various integrated circuits, manufacturing, processing and sale of various burn-in machines and spare parts thereof, and import and export of said products.
- 2. Weight of business lines: The Company was officially incorporated in May 1987 and primarily engaged in grinding, cutting, wire bonding and packaging of IC at the very beginning. Since 1996, the Company has successively added the testing services for various types of integrated circuits. Meanwhile, the Company invested funds to incorporate King Long Technology (Suzhou) Ltd. in 2002, and has also invested in Suzhou Zhen Kun Technology Ltd. since 2009, primarily in order to increase its package and test services for various integrated circuits in the territories of mainland China.

The consolidated company's proportion of import/export for the most recent five years is stated as follows:

In 2018, the proportion of import/export was 35.89% and 64.11% respectively.

In 2019, the proportion of import/export was 34.48% and 65.52% respectively.

In 2020, the proportion of import/export was 39.32% and 60.68% respectively.

In 2021, the proportion of import/export was 48.13% and 51.87% respectively.

In 2022, the proportion of import/export was 46.04% and 53.96% respectively.

Primary products/services and proportion of business in 2022

|                                  |                   | Units: NTD thousand        |
|----------------------------------|-------------------|----------------------------|
| Product line                     | Operating revenue | Proportion of business (%) |
| Wafer test service               | 13,721,803        | 37.31                      |
| Integrated circuits test service | 17,409,312        | 47.33                      |

| Total                            | 36,781,996        | 100.00                     |

3. The Company's current primary products (services)

Wafer grinding and dicing, test and package services (Logic, Memory, and mixed signals), Burn-in test and Turnkey Service.

 New products (services) under development Wireless network IC test and package services, integrated IC test and package services, and power management IC test and package services.

#### (II) Industry Overview

#### 1. Industry status and development

According to the questionnaire results of TSIA, ITRI's IEK statistics showed that the output value of Taiwan's entire IC industry amounted to NT\$1197.1 billion (US\$40.2B) in Q4 of 2022 (22Q4) (including IC design, IC manufacturing, IC package and IC testing), representing a decline of 3.7% from the previous quarter (22Q3) and a growth of 8.2% from the same period (21Q4) in 2021. The output value of the IC design industry amounted to NT\$260 billion (US\$8.7B), down 12.5% from the previous quarter (22Q3) and up 18.1% from the same period in 2021 (21Q4); the output value of the IC manufacturing industry amounted to NT\$769.9 billion (US\$25.8B), up 0.8% from the previous quarter (22Q3) and up 25.5% from the same period in 2021 (21Q4), including that of the foundry amounting to NT\$723.4 billion (US\$24.3B), up 1.5% from the previous quarter (22Q3) and 33.9% from the same period in 2021 (21Q4); the memory and other products amounted to NT\$46.5 billion (US\$1.6B), down 8.8% from the previous quarter (22Q3) and 36.6% from the same period in 2021 (21Q4); the output value of the IC package industry amounted to NT\$114 billion (US\$3.8B), down 10.2% from the previous quarter (22Q3) and 5.0% from the same period in 2021 (21Q4); the output value of the IC test industry amounted to NT\$53.2 billion (US\$1.8B), down 4.1% from the previous quarter (22Q3) and 3.3% from the same period in 2021(21Q4). The exchange rate of NTD against USD was 1:29.8 The test industry is identified as a capital-intensive advanced high-tech industry with considerable barriers to entry. Recently, the constant evolution of IC process and increasingly complicated functions have made the IC test become more and more important. Notwithstanding, due to the increasing capital expenditure, more and more leading IDMs and foundries have given up expansion of the back-end production capacity and

contracted the IC test services to others. As a result, the professional test industry was booming.

Looking ahead to 2023, continued destocking in the first half of the year and sluggish demand for end products have caused the IC packaging and testing industry to experience a quarterly decline. However, as the industry approaches peak season while U.S. Federal Reserve is projected to slows down its interest rate hike in the second half of the year, demand for end products may gradually pick up, slowly putting the IC packaging and testing industry back on track. Due to interest rate hikes by major central banks around the world in 2023, the suppressed demand for end products affected demand for semiconductors. The output value of Taiwan's packaging and testing industry is projected to be NT\$663 billion in 2023, down 3.2% from 2022.

2. Association between upstream, midstream, and downstream industry participants

| <u> </u>            |   |
|---------------------|---|
| Upstream industry   | IC design companies, foundries, and IDMs          |
| Midstream industry  | Testing equipment factories, package and test     |
|                     | factories, and parts manufacturers                |
| Downstream industry | IC resellers, IC design companies, and integrated |
|                     | device manufacturers                              |

3. Development trends and degree of competition for our products

The global semiconductor manufacturers moved their production bases to the territories of Asia in order to cut production costs. The domestic IC industry owns a complete and dynamic vertical division-of-labor system and, therefore, is recognized for its technology, quality and delivery period. Given the increasing proportion of foundries carried out by IDMs and IC design companies in Taiwan and the multiple domestic and foreign wafer fabs that are going to be put into production, there should be few demands for commissioning domestic manufacturers to engage in the back-end test service, in consideration of the cost, delivery period and maintenance of core competitiveness.

According to an MIC report, the global top ten suppliers in the packaging and testing industry by scale of operating revenue in 2022 were ASE, Amkor, Changjiang Electronics Technology Co. Ltd., Powertech Technology Inc., Tongfu Microelectronics Co., Ltd., Huatian Technology Co., Ltd., King Yuan Electronics Co., Ltd. (KYEC), ChipMOS Technologies Inc., Chipbond Technology Corporation, and SFA.

The Company owns complete testing machines, which afford to provide such comprehensive IC test services as logic IC, mixed signal IC, memory IC, wireless network, driver IC and integrated IC, and IC burn-in test. Meanwhile, the Company also provides the integrated services including wafer grinding and dicing and reeling & packaging to meet the customers' need for one-stop purchase and to win the competitive niche for the Company's customers.

#### (III) Technology and R&D overview

1. R&D expenses during the most recent year and up to the date of publication of this annual report:

|                       | Un                  | its: NTD thousand |
|-----------------------|---------------------|-------------------|
| Item/Year             | 2023 as of March 31 | 2022              |
| R&D expenditure       | 290,560             | 1,267,045         |
| Net operating revenue | 7,764,452           | 36,781,996        |
| To operating revenue  | 3.74                | 3.44              |
| (%)                   |                     |                   |

Note: The information is a self-closing figure of the consolidated information as of March 31, 2023.

- 2. Successfully developed technology or product during the most recent year and up to the date of publication of this annual report
  - (1) Tray-based Vision Handler used in IC for tray to reel detection.
  - (2) Semi-automatic assembly/disassembly machine with gripper plate for 12-inch front opening shipping box (FOSB)
  - (3) Burn-in auxiliary line to reduce movers' workload.
  - (4) CP line probe card auto loader/unloader.
  - (5) E320 PE skew automatic measuring system.
  - (6) Develop High Power Burn In Oven& Burn In Board.
  - (7) Develop E-serial new generation logical tester.
  - (8) Develop I-serial new generation CIS tester.
  - (9) Develop D-serial new generation Driver tester.
  - (10) Develop MEMS Magnetic device wafer probing test solution

and final test system.

- (11) Develop MEMS Gas Flow device test solution and system.
- (12) Develop MEMS Bio-Sensor CP Wet Test Mass Production Test Technology.
- (13) Develop VCPC for CRES Analysis Technology.
- (14) Develop RF for <50GHz RF Signal& High Speed test interface PCB.
- (15) Develop components (relay, capacitor) diagnosis analyzer solution.

#### (IV) Long- and short-term business development plans

Short-term business development plan: We intend to expand current market share, fully utilize the test platform's conversion technology, upgrade the production efficiency of the testing machines, cut the production cost, and expand the production capacity to perfectly provide the production capacity to the existing product lines' customers, including Memory, Logic, RF/Base Band, LCD Driver, Mixed-Signal and Image Sensor, etc.

Long-term business development plan: To be in line with the expansion of a wide range of applications in the 5G era, the Company is dedicated to developing the test services for areas such as automotive, IOT, AI and HPC, to support mid-range and high-end panels, various hand-held or fixed sensors and wireless access points to such emerging markets as PC, NB, phone, access port, home digitalization, automotive electronics and high-speed computing servers. The Company will continue to invest in R&D of KGD and high-frequency test solutions. The Company will also develop standard interface for testing to create competitive advantages.

#### II. An Overview of Market and Sales

#### (I) Market analysis

1. Territories where main products (services) are sold (provided)

| Year                            | 2022           |              | 2021           |              |
|---------------------------------|----------------|--------------|----------------|--------------|
| Area                            | Domestic sales | Export sales | Domestic sales | Export sales |
| Sales value of primary products | Value          | Value        | Value          | Value        |
| Wafer test                      | 5,980,816      | 7,740,987    | 5,311,630      | 6,642,385    |
| Integrated circuits test        | 7,795,454      | 9,613,858    | 7,764,356      | 8,032,697    |
| Others                          | 3,158,906      | 2,491,975    | 3,173,853      | 2,834,468    |
| Total                           | 16,935,176     | 19,846,820   | 16,249,839     | 17,509,550   |

Unit: NTD thousand

2. Market share

The Company's consolidated operating revenue amounted to NT\$36.782 billion in 2022, representing a growth of 8.95 % from 2021 that topped among peers. The turnover of annual package and test services generated

by it in 2022 ranked 7th place in the same trade in the world, securing the stable market share.

3. Future supply and demand in this market and growth outlook

Given IDMs' contracting their back-end needs to others successively and the increasing proportion of foundries carried out by domestic/foreign IC design companies in Taiwan, the demand for package and test services has been increasing day by day. Notwithstanding, in consideration of the cost, delivery period and quality, their production bases have been moved to the territories of Asia. The domestic IC industry owns a complete and dynamic vertical division-of-labor system and, therefore, is recognized for its technology, quality and delivery period. Given this, it is expected to catch this amazing business opportunity.

According to the latest research reports from domestic/foreign leading institutions, as boosted by Macroeconomy, wireless communication solutions and consumable products, the need for outsourcing production by the global semiconductor market is expected to increase and thereby drive the development of the IC test service industry.

- 4. Competitive niche and positive factors for future development
  - (1) Capital and technique intensive:

Given the machine and equipment required by the test getting more and more expensive and at large quantity, the rapid upgrading of product hierarchy, shortage of domestic R&D talents and management teams with complete experience, and difficulty in establishing long-term cooperation relationship trusted by customers, it is not easy for potential competitors to enter the industry. The Company has been dedicated to establishing close cooperation relationship with domestic IC manufacturers and IC design companies actively permanently, and won the recognition and reliance from customers in its quality and delivery period.

(2) Clear division-of-labor and outsourcing trend in the semiconductor industry

Under the development trend for professional division of labor in the semiconductor industry, IDMs have gradually increased the proportion of production commissioned to professional OEMs in consideration of the operating cost and effect and financial risks. The domestic IC industry has brought the huge business opportunity to the IC downstream test service suppliers, when the foundry suppliers were expanding their international domains and IC design service suppliers were working hard to cooperate with the international leading manufacturers. The Company owns complete testing machines, which afford providing such comprehensive IC test services as logic IC, mixed signal IC, memory IC, sensor, wireless network and integrated IC, and IC burn-in test. Meanwhile, the Company also provides the integrated services including wafer grinding and dicing and reeling & packaging to meet the customers' need for one-stop purchase and to win the competitive niche for the Company's customers.

(3) Economies of business scale and range of product line

The entire IC industry's development emphasizes the upstream IC design and IC manufacturing capabilities. Meanwhile, the on-site support by the IC back-end package and test services is also an important factor critical to enhancement of the IC industry's competitive strength. The depreciation expenses accounted for a high proportion of the cost in the package and test industry. The profitability and risk of loss may be decided relying on the product line portfolio and economies of scale. This may be considered as a competitive strength. The Company has engaged in the test industry for many years and, therefore, secured its solid position in the industry.

- 5. Negative factors for the prospects of our development and our corresponding strategy
  - (1) Merger of competitors or alliance of upstream and downstream suppliers:

Successive expansion of domestic upstream IC manufacturers derived the massive demand for the back-end IC production process. Meanwhile, given the increasing economic recovery in the semiconductor industry and increasing proportion of outsourcing by IDMs, a lot of new IC test service providers allied with each other and, therefore, the competition will become more and more intensive in the market.

Corresponding Strategy:

- A. Provide integrated services which enable customers to receive the complete service for test, Burn-in and product package by placing one order, thereby cutting the entire production period.
- B. Establish long-term cooperative relationship with customers: The Company works hard to establish the long-term cooperative relationship with customers with its strength in quality, speed and cost, so that its production capacity could be utilized perfectly and

stably.

- C. Strengthen technical capability: Make use of the Company's research team to improve the production process and research and develop new technology and products to increase the added value of products.
- (2) Strong capital demand:

Given the business expansion and expensive price of the new generation test equipment, IC test service providers have a strong demand for working capital and funds for investment in machinery and equipment.

Corresponding Strategy: The Company raised consideration working capital through the Company's net cash inflow from operating activities to help the Company's development.

(3) More capital investment, more business risk

The annual capital expenditure of the package and test industry frequently ranges between NT\$1 billion and NT\$10 billion. The annual depreciation expenses are tremendous in this industry. Given the fluctuation of the economy in the semiconductor industry, how to keep the Company seeking profit and avoiding loss is a critical business challenge.

Corresponding Strategy: Be cautious in investing in machinery and equipment, purchase mainstream test equipment, invest in customers with high growth ability, and strengthen the integration of effects of test platforms to disperse the proportion of single customer.

#### (II)Main product applications and production processes

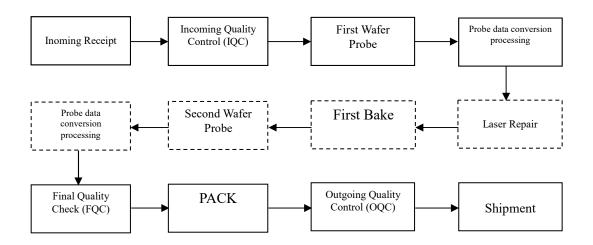

| Main products  | Important purpose   |  |  |  |
|----------------|---|--|--|--|
|                | Primarily intended to check and test the defects in the     |  |  |  |
| Wafer probe    | waffle of the wafer before wafer grinding/dicing and        |  |  |  |
|                | waffle packing.   |  |  |  |
| Wafer          | After the wafer is ground and diced, the waffle is packed   |  |  |  |
| grinding/wafer | in the package process.                                     |  |  |  |
| dicing/waffle  |   |  |  |  |
| packing        |   |  |  |  |
|                | Primarily intended to verify whether such attributes of the |  |  |  |
| IC Final test  | IC products as function, speed, tolerance, electronic       |  |  |  |
| IC Final test  | consumption, electronic emission and heat diffusion         |  |  |  |
|                | satisfy the relevant standards.                             |  |  |  |
|                | The selection in infant mortality period to promptly        |  |  |  |
| Burn-in        | remove infant mortality products with manufacturing         |  |  |  |
|                | defects and ensure product quality.                         |  |  |  |
| Lead Scan &    | Help the lead scan & reform of tested IC products and       |  |  |  |
| Reform/Backend | pack the same into the tap-on-reel trays designated by      |  |  |  |
| Services       | customers for convenient shipping and processing, and       |  |  |  |
| Services       | also provide the Dropship service.                          |  |  |  |
|                | For the incoming from customers                             |  |  |  |
| Package/test   | - e.g. chips, package/test the shipment after grinding      |  |  |  |
| shipment       | and dicing.   |  |  |  |
| sinpinent      | - e.g. in the case of waffle, package/test the shipment     |  |  |  |
|                | after packing/probing.                                      |  |  |  |

1. Important purpose of main products

#### 2. Production process of main products

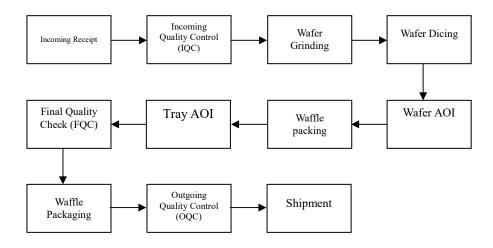

A. Wafer probing

Wafer probing refers to a process dedicated to test wafers to screen accepted and defective goods. The probing result refers to an important basis for the IC assembly, and may serve as the reference and evidence for the yield review in the front-end wafer process. The wafer probing is stated as follows:

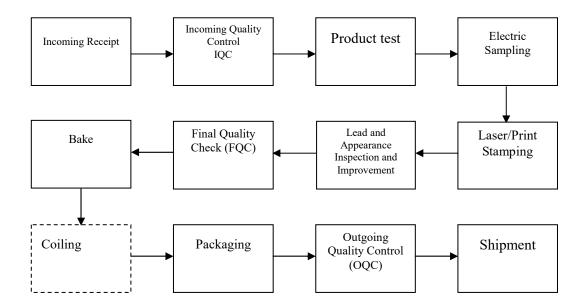

#### B. Wafer grinding/wafer dicing/waffle packing

The wafer grinding/dicing is primarily intended to grind the finished IC to a specified thickness, and then dice the same to dies for the following wire bonding and package. The main process thereof is stated as follows:

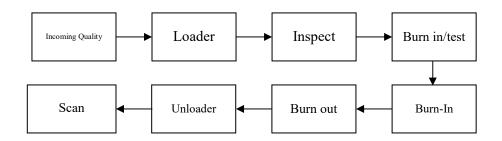

#### C. IC product testing procedures

The final test is intended to test the packaged IC to distinguish the product quality. The IC passing the test is identified as the finished goods. The conditions for the final test vary depending on the functions of various products. The typical final testing is stated as follows:

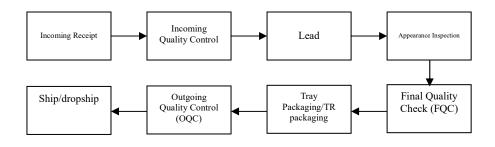

D. Burn-in

Burn-in is intended to test the reliability of IC products and screen infant mortality ones by accelerated test. The main process thereof is stated as follows:

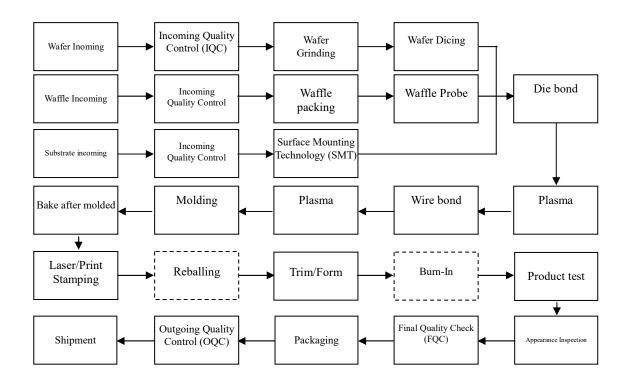

#### E. Lead/dropship

Help the lead scan & reform of tested IC products and pack the same into the tap-on-reel trays designated by customers for convenient shipping and processing, and also provide the Dropship service. The main process thereof is stated as following:

#### F. Package and Test Shipment

The Company's main package/test products include SIP (SSD/PATA/SATA), MSD/HSSD/UFD, QFN, TSOP, BGA and eMMC. Through the overall integrated circuit package and test services provided by the Company, the customers' products may be applied to such products as information, communication, office automation, automotive electronics and consumable electronics successfully. The main process thereof is stated as following:

#### (III) Supply of main raw materials

The Company is engaged in the technical service industry for the IC industry and, therefore, there is no such problem about supply of main raw materials.

(IV) A list of any suppliers and clients accounting for 10% or more of the company's total procurement (sales) amount in either of the 2 most recent fiscal years, the amounts bought from (sold to) each, the percentage of total procurement (sales) accounted for by each, and an explanation of the reason for increases or decreases in the above figures

## 1. Major import suppliers for the past 2 years: None.

|      |                  | 20        | 022   |                                    | 2021             |           |   |                              |

Note: The Company's Chairman is a relative within 2nd degree of kinship with that company's chairman.

Explanation of the reason for increase or decrease: Most of the Company's main customers remained stable from 2020 to 2021. Generally, there was no significant difference arising. Most of the Company's main customers were renowned semiconductor design companies and semiconductor manufacturers. The Company also maintained the long-term stable relationship with the customers.

#### **IV. Information on Environmental Protection Expenses**

(I) Any losses suffered by the company in the most recent fiscal year and up to the annual report publication date due to environmental pollution incidents (including any compensation paid and any violations of environmental protection laws or regulations found in environmental inspection, specifying the disposition dates, disposition reference numbers, the articles of law violated, and the content of the dispositions), and disclosing an estimate of possible expenses that could be incurred currently and in the future and measures being or to be taken. If a reasonable estimate cannot be made, an explanation of the facts of why it cannot be made shall be provided:

> No losses or fines were incurred due to pollution of the environment that should be borne by the Company.

(II) Measures being taken in the future, including improvement measures and possible expenditures:

The Company and the subsidiary continued to establish multiple energy-saving projects in 2022, and the actual expenditure thereof was about NT\$241,771.42 thousand.

- The Company and subsidiaries have established the ISO 50001 (energy management system) and ISO 14064-1 greenhouse gas inventory.
- 2. In 2022, the Company and its subsidiaries recycled approximately 939,000 tons of wastewater.
- 3. The Company and subsidiaries implemented energy-saving projects in 2022, saving a total electricity of 1,468,000 kWh, which generated NT\$22.08 million in benefits.
- 4. The Company and subsidiaries continued to implement energy-saving projects in 2022, which are estimated to save approximately 2.999 million kWh of electricity.
- 5. The Company and subsidiaries passed the ISO 14001 for environmental management, followed the local competent authorities' policies, and sought recycling methods to mitigate the burden imposed by the waste on the environment.

# V. Employer and employee relationships

- (1) Setting forth all employee benefits, continuing education, training, retirement systems, and the status of their implementation, as well as the status of agreements between the labor force and management, and all measures aimed at preserving the rights and interests of employees
  - 1. Employee benefits, continuing education, training:
    - A. Employees' Welfare Committee: The Company established the

Employees' Welfare Committee on September 2, 1993 to engage in planning various employees' welfare policies.

The Committee provides the following subsidies:

- a. Childbirth
- b. Gift certificates for three major festivals (Lunar Chinese New Year, Dragon Boat Festival and Moon Festival)
- c. Gift certificate for birthday
- d. Merchants
- e. Marriage
- f. Funeral
- g. Injury and sickness
- h. Company dinner party
- i. Budget of social activities
- j. Periodic organization of various activities and competitions
- k. Free massage service
- 1. Field service of coffee bar
- m. Field service of convenient chain store and preferential treatment for shopping
- B. Other welfare policies
  - a. Remuneration to employees

Provide the allocation of incentive compensation for employees subject to their personal performance to share earnings with all colleagues.

b. Free periodic health checkup

The Company values the employees' health very much and arranges the employees to take the free health checkup periodically.

c. Provide diversified activities

Encourage the colleagues to relax and adjust themselves physically and mentally besides the routine work through diversified activity design.

d. Medical room and free medical consultation with specialists

- e. Provide colleagues who are away from home with the employee dormitory (equipped with bed, chair and desk, closet, air conditioner and Wi-Fi)
- f. Staff restaurant and meal allowance
- g. Reading room, books and magazines, and publications loan service (regular subscription for multiple domestic/foreign books, newspapers and magazines, etc.)
- h. Parking lots for cars and motorcycles
- i. Incentives to senior employees (with the seniority of 5 years and 10 years)
- j. Selection of model employees and reward to the model employees
- k. Subsidies to budget of department activities
- C. Continuing education/training

The Company is used to sparing no efforts to train talents and develop employees' ability. Therefore, the Company believes that talents should refer to one of the important assets to the Company and also a critical factor to decide the Company's competitive strength and weakness. In order to achieve the goal to train talents, the Company's training system combines the Company's vision, mission, strategy, and core values, and constructs the core competency and management competency required for the various job ranks and required courses to be taken by them based on the analysis information. The Company's training system is categorized into in-house training, off-site training, in-service training, self-inspiration and so on.

For new employees, the Company establishes the tutorship system to train and certify their work skills to ensure the quality of the test operations. For the staff engaged in production and operation technicians, the skill test should be conducted each year to ensure improving and correcting work skills. The high-rank management should tutor and promote the management talents in person to upgrade the effectiveness of both theoretical and practical management. Meanwhile, the Company works hard to promote its core value, build common values and philosophy, and enhance its performance and foundation of competitiveness.

The training is intended to upgrade the inspiration to the colleagues in knowledge and technology, and also to shape the

Company's corporate culture, core values and organizational common view. In the future, when facing the changeable environment, the Company will continue to uphold its lifelong-learning philosophy to fulfill the purpose for holistic education.

2. Retirement system and the status of its implementation:

In order to take care of the employees' life after retirement, facilitate the labor-management relations and improve work efficiency, the Company established the Supervisory Committee of Workers' Pension Preparation Fund pursuant to laws. The Committee shall supervise the deposit and disbursement of the Fund, and provide pension reserves at 2% of the total monthly salary and deposit the same at the Bank of Taiwan on a monthly basis pursuant to the relevant requirements. As of July 1, 2005, the employees who apply the new system should contribute the pension at 6% of their personal monthly salary to be deposited at the personal pension account opened in the Bureau of Labor Insurance.

3. Labor-management agreement

In addition to complying with the Labor Standard Act, the Company also sets up the employee's message board and opinion mailbox, and organizes periodic labor-management meeting meetings and employee symposium, etc. The Company values employees' opinion and appoints dedicated personnel to process the opinion. The communication channel between the labor and management is so smooth that the relationship between the labors and management is considered harmonious.

The company respects the freedom of assembly and association in the workplace, and employees set up two trade unions on their own. However, they were notified that the affairs of the conference were suspended, so they failed to sign a collective agreement with the trade unions in 2022 and 2023. 4. Measures for preserving employees' interests and rights

The Company treats its employees in good faith and with respect, stabilizes the employees' lives and improves the continuing education and training channels by broadening its welfare system, and establishes the fair relationship of mutual trust and cooperation with employees. By aligning with the Company's policies, the employees can fully exert the spirit and effectiveness of teamwork, so that the relationship between the labor force and management is full of harmony. (II) Describe any losses suffered by the company in the most recent fiscal year and up to the date of publication of the annual report due to labor disputes (including any violations of the Labor Standards Act found in labor inspection, specifying the disposition dates, disposition reference numbers, the articles of law violated, the substance of the legal violations, and the content of the dispositions), and disclosing an estimate of possible expenses that could be incurred currently and in the future and measures being or to be taken. If a reasonable estimate cannot be made, an explanation of the facts of why it cannot be made shall be provided: None.

### VI. Cyber Security Management

- (I) Provides the cyber security risk management framework, Cyber Security Policy, specific management plans and cyber security management resources invested:
  - 1. Cyber security risk management framework:
    - We have established an Information Security Task Force, with the President of the Company serving as the top supervisor, the Assistant Vice President of the Information Technology Div. as the chief convener, and appointed members from each business division as members. Regular information security meetings are held to formulate and review information security management objectives and policies. As a means to implement information security management, we have also established an information security manager to regularly monitor the promotion of the Information Security Task Force.

### 2. Information security policy:

At KYEC, our information security policy is "to build an information security management system that aligns with the law and meets the needs of customers; to safeguard confidential information that pertains to the company and its customers; and to raise overall awareness of information security." We continue to update and improve various internal information security management mechanisms, strengthen network security management, system access control management, system development, maintenance of security management, information asset security management, while implementing off-site backup management, access control management and monitoring. Furthermore, we provide education and training on security information to our employees through regular internal information security knowledge promotion so that the awareness of security information is rooted in every employee.

3. Specific management plans and cyber security management resources invested :

3.1 Security information and network risk evaluation We have constructed an information security protection network for risk prevention, further improving and strengthening information security operations from different aspects.

- Network security:
  - Introduce information security information sharing to get hold of global information security events and strengthen network security in a timely manner.
  - Timely update of anti-virus software.
  - ♦ Introduce Security Scorecard to monitor and analyze information security risks and vulnerabilities.
  - Regularly outsource a third-party information security vendor to conduct penetration testing and vulnerability scanning.
- Endpoint security:
  - System scanning equipment is adopted to check and keep abreast of endpoint status at all times.
  - New equipment setup must be scanned and a full report generated before use of network is allowed.
  - Plant-wide daily anti-virus monitoring is performed and machinery and equipment with an abnormality is promptly handled.
- Employee information security awareness:
  - Employee information security awareness education and training is carried out each year and the completion rate of training is 100%.
  - Third-party information security vendors are commissioned regularly to carry out social engineering exercises.
  - Promote information security management regulators through

the computers start screen.

- Information security protection:
  - Introduce information leakage protection system and keep internal confidential documents safe to prevent threat of leakage.
  - Introduce document printing record analysis and tracking to avoid data leakage.
  - ♦ Hard disk encryption mechanism is incorporated to prevent leakage of important data.
- Supply chain information security promotion:
  - Prior to entering the plant, a supplier must have their external devices scanned for virus.

As there are more information security incidents in recent years, companies have suffered from ransomware attacks, resulting in computer system and data damage. Aside from strengthening information security protection, we also carry out ransomware attack simulation exercises. By doing this we are able to strengthen our responses in the event of an emergency to ensure that it is able to promote its response capabilities at critical times and that information system operations are not interrupted.

3.2 The Company obtained ISO27001 certification in 2022.

(II) In the most recent fiscal year and up to the annual report publication date, losses, possible impacts and countermeasures as a result of major cyber security incidents in the last year up to the publication date of this annual report, state the reasons if losses cannot be reasonably estimated: The Company has not identified any cyber attacks that posed a significant impact on its operations.

# II. Financial analysis in the most recent five years

Financial analysis consolidated statements

Reasons for changes in financial ratios in past two years (Analysis is not required if the magnitude of increase or decrease is less than 20%)

1. Current ratio and quick ratio increased compared with previous year because of increase in profit, which caused cash and cash equivalents to increase.

- 2. ROA, ratio of pre-tax income to share capital, net profit margin, and earnings per share increased compared with previous year because of a further increase in operating revenue for the current period due to contributions in terms of automotive applications, industrial applications, servers, data center, network communication products, and increased production outsourcing by foreign customers. Net profit before tax and net profit of the term increased mainly because gross profit margin increased considerably and management expenses were adequately controlled, both of which were attributable to increase in average unit price and improved cost management.
- 3. Cash flow ratio and cash reinvestment ratio increased compared with previous year mainly because of increase in net cash inflows from operating activities in the current period.

Note: Financial figures for 2018–2022 were based on the financial statements audited and certified by the CPA.

# Individual Statement of Financial Analysis

The causes resulting in changes in financial rates in the most recent two (2) years by more than 20%: (Analysis is not required if the magnitude of increase or decrease is less than 20%)

- 1. Current ratio and quick ratio increased compared with previous year because of increase in profit, which caused cash and cash equivalents to increase.
- 2. Interest protection multiples, ROA, ratio of pre-tax income to share capital, net profit margin, and earnings per share increased compared with previous year because of a further increase in operating revenue for the current period due to contributions in terms of automotive applications, industrial applications, servers, data center, network communication products, and increased production outsourcing by foreign customers. Net profit before tax and net profit of the term increased mainly because gross profit margin increased considerably and management expenses were adequately controlled, both of which were attributable to increase in average unit price and improved cost management.
- 3. Increase in payables turnover and average inventory turnover days compared with previous year: Mainly because customers have been adjusting their inventory since the third quarter, resulting in a decrease in purchases and end-of-period payables in the second half of the year.
- 4. Cash flow ratio and cash reinvestment ratio increased compared with previous year mainly because of increase in net cash inflows from operating activities in the current period.

Note: Financial figures for 2018–2022 were based on the financial statements audited and certified by the CPA.

The calculation formula for said ratios is identified as follows:

- 1. Financial structure
  - (1) Ratio of liabilities to assets = total liabilities/total assets.
  - (2) Ratio of long-term capital to property, plant and equipment = (Total equity + Long-term loan) / net of property, plant and equipment.
- 2. Solvency
  - (1) Current ratio = current assets / current liabilities.
  - (2) Quick ratio = (current assets inventory prepayments) / current liabilities.
  - (3) Times interest earned ratio = net profit before interest and tax / interest expenses for the current period.
- 3. Operational ability
  - Receivables (including accounts receivable and notes receivable resulting from operation) turnover = net sales / balance (gross) of average accounts receivable (including accounts receivable and notes receivable resulting from operation).
  - (2) Average cash collection days = 365 / receivables turnover.
  - (3) Inventory turnover = sale cost / average inventory.
  - (4) Payables (including accounts payable and notes payable resulting from operation) turnover = sale cost / balance (gross) of average accounts payable (including accounts payable and notes payable resulting from operation).
  - (5) Average inventory turnover days = 365 / inventory turnover.
  - (6) Property, plant and equipment turnover = net sales / average net property, plant and equipment balance.
  - (7) Total assets turnover = net sales / average total assets.
- 4. Profitability
  - (1) Return on assets = [Net Income or Loss + Interest expense × (1 tax rate)] / Average total assets.
  - (2) ROE = Income after income tax / average total equity.
  - (3) Profit margin = Income after income tax / net sales.
  - (4) Earnings per share = (attributable to the shareholder's profit and loss of the parent company Preferred dividends) / Weighted average number of shares issued. (Note 1)
- 5. Cash flow
  - (1) Cash flow ratio = net cash flow from operating activities / current liabilities.
  - (2) Cash flow adequacy ratio = net cash flow from operating activities during the most recent five years / (capital expenditure + increase in inventory + cash dividends) during the most recent five years.

- (3) Cash reinvestment ratio = (net cash flow from operating activities cash dividends) / (gross property, plant and equipment + long-term investments + intangible assets + working capital). (Note 2)
- 6. Leverage:
  - (1) Operating leverage = (net operating revenues variable operating costs and expenses) / operating profit (Note 3).
- (2) Financial leverage = operating profit / (operating profit interest expenses).
- Note 1: Calculation of earnings per share has taken the following factors into account:
  - 1. The weighted average quantity of outstanding common stock shall be used as the standard, not the quantity of outstanding shares at the end of the year.
  - 2. In case of raising capital through issuing new shares or transactions of treasury stocks, calculate also the weighted average quantity of outstanding shares in the period of circulation.
  - 3. In case of capitalization of retained earnings or capitalization of capital surplus into new shares, adjustment shall be made in retrospect to the size of capitalization for each instance when calculating the earnings per shares annually or semi-annually. The time of issuance can be neglected.
  - 4. If the preferred shares are non-convertible accumulated preferred shares, the dividend declared in the current period (whether paid or unpaid) shall be deducted from corporate earnings or as added to earnings after taxation. If the accumulated preferred shares are not accumulative in nature, dividend for preferred shares shall be deducted from corporate earnings, if any. In case of loss, no adjustment shall be made.

Note 2: Cash flow analyses have taken the following factors into account:

- 1. Net cash flow from operating activities refers to net cash inflow from operating activities as stated in the Statement of Cash Flow.
- 2. Capital expenditure refers to the amount of annual cash outflow spent on capital investments.
- 3. The increase in inventory is included only when the balance at the end is more than that at the beginning. If the inventory decreases at the end of the year, it shall be calculated as "zero."
- 4. Cash Dividends include the dividends in cash paid to holders of common stock and preferred shares.
- 5. Gross property, plant and equipment refers to the amount before deducting accumulated depreciation.
- Note 3: The Company, as a securities issuer, is required to classify operating costs and expenses between fixed and variable portions; any estimate or subjective judgment used in the classification needs to be reasonable and consistent.

# III. Audit Report from the Auditing Committee on the Latest Financial Statements

# King Yuan Electronics Co., Ltd. Audit Committee's audit report

With regard to the Company's 2022 business report, consolidated financial statement (including financial statements of individual entities), and distribution of earnings resolutions prepared and submitted by the Board, the consolidated financial statement (including financial statements of individual entities) has already been audited by Ernst & Young, which has submitted an audit report. The foregoing business report, consolidated financial statement (including financial statements of individual entities), and distribution of earnings resolution has been reviewed by the Audit Committee, which found no discrepancies. The foregoing report has been made pursuant to Article 14-4 of the Securities and Exchange Act and Article 219 of the Company Act, please check.

King Yuan Electronics Co., Ltd.

Convener of the Audit Committee: Hui-Chun Hsu

March 2, 2023

- IV. Consolidated Financial Report and Accountant's Review Report for the Most Recent Fiscal Year: Please refer to Appendix 2.
- V. Parent Company Only Financial Report and Accountant's Review Report for the Most Recent Fiscal Year: Please refer to Appendix 3.
  - VI. If the Company or its affiliates have experienced financial difficulties in the most recent fiscal year or during the current fiscal year up to the date of publication of the annual report, the annual report shall explain how said difficulties will affect the Company's financial position: None.

# Seven. Review and analysis of financial position and financial performance, and risk assessment

## I. Financial Status

The main reasons for any material change in the Company's assets, liabilities, or shareholders' equity during the past two fiscal years, and the effect thereof, and the measures to be taken in response if the effect is of material significance.

#### Analysis of financial position

Main reasons for change by more than 20% between previous and current periods and change in amount by more than NT\$10 million, and the effect thereof are analyzed and stated as follows:

Decrease in non-current financial assets at fair value through other comprehensive income: Mainly due to

decrease in the fair value of Yann Yuan Investment Co., Ltd. and Xie Yong Investment Co., Ltd.

Increase in retained earnings: Mainly due to the increase in profit for the year.

### **II. Financial Performance**

The main reasons for any material change in operating revenues, operating income, and income before tax during the past two fiscal years, and sales volume forecast and the basis thereof, and the effect upon the Company's financial operations as well as measures to be taken in response.

Comparison and analysis of operating results

| Year  | 2022         | 2021         | Increase (decrease)<br>amount | Variation (%) |
|---|--------------|--------------|-------------------------------|---------------|
| Operating revenue                                     | 36,781,996   | 33,759,389   | 3,022,607                     | 8.95          |
| Operating cost  | (23,709,003) | (23,407,322) | 301,681                       | 1.29          |

| Other comprehensive income (loss) –<br>current period | (1,320,936)  | 1,595,123    | (2,916,059)                   | (182.81)      |
| Total comprehensive income –<br>current period        | 5,661,154    | 6,829,365    | (1,168,211)                   | (17.11)       |

Units: NTD thousand

Main reasons for change by more than 20% between previous and current periods and change in amount by more than NT\$10 million, and the effect thereof are analyzed and stated as follows:

Increase in gross profit, net profit, pre-tax income, income tax expense, and net income for the period: Mainly due to further increase in operating revenue for the period, attributable to contributions in terms of automotive applications, industrial applications, servers, data center, network communication products, and increased production outsourcing by foreign customers. In addition, net profit before tax increased mainly because gross profit margin increased considerably and management expenses were adequately controlled, both of which were attributable to increase in average unit price and improved cost management.

Decrease in non-operating income and expenditure: Mainly due to increase in foreign exchange loss and loan interest caused by U.S. interest hikes, and tightened monetary policy.

Decrease in other comprehensive income (loss) for the current period: Mainly due to loss from changes in the fair value of Yann Yuan Investment Co., Ltd. and Xie Yong Investment Co., Ltd.

# III. Cash flow

| Item Year                       | 2022    | 2021    | Increase (decrease) (%) |
|---------------------------------|---------|---------|-------------------------|
| Cash flow ratio                 | 185.76% | 123.14% | 50.85                   |
| Cash flow adequacy ratio        | 93.64%  | 87.72%  | 6.75                    |
| Cash flow reinvestment<br>ratio | 10.19%  | 7.86%   | 29.64                   |

(I) Analysis of liquidity in the previous two years:

Analysis of variations: Net cash inflow from operating activities increased because of an increase in operating revenue for the period due to contributions in terms of automotive applications, industrial applications, servers, data center, network communication products, and increased production outsourcing by foreign customers.

(II) Improvement plans for insufficient liquidity: None.

(III) Analysis of liquidity in the coming year:

Units: NTD thousand

(I) Major capital expenditure and source of capital

(II) Projected benefits

1. Projected possible increased output/sale volume and value, and gross profit

Units: NTD thousand

Units: NTD thousand

| Year | Item                                    | Output<br>volume | Sale<br>volume | Sale value | Gross<br>profit |
|------|---|------------------|----------------|------------|-----------------|
| 2023 | Integrated circuits processing and test | Note             | Note           | 546,068    | 109,214         |
| 2024 | Integrated circuits processing and test | Note             | Note           | 780,097    | 218,427         |
| 2025 | Integrated circuits processing and test | Note             | Note           | 780,097    | 218,427         |

Note: It is impossible to enumerate the same, because the unit of measurement varies depending on different processes.

- 2. Other benefits
  - A. Strengthen the production structure of the vertical division of labor in the semiconductor industry.
  - B. Balance the fab's production capacity which is growing rapidly, and share the risk over investment in the fab investment at the latter stage to upgrade the investment efficiency in the core business.
  - C. Increase the high-efficiency and low-cost professional test services to

upgrade the entire competitiveness.

D. Solve the back-end production problems with respect to the IC design companies which the Company has successively invested in.

# V. The Investment Strategy in the Most Recent Year, Main Causes for Profits or Losses, Improvement Plans and the Investment Plans for the Coming Year

- (I) The Company's investment strategy is primarily intended to align with the Company's enhanced development of the core business, so as to strengthen the relationship with major customers and extend the sensitivity of related industries.
- (II) The investment gain, NT\$24,912 thousand, recognized by the Company under equity method in 2022, primarily resulted from the gain from the operation of the Company's investees, Fixwell Technology Corp. and Wei Jiu Industrial Co., Ltd.
- (III) Investment plan for the coming one fiscal year: None.

## VI. Analysis and assessment of risk factors

- (I) Impact of interest rate, exchange rate, and inflation on the Company's earnings, and responsive measures:
  - 1. Notes to the impact of interest rate and exchange rate changes and inflation on the Company's earnings
    - A. Impact of interest rate and exchange rate changes on the Company's earnings:

Units: NTD thousand

|                               |            | Ollits. NTD thousand |
|-------------------------------|------------|----------------------|
| Item                          | 2022       | 2021                 |
| Exchange gains (losses) (A)   | 119,898    | 70,474               |
| Interest income (expense) (B) | (327,981)  | (195,612)            |
| Operating revenue (C)         | 27,619,107 | 25,820,727           |
| Net profit before tax (D)     | 8,531,953  | 6,510,088            |
| A/C(%)                        | 0.43       | 0.27                 |
| A/D(%)                        | 1.41       | 1.08                 |
| B/C(%)                        | -          | -                    |
| B/D(%)                        | -          | -                    |

Source of data: The financial statements certified by the CPA.

For the interest rate and exchange rate changes, the interest expenditure rendered more substantial impact on the earnings.

B. The influence of inflation on the Company's earnings: The inflation has no material impact on the Company's earnings.

- 2. The Company's responsive measures against interest rate and exchange rate changes and inflation:
  - A. The capital expenditure is intended for the import of equipment. In order to mitigate the impact rendered by the fluctuation in foreign exchange rate on profit, the Company reached an agreement with major customers to collect accounts receivable in USD, in part, to make some payments.
  - B. Establish Article 12 of the Operating Procedures for Acquisition or Disposition of Assets, "Operating Procedure for Acquisition or Disposition of Derivatives" as the basis for operation of the foreign currency exchange rate hedging tools to mitigate the impact rendered by the fluctuation in foreign exchange rate on profit.
  - C. Collect the information about fluctuation in foreign exchange rate and interest rate on a daily basis to help take responsive measures in a timely manner.
- (II) Policies on high-risk and highly leveraged investments, loans to third parties, endorsements/guarantees, and trading of derivatives; describe the main causes of any profits or losses incurred and future responsive measures:
  - 1. The Company has never engaged in any high-risk and highly leveraged investments or loans to third parties. Therefore, no impact on the Company's operation was rendered by said transactions.
  - 2. The Company adopts the stable policy to operate its financial fund. The fund is mainly deposited as term-deposit at banks and renowned money market/bond fund with fair rate of return. The Company also established the operating procedures for loaning to others and operating procedures for making endorsements/guarantees.

# (IV) Impact on the Company's financial standing due to changes in domestic or foreign policies and laws, and corresponding countermeasures

Any changes in domestic and foreign policies and laws are closely monitored and immediately assessed by relevant units of the Company at all time to ensure the adoption of appropriate response measures and, therefore there is no significant impact on the Company's financial standing.

(V) Impact on the Company's financial standing due to technological (including cyber security risks) or industrial changes, and corresponding countermeasures

Considering that the test technology became increasingly complicated in the recent year, the Company needs to continue investing fixed funds to purchase new machines and equipment to develop new business opportunities. The Company has sound financial structure. Therefore, the Company's capital expenditure can satisfy the demand under the new orders for high-end test technology.

In recent years, there have been frequent information security incidents such as cyber attacks and ransomware. For this reason, the Company attaches great importance to information security risk control and protection, builds a multi-level as well as in-depth information security management and control protection network, and implements strict control measures. As of the date of this annual report, there have been no incidents affecting its finance and sales due to technological or industrial changes.

(VI) Crisis management, impacts, and responsive measures in the event of a change in corporate identity

Ethics is the first priority which the corporate identity should focus on.

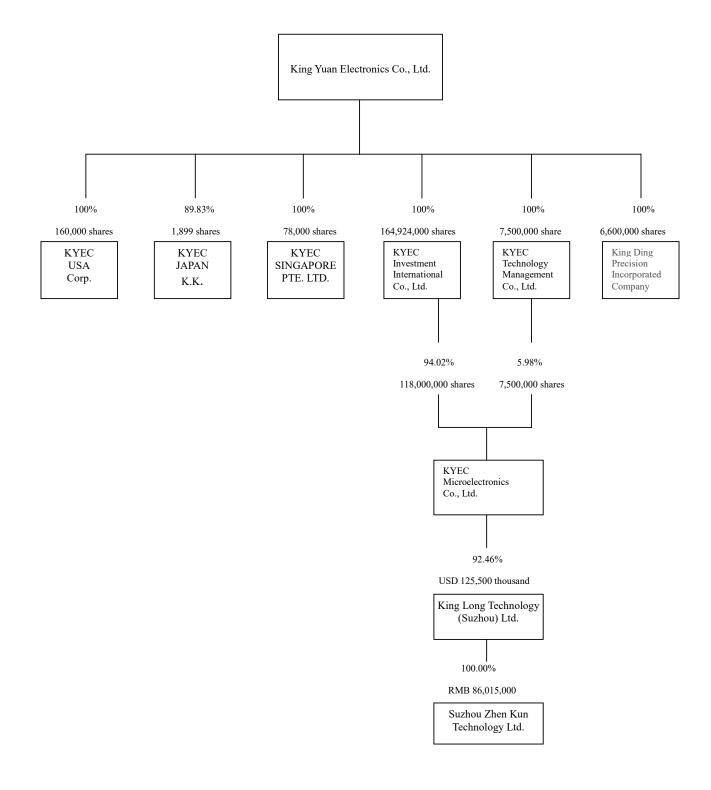

The Company has specified such important principle in its corporate culture and articles of incorporation. Therefore, ethics has become an essence upheld by the Company in its corporate governance.

- (VII) Expected benefits, risks and responsive measures of planned mergers or acquisitions: None.
- (VIII) Expected benefits, risks and responsive measures associated with **plant expansions:** None.
- (IX) Risks associated with over-concentration in purchases or sales, and response measures: None.
- (X) The effects and risks of large-scale share transfers or conversions by directors or major shareholders holding more than 10% of the Company's shares, and response measures: None.
- (XI) Impacts, risks and responsive measures associated with a change of management: None.
- (XII) Major litigations and non-contentious cases: Describe the major litigations, non-contentious cases or administrative litigations involving the Company or any director, president, person-in-charge or major shareholder with more than 10% ownership interest, whether concluded or pending judgment, that are likely to pose a significant impact to shareholder equity or security prices of the Company, and disclose the nature of dispute, the amount involved, the date the litigation first started, the key parties involved, and progress as of the publication date of this annual report: None.
- (XIII) Other significant risks and response measures: None.
- VII. Other Significant Events: None.

# ASSURANCE REPORT OF INTERNAL CONTROL SYSTEM BY THE INDEPENDENT ACCOUNTANT

### To the Board of Directors of King Yuan Electronics Co., Ltd.

The assessment of the design and operating effectiveness of the internal control system in relation with external financial reporting and safeguarding of asset security of purchase and payment cycle of King Yuan Electronics Co., Ltd. (hereafter referred to as "KYEC") and King Long Technology (Suzhou) Ltd.(hereafter referred to as "KLT") for the period from 1<sup>st</sup> of January, 2021 to 30<sup>th</sup> of September, 2022 and the statement made by KYEC on 16<sup>th</sup> of January, 2023 that during 1<sup>st</sup> of January, 2021 to 30<sup>th</sup> of September, 2022 ,the partial design and operation of the internal control system relating to external financial reporting and safeguarding of asset security of purchase and payment cycle of KYEC and its major subsidiary, KLT, is considered to contain material deficiency has been completed by the accountant.

# Subject Matter of Assurance and Information and Applicable Criteria of Subject Matter

The subject matter of this assurance engagement is the design and operating effectiveness of the internal control system relating to external financial reporting and safeguarding of asset security of purchase and payment cycle of KYEC and its major subsidiary, KLT, for the period from 1<sup>st</sup> of January, 2021 to 30<sup>th</sup> of September, 2022.

The subject matter information is the statement of KYEC that partial design and operation of the internal control system relating to external financial reporting and safeguarding of asset security of purchase and payment cycle of KYEC and its major subsidiary KLT for the period during 1<sup>st</sup> of January, 2021 to 30<sup>th</sup> of September, 2022 contains material deficiency.

The applicable criteria to evaluate or assess the above subject matter and subject matter information is "Regulations Governing Establishment of Internal Control Systems by Public Companies" and "Regulations Governing the Acquisition and Disposal of Assets by Public Companies."

### **Inherent Limitations**

Any internal control system has its inherent limitations. Therefore, the above internal

control system of KYEC and its major subsidiary KLT may still fail to prevent or detect error or fraud that has occurred. In addition, the future environment may change, and the degree of compliance with internal control system may also be reduced. Therefore, an internal control system that is effective in current period does not mean it will be effective in the future.

#### **Responsibilities of the Management**

The responsibilities of the management is to set relevant policy and procedures to establish, execute and maintain internal control system based on related regulations and standards of internal control system and to assign independent internal audit department to carry out internal audit and report to board of directors on a regular basis to assure the internal control system is conducted effectively.

### **Responsibilities of the Accountant**

The accountant has performed necessary procedures on the subject matter and information of the subject matter to acquire reasonable assurance based on "Regulations Governing Establishment of Internal Control Systems by Public Companies" and "ISAE 3000: Assurance Engagements Other than Audits or Reviews of Historical Financial Information" and expressed opinion on whether the design and execution of internal control system relating to external financial reporting and safeguarding of asset security of purchase and payment cycle effectively conforms to, in all material matters, applicable criteria and on whether the information of the subject matter has present fairly in all material respects.

### **Independence and Quality Control Standards**

The accountant and the pertaining accounting firm has conformed to the independence and other ethical requirements prescribed in professional code of ethics of Certified Public Accountant. The basic principles of those requirements are integrity, objectivity, professional competence and due care, confidentiality, and professional behavior. In addition, the pertaining accounting firm has conformed to Standards on Quality Control No.1 "Quality Control for Public Accounting Firms" and maintained well-designed quality control system, including documenting policy and procedures relating to compliance with professional ethical requirements, professional standards, and applicable regulations.

### **Summary of Implemented Procedures**

The accountant planned and implemented necessary procedures to acquire the evidence of relevant subject matter and subject matter information. The implemented

procedures includes evaluating the control environment and risk of purchase and payment cycles related to external financial reporting and safeguarding of asset security of KYEC and its major subsidiary, KLT, during this period and implementing inquiry, inspection, observation and reperformance for related records.

# Qualified Conclusion – the Design and Operating Effectiveness of Internal Control System

In our opinion, except for the effect of major deficiency described in the basis section of the qualified conclusion, based on the internal control system judgment items of "Regulations Governing Establishment of Internal Control Systems by Public Companies ", the design and operation of internal control system related to external financial reporting and safeguarding of asset security of purchase and payment cycle of KYEC and its major subsidiary, KLT, during 1<sup>st</sup> of January, 2021 to 30<sup>th</sup> of September, 2022 conformed to the requirements of applicable criteria in all material aspects to maintain effectiveness.

### **Basis of Qualified Conclusion**

The design and operation of internal control system related to external financial reporting and safeguarding of asset security of purchase and payment cycle of KYEC and its major subsidiary KLT contains the following material deficiency on 30<sup>th</sup> of September, 2022:

- 1. The design of Supplier's Questionnaire Evaluation Report and qualification of some bidding companies in some procurement cases are inappropriate.
- 2. Part of the internal control system of the purchase and payment cycle is inconsistent with the Purchase Control Procedures and not prudent.
- 3. Some of supplier management, purchasing, price comparing and negotiating, contracting, procurement and construction, and receiving operations do not follow internal control system and related procedures.
- 4. Part of the procedures of acquisition of real estate do not follow the requirements of "Regulation Governing the Acquisition and Disposal of Asset by Public Companies".

# Unqualified Opinion - Items Referred to in the Statement of Internal Control System

In our opinion, the Statement issued by KYEC on 16<sup>th</sup> of January, 2023 that based on the internal control system judgment items of "Regulations Governing Establishment of Internal Control Systems by Public Companies ", part of the design and operation of the internal control system related to external financial reporting and safeguarding

of asset security contains deficiency present fairly in all material respects.

### **Emphasis Matters - Statement that Partial Design and operation of Internal Control System Contains Material Deficiency**

During the evaluation, we discover that partial design and operation of internal control system relating to external financial reporting and safeguarding of asset security of purchase and payment cycle of KYEC and its major subsidiary, KLT, during 1<sup>st</sup> of January, 2021 to 30<sup>th</sup> of September, 2022, contains material deficiency, and KYEC disclosed the above-mentioned material deficiency in the statement issued on 16<sup>th</sup> of January, 2023. Therefore, we do not modify the conclusion regarding subject matter information of this assurance report.

# **Recommendation Matters – the Recommendation Letter for Material Deficiency in Partial Design and Operation of Internal Control System and Other Findings**

During our evaluation, we discovered that partial design and operation of internal control system with regard to external financial reporting and safeguarding of asset security of KYEC and its major subsidiary, KLT, during 1<sup>st</sup> of January, 2021 to 30<sup>th</sup> of September, 2022 contained material deficiency as well as other findings and therefore issued the attached recommendation letter as the reference to improve the material deficiency and findings of KYEC and its major subsidiary, KLT, brought up responding improvement for future follow-ups. We do not modify our conclusion regarding subject matter of this assurance report accordingly.

#### **Other matters**

We are not responsible for updating this assurance report after its issuance.

#### **Restriction of usage**

The purpose of this assurance report is for reference of KYEC and Taiwan Stock Exchange Co., Ltd. to understand and evaluate the internal control system regarding external financial reporting and safeguarding of asset security of purchase and payment cycle of KYEC and its major subsidiary, KLT.

Diwan & Company

Tina Tseng, CPA Arnico Tseng, CPA 16<sup>th</sup> of January, 2023

# KING YUAN ELECTRONICS CO., LTD. STATEMENT OF INTERNAL CONTROL SYSTEM

Based on the result of self-inspection of internal control system regarding purchase and payment cycle of the Company and its major subsidiary, KLT, during 1<sup>st</sup> of January, 2021 to 30<sup>th</sup> of September, 2022, we hereby states as follows:

- 1. The Company is aware that it is the responsibility of the Company's board of director and managers to establish, implement, and maintain the internal control system. The Company has set up the system. The purpose is to provide reasonable assurance to achieve the objectives of effectiveness and efficiency of operation (including profitability, performance, safeguarding asset...etc.), reliability, timeliness and transparency of financial reporting, and compliance with relevant laws and regulations.
- 2. The internal control has its inherent limitation. Despite the soundness of the design, an internal control system can only provide reasonable assurance to achieve the above-mentioned three objectives. Moreover, due to changes in environment and circumstances, the effectiveness of internal control system may change accordingly. However, the internal control system of the Company has self-monitoring mechanism. Once a deficiency is identified, the Company will take corrective actions.
- 3. The Company determines whether the design and operation of its internal control system is effective according to the judgment items of the effectiveness of internal control system stipulated in the "Handling Guidelines for Establishing An Internal Control System by Public Companies" (hereinafter referred to as "the Handling Guidelines". The internal control system judgment items adopted in "the Handling Guidelines" are based on the process of management control, which divides internal control system into five components: 1. control environment 2.risk assessment 3.control operation 4.information and communication 5.supervision. Each component includes several items. Please refer to the Handling Guidelines for the aforementioned items.
- 4. The Company has adopted the above-mentioned internal control system judgment items to evaluate the design and operating effectiveness of the internal control system.
- 5. The Company inspected and found the following material deficiency: Please refer to the attachment for the details.
- 6. Based on the previous inspection result, the Company believe that the internal control system of the Company as of 30<sup>th</sup> of September, 2022(including the supervision and management of its subsidiaries) including design and operation

of internal control related to the understanding the degree of effectiveness and efficiency of operation, reliable, timely, and transparent financial reporting, and compliance with relevant laws and regulations, except for those mentioned previously, are all effective.

- 7. In response to the need of internal control audit of purchase and payment cycle of the Company during 1<sup>st</sup> of January, 2021 to 30<sup>th</sup> of September, 2022 as required by the Decree no.1111805135 issued by the Taiwan Stock Exchange on 19<sup>th</sup> of October, 2022, the Company engaged the Accountant to audit the internal control system related to reliability of external financial reporting and safeguarding of asset security (to prevent the unauthorized procurement, utilization and disposal of assets) of purchase and payment cycle according to Article 43 of the Handling Guidelines. Except for major deficiency listed in point 5, the others are all effective and there is no other major deficiency to effect the reliability of recording, processing, summarizing, and reporting of financial information and to impact the safeguarding of assets.
- 8. This statement shall become the main content of the Company's annual report and prospectus, and will be open to the public. If there is falsehood or concealment in the above-disclosed content, the Company will be involved in legal liabilities under Article 20, Article 32, Article 171 and Article 174 of the Security and Exchange Law.
- 9. The statement was approved by the Company's board of directors on 16<sup>th</sup> of January, 2023. Nine directors were present, of which zero held objection and the rest all agreed with the content of this statement and so shall we stated.

King Yuan Electronics Co., Ltd. Chairman: Chin-Kung Lee General Manager: An-Hsuan Liu

# KING YUAN ELECTRONICS CO., LTD INTERNAL CONTROL SYSTEM AUDIT

### 1. Scope of Internal Control Audit

As required by the Decree no.1111805135 issued by the Taiwan Stock Exchange on 19<sup>th</sup> of October, 2022, King Yuan Electronics Co., Ltd. (hereafter referred to as "KYEC") engaged the Accountant to conduct an internal control audit on internal control system related to external financial reporting and safeguarding of asset security of purchase and payment cycle during 1<sup>st</sup> of January, 2021 to 30<sup>th</sup> of September, 2022 and issue an accountant assurance report.

The subject matter of this case is the design and operating effectiveness of the internal control system relating to external financial reporting and safeguarding of asset security of purchase and payment cycle of KYEC and its major subsidiary, KLT, for the period during 1<sup>st</sup> of January, 2021 to 30<sup>th</sup> of September, 2022.

The subject matter information is the statement of KYEC that partial design and operation of the internal control system relating to external financial reporting and safeguarding of asset security of purchase and payment cycle of KYEC and its major subsidiary KLT for the period during 1<sup>st</sup> of January, 2021 to 30<sup>th</sup> of September, 2022 contains material deficiency.

The applicable criteria to evaluate or assess the above subject matter and subject matter information is "Handling Standards for Public Offering Companies to Establish Internal Control System" and "Regulations Governing the Acquisition and Disposal of Assets by Public offering Companies."

Please refer to 2.internal control recommendation letter for deficiency found during the audit.

### 2. Internal Control System Recommendation Letter

A. Deficiencies of internal control system relating to external financial reporting and safeguarding of asset security of purchase and payment cycle:

| Items | Major internal    | Effect on | Suggestions   | Actions taken after        |

English Translation of a Report and Financial Statements Originally Issued in Chinese

### KING YUAN ELECTRONICS CO., LTD. AND SUBSIDIARIES

# CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2022 AND 2021 WITH INDEPENDENT AUDITOR'S REPORT TRANSLATED FROM CHINESE

Address: No. 81, Sec. 2, Gongdao 5th Rd., Hsinchu City 300, Taiwan (R.O.C.) Telephone: 886-3-5751888

The reader is advised that these consolidated financial statements have been prepared originally in Chinese. In the event of a conflict between these financial statements and the original Chinese version or difference in interpretation between the two versions, the Chinese language financial statements shall prevail.

### **REPRESENTATION LETTER**

The entities included in the consolidated financial statements as of December 31, 2022 and for the year then ended prepared under the International Financial Reporting Standards, No.10 are the same as the entities to be included in the combined financial statements of the Company, if any to be prepared, pursuant to the Criteria Governing Preparation of Affiliation Reports, Consolidated Business Reports and Consolidated Financial Statements of Affiliated Enterprises (referred to as "Combined Financial Statements"). Also, the footnotes disclosed in the Consolidated Financial Statements have fully covered the required information in such Combined Financial Statements. Accordingly, the Company did not prepare any other set of Combined Financial Statements than the Consolidated Financial Statements.

Very truly yours,

King Yuan Electronics Co., Ltd.

Chairman: C. K. Lee

g y En lish Translation of a Re ort Ori inall Issued in Chinese

#### Independent Auditors' Report

To the Board of Directors and Shareholders of King Yuan Electronics Co., Ltd.

#### Opinion

We have audited the accompanying consolidated balance sheets of King Yuan Electronics Co., Ltd. and its subsidiaries as of December 31, 2022 and 2021, and the related consolidated statements of comprehensive income, changes in equity and cash flows for the years ended December 31, 2022 and 2021, and notes to the consolidated financial statements, including the summary of significant accounting policies (together "the consolidated financial statements").

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of King Yuan Electronics Co., Ltd. and its subsidiaries as of December 31, 2022 and 2021, and their consolidated financial performance and cash flows for the years ended December 31, 2022 and 2021, in conformity with the requirements of the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Financial Reporting Standards, International Accounting Standards, Interpretations developed by the International Financial Reporting Interpretations Committee or the former Standing Interpretations Committee as endorsed and became effectively by Financial Supervisory Commission of the Republic of China.

#### **Basis for Opinion**

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and the Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of King Yuan Electronics Co., Ltd. and its subsidiaries in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China (the "Norm"), and we have fulfilled our other ethical responsibilities in accordance with the Norm. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of 2022 consolidated financial statements. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

#### Revenue reco ition

King Yuan Electronics Co., Ltd. and its subsidiaries recognized NT\$36,781,996 thousand as net sales. Its main activities are providing testing and assembly services that represented 84%, or NT\$30,876,006 thousand in the amount, of the net operating revenue.

Since the primary activities of King Yuan Electronics Co., Ltd. and its subsidiaries are providing testing and assembly services, and the services comprise various wafers/integrated circuits testing and assembly processing and rental of machinery, timing of revenue recognition may vary due to varied nature of revenue that increases the complexity of the revenue recognition. Therefore, we determined the matter to be a key audit matter.

Our audit procedures include (but are not limited to) assessing the appropriateness of the accounting policy for revenue recognition; evaluating and testing the effectiveness of internal control relating to the timing of revenue recognition, analyzing the reasonableness of gross profit margin by products, performing cutoff testing for a period before and after the balance sheet date on a sampling basis, performing test of details on selected samples, reviewing the significant terms of sales agreements and examining relevant delivery documents, and reviewing the selected samples of the quantity, specification, period and relevant documents of machinery services.

We also considered the appropriateness of the disclosures of sales. Please refer to Note 4 and Note 6 in notes to the consolidated financial statements.

# Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the requirements of the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Financial Reporting Standards, International Accounting Standards, Interpretations developed by the International Financial Reporting Interpretations Committee or the former Standing Interpretations Committee as endorsed by Financial Supervisory Commission of the Republic of China and for such internal control as management determines is necessary to enable the preparation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the ability to continue as a going concern of King Yuan Electronics Co., Ltd. and its subsidiaries, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate King Yuan Electronics Co., Ltd. and its subsidiaries or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including audit committee, are responsible for overseeing the financial reporting process of King Yuan Electronics Co., Ltd. and its subsidiaries.

#### Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- 1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control of King Yuan Electronics Co., Ltd. and its subsidiaries.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability to continue as a going concern of King Yuan Electronics Co., Ltd. and its subsidiaries. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause King Yuan Electronics Co., Ltd. and its subsidiaries to cease to continue as a going concern.
- 5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the accompanying notes, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within King Yuan Electronics Co., Ltd. and its subsidiaries to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of 2022 consolidated financial statements and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

#### Others

We have audited and expressed an unqualified opinion on the parent company only financial statements of King Yuan Electronics Co., Ltd. as of and for the years ended December 31, 2022 and 2021.

English Translation of Financial Statements Originally Issued in Chinese KING YUAN ELECTRONICS CO., LTD. AND SUBSIDIARIES CONSOLIDATED STATEMENTS OF CASH FLOWS For the years ended December 31, 2022 and 2021 (Amounts in thousands of New Taiwan Dollars)

### 1. Organization and Operation

King Yuan Electronics Co., Ltd. ("KYEC") was incorporated under the Company Law of the Republic of China ("R.O.C) on May 28, 1987, and commenced operations on July 23, 1987. The Company primarily engages in the business of design, manufacturing, selling, testing and assembly service of integrated circuits, and also engages in manufacturing and selling of IC Monitoring Burn-In machinery and related components. On May 9, 2001, the shares of KYEC were listed on the Taiwan Stock Exchange. KYEC's registered office and the main business location is at No. 81, Sec. 2, Gongdaowu Road, Hsinchu City 300, Republic of China (R.O.C.).

#### 2. Date and Procedures of Authorization of Financial Statements for Issue

The accompanying consolidated financial statements of KYEC and its subsidiaries ("the Company") were approved and authorized for issue by the Board of Directors on March 2, 2023.

#### 3. Newly Issued or Revised Standards and Interpretations

(1) Change in accounting policies resulting from applying for the first time certain standards and amendments

The Company applied for the first time International Financial Reporting Standards, International Accounting Standards, and Interpretations issued, revised or amended which are recognized by Financial Supervisory Commission ("FSC") and become effective for annual periods beginning on or after January 1, 2022. The application of these new standards and amendments had no material effect on the Company.

(2) Standards or interpretations issued, revised or amended, by International Accounting Standards Board ("IASB") which are endorsed by FSC, and not yet adopted by the Company as at the end of the reporting period are listed below:

|       |   | Effective Date  |
|-------|---|-----------------|
| Items | New, Revised or Amended Standards and Interpretations         | Issued by IASB  |
| А     | Disclosure Initiative - Accounting Policies – Amendments to   | January 1, 2023 |
|       | IAS 1   |                 |
| В     | Definition of Accounting Estimates – Amendments to IAS 8      | January 1, 2023 |
| С     | Deferred Tax related to Assets and Liabilities arising from a | January 1, 2023 |
|       | Single Transaction – Amendments to IAS 12                     |                 |

(A) Disclosure Initiative - Accounting Policies - Amendments to IAS 1

The amendments improve accounting policy disclosures that to provide more useful information to investors and other primary users of the financial statements.

(B) Definition of Accounting Estimates – Amendments to IAS 8

The amendments introduce the definition of accounting estimates and include other amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors to help companies distinguish changes in accounting estimates from changes in accounting policies.

(C) Deferred Tax related to Assets and Liabilities arising from a Single Transaction – Amendments to IAS 12

The amendments narrow the scope of the recognition exemption in paragraphs 15 and 24 of IAS 12 so that it no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences.

The abovementioned standards and interpretations were issued by IASB and endorsed by FSC so that they are applicable for annual periods beginning on or after January 1, 2023 and have no material impact on the Company.

(3) Standards or interpretations issued, revised or amended, by IASB but not yet endorsed by FSC and not yet adopted by the Company as at the end of the reporting period are listed below:

|       |  | Effective Date   |
|-------|--|------------------|

|       | Amendments to IAS 1  |                  |

# English Translation of Financial Statements Originally Issued in Chinese KING YUAN ELECTRONICS CO., LTD. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

|       |   | Effective Date  |
|-------|---|-----------------|
| Items | New, Revised or Amended Standards and Interpretations   | Issued by IASB  |
| D     | Lease Liability in a Sale and Leaseback – Amendments to | January 1, 2024 |
|       | IFRS 16   |                 |
| Е     | Non-current Liabilities with Covenants - Amendments to  | January 1, 2024 |
|       | IAS 1   |                 |

A. IFRS 10 "Consolidated Financial Statements" and IAS 28 "Investments in Associates and Joint Ventures" — Sale or Contribution of Assets between an Investor and its Associate or Joint Ventures

The amendments address the inconsistency between the requirements in IFRS 10 "Consolidated Financial Statements" and IAS 28 "Investments in Associates and Joint Ventures", in dealing with the loss of control of a subsidiary that is contributed to an associate or a joint venture. IAS 28 restricts gains and losses arising from contributions of non-monetary assets to an associate or a joint venture to the extent of the interest attributable to the other equity holders in the associate or joint venture. IFRS 10 requires full profit or loss recognition on the loss of control of a subsidiary. IAS 28 was amended so that the gain or loss resulting from the sale or contribution of assets that constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized in full.

IFRS 10 was also amended so that the gain or loss resulting from the sale or contribution of a subsidiary that does not constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized only to the extent of the unrelated investors' interests in the associate or joint venture.

B. IFRS 17 "Insurance Contracts"

IFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects (including recognition, measurement, presentation and disclosure requirements). The core of IFRS 17 is the General (building block) Model, under this model, on initial recognition, an entity shall measure a group of insurance contracts at the total of the fulfilment cash flows and the contractual service margin. The carrying amount of a group of insurance contracts at the end of each reporting period shall be the sum of the liability for remaining coverage and the liability for incurred claims.

Other than the General Model, the standard also provides a specific adaptation for contracts with direct participation features (the Variable Fee Approach) and a simplified approach (Premium Allocation Approach) mainly for short-duration contracts.

IFRS 17 was issued in May 2017 and it was amended in 2020 and 2021. The amendments include deferral of the date of initial application of IFRS 17 by two years to annual beginning on or after January 1, 2023 (from the original effective date of January 1, 2021); provide additional transition reliefs; simplify some requirements to reduce the costs of applying IFRS 17 and revise some requirements to make the results easier to explain. IFRS 17 replaces an interim Standard – IFRS 4 Insurance Contracts – from annual reporting periods beginning on or after January 1, 2023.

C. Classification of Liabilities as Current or Non-current – Amendments to IAS 1

These are the amendments to paragraphs 69-76 of IAS 1 Presentation of Financial statements and the amended paragraphs related to the classification of liabilities as current or non-current.

D. Lease Liability in a Sale and Leaseback - Amendments to IFRS 16

The amendments add seller-lessees additional requirements for the sale and leaseback transactions in IFRS 16, thereby supporting the consistent application of the standard.

E. Non-current Liabilities with Covenants – Amendments to IAS 1

The amendments improved the information companies provide about long-term debt with covenants. The amendments specify that covenants to be complied within twelve months after the reporting period do not affect the classification of debt as current or non-current at the end of the reporting period.

The abovementioned standards and interpretations issued by IASB have not yet been endorsed by FSC at the date when the Company's financial statements were authorized for issue, the local effective dates are to be determined by FSC. The new or amended standards and interpretations have no material impact on the Company.

### 4. Summary of Significant Accounting Policies

#### Statement of Compliance

The accompanying consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers ("the Regulations") and TIFRS as endorsed by FSC.

#### Basis of Preparation

The accompanying consolidated financial statements have been prepared on a historical cost basis, except for financial instruments that have been measured at fair value. The accompanying consolidated financial statements are expressed in thousands of New Taiwan Dollars ("NT\$") unless otherwise stated.

#### Basis of Consolidation

#### Preparation principle of consolidated financial statement

Control is achieved when the Company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Company controls an investee if and only if the Company has:

- a. power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- b. exposure, or rights, to variable returns from its involvement with the investee; and
- c. the ability to use its power over the investee to affect its returns.

When the Company has less than a majority of the voting or similar rights of an investee, the Company considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- a. the contractual arrangement with the other vote holders of the investee;
- b. rights arising from other contractual arrangements;
- c. the Company's voting rights and potential voting rights.

The Company re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control.

Subsidiaries are fully consolidated from the acquisition date, being the date on which the Company obtains control, and continue to be consolidated until the date the Company ceases to control the subsidiary. The financial statements of the subsidiaries are prepared for the same reporting period with the parent company, using consistent accounting policies. All intra-group balances, income and expenses, unrealized gains and losses and dividends resulting from intra-group transactions are eliminated in full.

A change in the ownership interest of a subsidiary, without a change of control, is accounted for as an equity transaction.

Total comprehensive income of the subsidiaries is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

If the Company loses control of a subsidiary, it:

- a. derecognizes the assets (including goodwill) and liabilities of the subsidiary;
- b. derecognizes the carrying amount of any non-controlling interest;
- c. recognizes the fair value of the consideration received;
- d. recognizes the fair value of any investment retained;
- e. recognizes any surplus or deficit in profit or loss; and
- f. reclassifies the parent's share of components previously recognized in other comprehensive income to profit or loss.

The consolidated entities are listed as follows:

|          |                       |                          | Percentage of | Ownership(%) |
|----------|-----------------------|--------------------------|---------------|--------------|

Note: On August 3, 2021, the Company's shareholders' meeting approved the proposal for King Long Technology (Suzhou) Ltd. to launch am initial public offering of RMB denominated ordinary shares (A-shares) on the Shanghai Stock Exchange or the Shenzhen Stock Exchange. However, on June 29, 2022, considering the timeframe of the IPO review process and the effective utilization of the Company's resources, the Company's shareholders' meeting resolved to suspend the IPO plan.

### Foreign currency transactions

The Company's consolidated financial statements are presented in NT\$, which is also the parent company's functional currency. Each entity in the Company determines its functional currency upon its primary economic environment and items included in the financial statements of each entity are measured using that functional currency.

Transactions in foreign currencies are initially recorded by the Company's entities at their respective functional currency rates prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency closing rate of exchange ruling at the reporting date. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. Nonmonetary items that are measured at historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions.

All exchange differences arising on the settlement of monetary items or on translating monetary items are taken to profit or loss in the period in which they arise except for the following:

- A. exchange differences arising from foreign currency borrowings for an acquisition of a qualifying asset to the extent that they are regarded as an adjustment to interest costs are included in the borrowing costs that are eligible for capitalization.
- B. foreign currency items within the scope of IFRS 9 "Financial Instruments" are accounted for based on the accounting policy for financial instruments.
- C. exchange differences arising on a monetary item that forms part of a reporting entity's net investment in a foreign operation is recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal of the net investment.

When a gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange component of that gain or loss is recognized in other comprehensive income. When a gain or loss on a non-monetary item is recognized in profit or loss, any exchange component of that gain or loss is recognized in profit or loss.

### Translation of financial statements in foreign currency

The assets and liabilities of foreign operations are translated into NT\$ at the closing rate of exchange prevailing at the reporting date and their income and expenses are translated at an average rate for the period. The exchange differences arising on the translation are recognized in other comprehensive income. On the disposal of a foreign operation, the cumulative amount of the exchange differences relating to that foreign operation, recognized in other comprehensive income and accumulated in the separate component of equity, is reclassified from equity to profit or loss when the gain or loss on disposal is recognized. The following partial disposals are accounted for as disposals:

- A. when the partial disposal involves the loss of control of a subsidiary that includes a foreign operation; and
- B. when the retained interest after the partial disposal of an interest in a joint arrangement or a partial disposal of an interest in an associate that includes a foreign operation is a financial asset that includes a foreign operation.

On the partial disposal of a subsidiary that includes a foreign operation that does not result in a loss of control, the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is re-attributed to non-controlling interests in that foreign operation. In partial disposal of an associate or jointly arrangement that includes a foreign operation that does not result in a loss of significant influence or joint control, only the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is reclassified to profit or loss.

Any goodwill and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and expressed in its functional currency.

### Current and non-current distinction

An asset is classified as current when:

- A. the Company expects to realize the asset, or intends to sell or consume it, in its normal operating cycle;
- B. the Company holds the asset primarily for the purpose of trading;
- C. the Company expects to realize the asset within twelve months after the reporting period; or
- D. the asset is cash or cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

- A liability is classified as current when:
- A. the Company expects to settle the liability in its normal operating cycle;
- B. the Company holds the liability primarily for the purpose of trading;
- C. the liability is due to be settled within twelve months after the reporting period; or
- D. the Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities are classified as non-current.

### Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short-term, highly liquid time deposits (including ones that have maturity within twelve months) or investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

### Financial instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities within the scope of IFRS 9 "Financial Instruments" are recognized initially at fair value plus or minus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs.

### A. Financial instruments: Recognition and Measurement

The Company accounts for regular way purchase or sales of financial assets on the trade date.

The Company classifies financial assets as subsequently measured at amortized cost, fair value through other comprehensive income or fair value through profit or loss considering both factors below:

- a. the Company's business model for managing the financial assets and
- b. the contractual cash flow characteristics of the financial asset.

### Financial assets measured at amortized cost

A financial asset is measured at amortized cost if both of the following conditions are met and presented as note receivables, trade receivables, financial assets measured at amortized cost and other receivables, etc., on balance sheet as at the reporting date:

- a. the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- b. the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Such financial assets are subsequently measured at amortized cost (the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initial amount and the maturity amount and adjusted for any loss allowance) and is not part of a hedging relationship. A gain or loss is recognized in profit or loss when the financial asset is derecognized, through the amortization process or in order to recognize the impairment gains or losses.

Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:

- a. purchased or originated credit-impaired financial assets. For those financial assets, the Company applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
- b. financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Company applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

### Financial assets measured at fair value through other comprehensive income

A financial asset is measured at fair value through other comprehensive income if both of the following conditions are met:

- a. the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and
- b. the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Recognition of gain or loss on a financial asset measured at fair value through other comprehensive income is described as below:

a. A gain or loss on a financial asset measured at fair value through other comprehensive income is recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains and losses, until the financial asset is derecognized or reclassified.

# English Translation of Financial Statements Originally Issued in Chinese KING YUAN ELECTRONICS CO., LTD. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

- b. When the financial asset is derecognized the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment.
- c. Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:
  - (a) purchased or originated credit-impaired financial assets. For those financial assets, the Company applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
  - (b) financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Company applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

Besides, for certain equity investments within the scope of IFRS 9 that is neither held for trading nor contingent consideration recognized by an acquirer in a business combination to which IFRS 3 applies, the Company made an irrevocable election to present the changes of the fair value in other comprehensive income at initial recognition. Amounts presented in other comprehensive income shall not be subsequently transferred to profit or loss (when disposal of such equity instrument, its cumulated amount included in other components of equity is transferred directly to the retained earnings) and these investments should be presented as financial assets measured at fair value through other comprehensive income on the balance sheet. Dividends on such investments are recognized in profit or loss unless the dividends clearly represent a recovery of part of the cost of investment.

### Financial assets measured at fair value through profit or loss

Financial assets are classified as measured at amortized cost or measured at fair value through other comprehensive income based on aforementioned criteria. All other financial assets are measured at fair value through profit or loss and presented on the balance sheet as financial assets measured at fair value through profit or loss.

Such financial assets are measured at fair value, the gains or losses resulting from remeasurement is recognized in profit or loss which includes any dividend or interest received on such financial assets.

#### B. Impairment of financial assets

The Company recognizes a loss allowance for expected credit losses on debt instrument investments measured at fair value through other comprehensive income and financial assets measured at amortized cost. The loss allowance on debt instrument investments measured at fair value through other comprehensive income is recognized in other comprehensive income and does not reduce the carrying amount in the statement of financial position.

The Company measures expected credit losses of a financial instrument in a way that reflects:

- a. an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- b. the time value of money; and
- c. reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The loss allowance is measured as follows:

- a. at an amount equal to 12-month expected credit losses: the credit risk on a financial asset has not increased significantly since initial recognition or the financial asset is determined to have low credit risk at the reporting date. In addition, the Company measures the loss allowance at an amount equal to lifetime expected credit losses in the previous reporting period, but determines at the current reporting date that the credit risk on a financial asset has increased significantly since initial recognition is no longer met.
- b. at an amount equal to the lifetime expected credit losses: the credit risk on a financial asset has increased significantly since initial recognition or financial asset that is purchased or originated credit-impaired financial asset.
- c. for trade receivables or contract assets arising from transactions within the scope of IFRS 15, the Company measures the loss allowance at an amount equal to lifetime expected credit losses.
- d. For lease receivables arising from transactions within the scope of IFRS 16, the Company measures the loss allowance at an amount equal to lifetime expected credit losses.

At each reporting date, the Company needs to assess whether the credit risk on a financial asset has increased significantly since initial recognition by comparing the risk of a default occurring at the reporting date and the risk of default occurring at initial recognition. Please refer to Note 12 for further details on credit risk.

- C. Derecognition of financial assets
  - A financial asset is derecognized when:
  - a. the rights to receive cash flows from the asset have expired.
  - b. the Company has transferred the asset and substantially all the risks and rewards of the asset have been transferred.
  - c. the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the consideration received or receivable including any cumulative gain or loss that had been recognized in other comprehensive income, is recognized in profit or loss.

D. Financial liabilities and equity

### Classification between liabilities or equity

The Company classifies the instrument issued as a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definitions of a financial liability, and an equity instrument.

### Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. The transaction costs of an equity transaction are accounted for as a deduction from equity to the extent they are incremental costs directly attributable to the equity transaction that otherwise would have been avoided.

### Compound instruments

The Company evaluates the terms of the convertible bonds issued to determine whether it contains both a liability and an equity component. Furthermore, the Company assesses if the

economic characteristics and risks of the put and call options contained in the convertible bonds are closely related to the economic characteristics and risk of the host contract before separating the equity element.

For the liability component excluding the derivatives, its fair value is determined based on the rate of interest applied at that time by the market to instruments of comparable credit status. The liability component is classified as a financial liability measured at amortized cost before the instrument is converted or settled.

For the embedded derivative that is not closely related to the host contract (for example, if the exercise price of the embedded call or put option is not approximately equal on each exercise date to the amortized cost of the host debt instrument), it is classified as a liability component and subsequently measured at fair value through profit or loss unless it qualifies for an equity component. The equity component is assigned the residual amount after deducting from the fair value of the instrument as a whole the amount separately determined for the liability component. Its carrying amount is not remeasured in the subsequent accounting periods. If the convertible bond issued does not have an equity component, it is accounted for as a hybrid instrument in accordance with the requirements under IFRS 9 "Financial Instruments".

Transaction costs are apportioned between the liability and equity components of the convertible bond based on the allocation of proceeds to the liability and equity components when the instruments are initially recognized.

On conversion of a convertible bond before maturity, the carrying amount of the liability component being the amortized cost at the date of conversion is transferred to equity.

### Financial liabilities

Financial liabilities within the scope of IFRS 9 "Financial Instruments" are classified as financial liabilities at fair value through profit or loss or financial liabilities measured at amortized cost upon initial recognition.

### Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated as at fair value through profit or loss. Gains or losses

on the subsequent measurement of liabilities held for trading including interest paid are recognized in profit or loss.

A financial liability is classified as held for trading if:

- a. it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term;
- b. on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking; or
- c. it is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

If a contract contains one or more embedded derivatives, the entire hybrid (combined) contract may be designated as a financial liability at fair value through profit or loss; or a financial liability may be designated as at fair value through profit or loss when doing so results in more relevant information, because either:

- a. it eliminates or significantly reduces a measurement or recognition inconsistency; or
- b. a group of financial liabilities or financial assets and financial liabilities is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information about the group is provided internally on that basis to the key management personnel.

Gains or losses on the subsequent measurement of liabilities at fair value through profit or loss including interest paid are recognized in profit or loss.

### Financial liabilities at amortized cost

Financial liabilities measured at amortized cost include interest bearing loans and borrowings that are subsequently measured using the effective interest rate method after initial recognition. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the effective interest rate method amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or transaction costs.

### Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified (whether or not attributable to the financial difficulty of the debtor), such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

### E. Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

### Derivative financial instruments

The Company uses derivative instruments to hedge its foreign currency risks and interest rate risks. A derivative is classified in the balance sheet as assets or liabilities at fair value through profit or loss except for derivatives that are designated effective hedging instruments which are classified as derivative financial assets or liabilities for hedging.

Derivative instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of hedges, which is recognized in either profit or loss or equity according to types of hedges used.

When the host contracts are either non-financial assets or liabilities, derivatives embedded in host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not designated at fair value though profit or loss.

#### Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- a. in the principal market for the asset or liability, or
- b. in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming market participants in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

#### <u>Inventories</u>

Inventories are valued at lower of cost and net realizable value item by item.

Costs incurred in bringing each inventory to its present location and condition are accounted for as follows:

Raw materials - Purchase cost on weighted average method

Finished goods and work in progress – Cost of direct materials and labor and a proportion of manufacturing overheads based on normal operating capacity but excluding borrowing costs.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

Rendering of services is accounted in accordance with IFRS 15 and not within the scope of inventories.

### Investments accounted for using the equity method

The Company's investment in its associates is accounted for using the equity method other than those that meet the criteria to be classified as held for sale. An associate is an entity over which the Company has significant influence. A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture.

Under the equity method, the investment in the associate in a joint venture is carried in the balance sheet at cost and adjusted thereafter for the post-acquisition change in the Company's share of net assets of the associate or joint venture. After the interest in the associate or joint venture is reduced to zero, additional losses are provided for, and a liability is recognized, only to the extent that the Company has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture. Unrealized gains and losses resulting from transactions between the Company and the associate or joint venture are eliminated to the extent of the Company's related interest in the associate or joint venture.

When changes in the net assets of an associate or a joint venture occur and not those that are recognized in profit or loss or other comprehensive income and do not affect the Company's percentage of ownership interests in the associate or joint venture, the Company recognizes such changes in equity based on its percentage of ownership interests. The resulting capital surplus recognized will be reclassified to profit or loss at the time of disposing the associate or joint venture on a pro rata basis.

When the associate or joint venture issues new shares, and the Company's interest in an associate or a joint venture is reduced or increased as the Company fails to acquire shares newly issued in the associate or joint venture proportionately to its original ownership interest, the increase or decrease in the interest in the associate or joint venture is recognized in capital surplus and investments accounted for using the equity method. When the interest in the associate or joint venture is reduced, the cumulative amounts previously recognized in other comprehensive income

are reclassified to profit or loss or other appropriate items. The aforementioned capital surplus recognized is reclassified to profit or loss on a pro rata basis when the Company disposes the associate or joint venture.

The financial statements of the associate or joint venture are prepared for the same reporting period as the Company. Where necessary, adjustments are made to bring the accounting policies in line with those of the Company.

The Company determines at each reporting date whether there is any objective evidence that the investment in the associate or an investment in a joint venture is impaired in accordance with IAS 28 "Investments in Associates and Joint Ventures". If this is the case, the Company calculates the amount of impairment as the difference between the recoverable amount of the associate or joint venture and its carrying value and recognizes the amount in the 'share of profit or loss of an associate' in the statement of comprehensive income in accordance with IAS 36 "Impairment of Assets". In determining the value in use of the investment, the Company estimates:

- A. its share of the present value of the estimated future cash flows expected to be generated by the associate or joint venture, including the cash flows from the operations of the associate and the proceeds on the ultimate disposal of the investment; or
- B. the present value of the estimated future cash flows expected to arise from dividends to be received from the investment and from its ultimate disposal.

Because goodwill that forms part of the carrying amount of an investment in an associate or an investment in a joint venture is not separately recognized, it is not tested for impairment separately by applying the requirements for goodwill impairment testing in IAS 36 "Impairment of Assets".

Upon loss of significant influence over the associate or joint venture, the Company measures and recognizes any retaining investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence and the fair value of the retaining investment and proceeds from disposal is recognized in profit or loss. Furthermore, if an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate, the entity continues to apply the equity method and does not remeasure the retained interest.

#### Property, plant and equipment

Property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of dismantling and removing the item and restoring the site on which it is located and borrowing costs for construction in progress if the recognition criteria are met. Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately. When significant parts of property, plant and equipment are required to be replaced in intervals, the Company recognizes such parts as individual assets with specific useful lives and depreciation. The carrying amount of those parts that are replaced is derecognized in accordance with the derecognition provisions of IAS 16 "Property, Plant and Equipment". When a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in profit or loss as incurred.

Depreciation is calculated on a straight-line basis over the estimated economic lives of the following assets:

| Buildings and facilities   | $20 \sim 31$ years |  |
|----------------------------|--------------------|--|
| Plant equipment            | $5 \sim 16$ years  |  |
| Machinery and equipment    | $2 \sim 8$ years   |  |
| Transportation equipment   | $3 \sim 6$ years   |  |
| Office equipment           | $3 \sim 5$ years   |  |
| Right-of-use assets (Note) | $4 \sim 58$ years  |  |
| Miscellaneous equipment    | $3 \sim 11$ years  |  |
| Leasehold improvements     | 10 years           |  |

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognizion of the asset is recognized in profit or loss.

The assets' residual values, useful lives and methods of depreciation are reviewed at each financial year end and adjusted prospectively, if appropriate.

#### <u>Leases</u>

The Company assesses whether the contract is, or contains, a lease, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset for a period of time, the Company assesses whether the contract, throughout the period of use, has both of the following:

- (a) the right to obtain substantially all of the economic benefits from use of the identified asset; and
- (b) the right to direct the use of the identified asset.

For a contract that is, or contains, a lease, the Company accounts for each lease component within the contract as a lease separately from non-lease components of the contract. For a contract that contains a lease component and one or more additional lease or non-lease components, the Company allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the nonlease components. The relative stand-alone price of lease and non-lease components shall be determined on the basis of the price the lessor, or a similar supplier, would charge the Company for that component, or a similar component, separately. If an observable stand-alone price is not readily available, the Company estimates the stand-alone price, maximizing the use of observable information.

#### A. The Company as a lessee

Except for leases that meet and elect short-term leases or leases of low-value assets, the Company recognizes right-of-use asset and lease liability for all leases which the Company is the lessee of those lease contracts.

At the commencement date, the Company measures the lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses its incremental borrowing rate. At the commencement date, the lease payments included in the measurement of the lease liability comprise the following payments for the right to use the underlying asset during the lease term that are not paid at the commencement date:

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

- (a) fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- (b) variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- (c) amounts expected to be payable by the lessee under residual value guarantees;
- (d) the exercise price of a purchase option if the Company is reasonably certain to exercise that option; and
- (e) payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

After the commencement date, the Company measures the lease liability on an amortized cost basis, which increases the carrying amount to reflect interest on the lease liability by using an effective interest method; and reduces the carrying amount to reflect the lease payments made.

At the commencement date, the Company measures the right-of-use asset at cost. The cost of the right-of-use asset comprises:

- (a) the amount of the initial measurement of the lease liability;
- (b) any lease payments made at or before the commencement date, less any lease incentives received;
- (c) any initial direct costs incurred by the lessee; and
- (d) an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

For subsequent measurement of the right-of-use asset, the Company measures the right-of-use asset at cost less any accumulated depreciation and any accumulated impairment losses. That is, the Company measures the right-of-use asset applying a cost model.

If the lease transfers ownership of the underlying asset to the Company by the end of the lease term or if the cost of the right-of-use asset reflects that the Company will exercise a purchase option, the Company depreciates the right-of-use asset from the commencement date to the end of the useful life of the underlying asset. Otherwise, the Company depreciates the right-of-use asset from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The Company applies IAS 36 "Impairment of Assets" to determine whether the right-of-use asset is impaired and to account for any impairment loss identified.

Except for those leases that the Company accounted for as short-term leases or leases of lowvalue assets, the Company presents right-of-use assets and lease liabilities in the balance sheet and separately presents lease-related interest expense and depreciation charge in the statement of consolidated comprehensive income statement.

For short-term leases or leases of low-value assets, the Company elects to recognize the lease payments associated with those leases as an expense on either a straight-line basis over the lease term or another systematic basis.

#### B. The Company as a lessor

At inception of a contract, the Company classifies each of its leases as either an operating lease or a finance lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset. At the commencement date, the Company recognizes assets held under a finance lease in its balance sheet and presents them as a receivable at an amount equal to the net investment in the lease.

For a contract that contains lease components and non-lease components, the Company allocates the consideration in the contract applying IFRS 15.

The Company recognizes lease payments from operating leases as rental income on either a straight-line basis or another systematic basis. Variable lease payments for operating leases that do not depend on an index or a rate are recognized as rental income when incurred.

#### <u>Intangible assets</u>

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is its fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in profit or loss for the year in which the expenditure is incurred.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life is reviewed at least at the end of each financial year. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimates.

Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in profit or loss when the asset is derecognized.

#### A. Research and development costs

Research costs are expensed as incurred. Development expenditures, on an individual project, are recognized as an intangible asset when the Company can demonstrate:

- a. the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- b. its intention to complete and its ability to use or sell the asset;
- c. how the asset will generate future economic benefits;
- d. the availability of resources to complete the asset; and
- e. the ability to measure reliably the expenditure during development.

Following initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortization and accumulated impairment losses. During the period of development, the asset is tested for impairment annually. Amortization of the asset begins when development is complete and the asset is available for use. It is amortized over the period of expected future benefit.

#### B. Computer software

The cost of computer software is amortized on a straight-line basis over the estimated useful life  $(3\sim5 \text{ years})$ .

#### Impairment of non-financial assets

The Company assesses at the end of each reporting period whether there is any indication that an asset in the scope of IAS 36 "Impairment of Assets" may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's ("CGU") fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or cash-generating unit's recoverable amount. A previously recognized impairment loss is reversed only if there has been an increase in the estimated service potential of an asset which in turn increases the recoverable amount. However, the reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years.

A cash generating unit, or groups of cash-generating units, to which goodwill has been allocated is tested for impairment annually at the same time, irrespective of whether there is any indication of impairment. If an impairment loss is to be recognized, it is first allocated to reduce the carrying amount of any goodwill allocated to the cash generating unit (group of units), then to the other assets of the unit (group of units) pro rata on the basis of the carrying amount of each asset in the unit (group of units). Impairment losses relating to goodwill cannot be reversed in future periods for any reason.

An impairment loss of continuing operations or a reversal of such impairment loss is recognized in profit or loss.

#### Treasury shares

Acquisitions of the shares of the Company (treasury shares) are recognized at cost and deducted from equity. Any difference between the carrying amount and the consideration, if reissues, is recognized in capital surplus under equity.

When the retirement of treasury shares, capital surplus – share premiums and share capital are debited proportionately, gains on retirement of treasury shares should be recognized under existing capital surplus arising from similar types of treasury shares; losses on retirement of treasury shares should be offset against existing capital surplus form similar types of treasury shares. If there are insufficient capital reserves to be offset against, then such losses should be accounted for under retained earnings.

#### Revenue recognition

The Company's revenue arising from contracts with customers are mainly rendering of processing services and rental of testing machinery. The accounting policies are explained as follows:

#### A. Rendering of services

The Company's primary activity is to conduct testing and assembly services based on customer's specification demand. According to the customer contract, the ownership of the work in process belongs to the customer. The customer controls the work in process when the Company provides services to create or enhance it. Accordingly, the Company's performance obligation is satisfied over time and the Company, based on the consideration stated in the customer contract (less estimated volume discount), recognizes service revenue over time. The Company estimates the volume discounts using the expected value method based on historical experiences. However, revenue is only recognized to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur and when the uncertainty associated with the variable consideration is subsequently resolved. During the period specified in the contract, refund liability is recognized for the expected volume discounts.

The credit period of the Company's service revenue is from 30 to 120 days. For most of the contracts, when the Company transfers those processed assets to customers and has a right to

an amount of consideration that is unconditional, these contracts are recognized as trade receivables. The Company usually collects the payments shortly after transferring those processed assets to customers; therefore, there is no significant financing component to the contract. For some of the contracts, the Company transfers those processed assets to customers but does not have a right to an amount of consideration that is unconditional, these contacts should be presented as contract assets. Besides, in accordance with IFRS 9, the Company measures the loss allowance for a contract asset at an amount equal to the lifetime expected credit losses.

#### B. Revenue from rental of machinery

The Company provides rental of testing machineries based on customers' demand. According to the contract, the Company provides tailored machineries to customers for testing purposes for a certain period of time. During the contract period, those machineries are for the contracted customers' use only, and will not be mixed with other testing machineries. Meanwhile, during the contract period, those machineries are still under control of the Company, the customer does not have the right to control over or to direct the right of use of the rented machineries. Usually, the unit rental price is fixed and is stated in the contract. Accordingly, the Company's performance obligation is satisfied over time and the Company recognizes revenue from rental of the machinery by rental hours or testing volume multiplied by the fixed unit price, or over the rental period on a straight line basis.

The credit period of the Company's service revenue is from 30 to 120 days. For most of the contracts, the Company recognizes trade receivables upon the completion of rental period. These trade receivables usually have short period and no significant financial component is arisen.

For some machinery rental contracts, prepayments are received from customers upon signing the contract, the Company then has the obligation to provide the services subsequently. Accordingly, these amounts are recognized as contract liabilities.

#### C. Sales of machinery

The Company manufactures and sells professional testing machinery. Those machineries must be tested for specifications according to the contract signed by both parties before being delivered to customers. The Company performs the specification test in accordance with the

contract and issues a machinery inspection report to the customer. After the customer's confirmation that the operating data and function of the machineries have met the specification stated in the inspection report, the machinery can be delivered to the customer's designated location stated in the contract and the control of the machinery can be transferred. At this time, the customer has the right to determine the sales channels and price of those testing machineries, and has the ability to prevent other companies from directing the use and obtaining the benefits of these products. Thus, the Company recognizes the revenue generated from the sales of machineries at this time.

Considering the fact that assisting customers for the machinery installation and providing safety guidance are not significant, so the Company issues an invoice with total consideration to the customer and recognizes the amount as trade receivables upon the delivery of the machinery. In addition, the period between the sales of machinery and the actual receipt of the payment is within one year, therefore, there is no significant financial component. The Company provides its customer with a warranty for refund for defectives products. Such warranty is accounted for in accordance with IAS 17 as liability provision.

#### Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective assets. All other borrowing costs are expensed in the period when they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

### Government grants

Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. Where the grant relates to an asset, it is recognized as deferred income and released to income in equal amounts over the expected useful life of the related asset. When the grant relates to an expense item, it is recognized as income over the period necessary to match the grant on a systematic basis to the costs that it is intended to compensate.

#### Post-employment benefits

All regular employees of KYEC are entitled to a pension plan that is managed by an independently administered pension fund committee. Fund assets are deposited under the committee's name in the specific bank account and hence not associated with KYEC. Therefore, fund assets are not included in the Company's consolidated financial statements. Pension benefits for employees of the overseas subsidiaries and the branches are provided in accordance with the respective local regulations.

For the defined contribution plan, the Company and its domestic subsidiaries will make a monthly contribution of no less than 6% of the monthly wages of the employees subject to the plan. The Company recognizes expenses for the defined contribution plan in the period in which the contribution becomes due. Overseas subsidiaries and branches make contribution to the plan based on the requirements of local regulations.

Post-employment benefit plan that is classified as a defined benefit plan uses the Projected Unit Credit Method to measure its obligations and costs based on actuarial assumptions. Remeasurements, comprising of the effect of the actuarial gains and losses, the effect of the asset ceiling (excluding net interest) and the return on plan assets, excluding net interest, are recognized as other comprehensive income with a corresponding debit or credit to retained earnings in the period in which they occur. Past service costs are recognized in profit or loss on the earlier of:

- A. the date of the plan amendment or curtailment, and
- B. the date that the Company recognizes restructuring-related costs.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset, both as determined at the start of the annual reporting period, taking account of any changes in the net defined benefit liability (asset) during the period as a result of contribution and benefit payment.

### Share-based payment transactions

The cost of equity-settled transactions between the Company and its subsidiaries is recognized based on the fair value of the equity instruments granted. The fair value of the equity instruments is determined by using an appropriate pricing model.

The cost of equity-settled transactions is recognized, together with a corresponding increase in other capital reserves in equity, over the period in which the performance and/or service conditions

are fulfilled. The cumulative expense recognized for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Company's best estimate of the number of equity instruments that will ultimately vest. The income statement expense or credit for a period represents the movement in cumulative expense recognized as at the beginning and end of that period.

No expense is recognized for awards that do not ultimately vest, except for equity-settled transactions where vesting is conditional upon a market or non-vesting condition, which are treated as vesting irrespective of whether or not the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

Where the terms of an equity-settled transaction award are modified, the minimum expense recognized is the expense as if the terms had not been modified, if the original terms of the award are met. An additional expense is recognized for any modification that increases the total fair value of the share-based payment transaction, or is otherwise beneficial to the employee as measured at the date of modification.

Where an equity-settled award is cancelled, it is treated as if it vested on the date of cancellation, and any expense not yet recognized for the award is recognized immediately. This includes any award where non-vesting conditions within the control of either the entity or the employee are not met. However, if a new award is substituted for the cancelled award, and designated as a replacement award on the date that it is granted, the cancelled and new awards are treated as if they were a modification of the original award, as described in the previous paragraph.

The dilutive effect of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share.

The cost of restricted stocks issued is recognized as salary expense based on the fair value of the equity instruments on the grant date, together with a corresponding increase in other capital reserves in equity, over the vesting period. The Company recognizes unearned employee salary which is a transitional contra equity account; the balance in the account will be recognized as salary expense over the passage of vesting period.

#### Income taxes

Income tax expense (income) is the aggregate amount included in the determination of profit or loss for the period in respect of current tax and deferred tax.

#### A. Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. Current income tax relating to items recognized in other comprehensive income or directly in equity is recognized in other comprehensive income or equity and not in profit or loss.

The income tax for unappropriated earnings is recognized as income tax expense in the subsequent year when distribution proposal is approved by the shareholders' meeting.

#### B. Deferred tax

Deferred tax is provided on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- a. where the deferred tax liability arises from the initial recognition of goodwill of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- b. in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, the carry forward of unused tax credits and unused tax losses can be utilized, except:

a. where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

b. in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date. The measurement of deferred tax assets and deferred tax liabilities reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity. Deferred tax assets are reassessed at each reporting date and are recognized accordingly.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current income tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

### 5. Significant Accounting Judgments, Estimates and Assumptions

The preparation of the Company's consolidated financial statements require management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

### Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

#### A. Fair value of Level 3 financial instruments

Where the fair value of financial assets and financial liabilities recorded in the balance sheet cannot be derived from active markets, they are determined using valuation techniques including the income approach (for example the discounted cash flows model) or market approach. Changes in assumptions about these factors could affect the reported fair value of the financial instruments. Please refer to Note 12 for more details.

#### B. Revenue recognition - sales returns and discounts

The Company estimates sales returns and allowance based on historical experience and other known factors at the time of sale, which reduces the operating revenue. In assessing the aforementioned sales returns and allowance, on the basis of highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur. Please refer to Note 6. (11) for more details.

#### 6. Contents of Significant Accounts

#### (1) Cash and cash equivalents

|                               | December 31, | December 31, |  |  |  |  |
|-------------------------------|--------------|--------------|--|--|--|--|
|                               | 2022 202     |              |  |  |  |  |
| Cash on hand                  | \$1,027      | \$750        |  |  |  |  |
| Checking and savings accounts | 9,829,755    | 6,916,202    |  |  |  |  |
| Time deposits                 | 2,985,333    | 1,732,980    |  |  |  |  |
| Total                         | \$12,816,115 | \$8,649,932  |  |  |  |  |

#### (2) Financial assets at fair value through other comprehensive income

|  | December 31, | December 31, |
|--|--------------|--------------|
|  | 2022         | 2021         |
| Equity instrument investments measured at fair value |              |              |
| through other comprehensive income- non-current      |              |              |
| Listed company's stocks                              | \$39,359     | \$43,028     |
| Unlisted company's stocks                            | 4,755,092    | 6,503,449    |
| Total  | \$4,794,451  | \$6,546,477  |

The Company has equity instrument investments measured at fair value through other comprehensive income. Details on dividends recognized for the years ended of 2022 and 2021 are as follows:

|  | For the years ended |  |  |  |  |  |  |
|--|---------------------|--|--|--|--|--|--|
|  | December 31         |  |  |  |  |  |  |
|  | 2022 2021           |  |  |  |  |  |  |
| Dividends revenue related to investments held at the |                     |  |  |  |  |  |  |
| end of the reporting period                          | \$96,288 \$85,016   |  |  |  |  |  |  |

In consideration of disposition or liquidation of certain investments according to the Company's investment strategy, the Company derecognized certain equity instrument investments measured at fair value through other comprehensive income. Details on derecognition of the investments for the years ended December 31, 2022 and 2021 are as follows:

|  | December 31, | December 31, |
|--|--------------|--------------|
|  | 2022         | 2021         |
| The fair value of the investments at the date of |              |              |
| derecognition                                    | \$-          | \$1,365      |
| The cumulative gain (loss) on disposal           | \$-          | \$(326,125)  |

Financial assets at fair value through other comprehensive income were not pledged.

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

#### (3) <u>Notes receivable</u>

|  | December 31, | December 31, |
|--|--------------|--------------|
|  | 2022         | 2021         |
| Notes receivable from operating activities | \$7,218      | \$7,706      |
| Less: loss allowance                       |              |              |
| Total                                      | \$7,218      | \$7,706      |

Notes receivable were not pledged.

The Company adopted IFRS 9 for impairment assessment. Please refer to Note 6 (17) for more details on accumulated impairment. Please refer to Note 12 for more details on credit risk.

#### (4) <u>Trade receivables and trade receivables from related parties</u>

|  | December 31, 2022 | December 31,<br>2021 |
|--|-------------------|----------------------|
| Trade receivables                      | \$5,396,315       | \$5,791,559          |
| Less: loss allowance                   | (14,238)          | (26,286)             |
| Subtotal                               | 5,382,077         | 5,765,273            |
| Trade receivables from related parties | 1,753,148         | 2,151,913            |
| Less: loss allowance                   |                   |                      |
| Subtotal                               | 1,753,148         | 2,151,913            |

| Total                                  | \$7,135,225       | \$7,917,186          |

No trade receivables were pledged.

The receivables are generally on 30 to 120 days terms. Please refer to Note 6 (17) for more details on loss allowance of trade receivables for the years ended December 31, 2022 and 2021. Please refer to Note 12 for more details on credit risk.

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

#### (5) Inventories

|                  | December 31, | December 31, |  |  |  |  |
|------------------|--------------|--------------|--|--|--|--|
|                  | 2022 2021    |              |  |  |  |  |
| Raw materials    | \$999,074    | \$967,833    |  |  |  |  |
| Work in progress | 319,274      | 308,687      |  |  |  |  |
| Finished goods   | 50,278       | 94,953       |  |  |  |  |
| Total            | \$1,368,626  | \$1,371,473  |  |  |  |  |

The cost of inventories recognized in operating costs for the year ended December 31, 2022 amounted to NT\$23,709,003 thousand, including the reversal gain of inventories of NT\$33,568 thousand, and scrap loss of NT\$65,834 thousand, respectively. The reversal is due to the fact that previous write-down of inventories had been scrapped.

The cost of inventories recognized in operating costs for the year ended December 31, 2021 amounted to NT\$23,407,322 thousand, including the reversal gain of inventories of NT\$18,523 thousand, and scrap loss of NT\$42,674 thousand, respectively. The reversal is due to the fact that previous write-down of inventories had been scrapped.

No inventories were pledged.

### (6) Prepayments

a. Please refer to Note 9 for the financial covenants during the loan period.

#### (13) Post-employment benefits

#### Defined contribution plan

The Company adopted a defined contribution plan in accordance with the Labor Pension Act of the R.O.C. The Company has made monthly contribution of 6% of each individual employee's salaries or wages to employee's pension accounts.

Subsidiaries located in the People's Republic of China will contribute social welfare benefits based on a certain percentage of employee's salaries or wages to the employee's individual pension accounts.

Pension benefits for employees of overseas subsidiaries and branches are provided in accordance with the local regulations.

Pension expenses under the defined contribution plan for the years ended December 31, 2022 and 2021 were NT\$403,109 thousand and NT\$338,317 thousand, respectively.

#### Defined benefit plan

The Company adopts a defined benefit plan in accordance with the Labor Standards Act of the R.O.C. The pension benefits are disbursed based on the units of service years and the average salaries in the last month of the service year. Two units per year are awarded for the first 15 years of services while one unit per year is awarded after the completion of the 15th year. The total units shall not exceed 45 units. Under the Labor Standards Act, the Company contributes an amount equivalent to 2% of the employees' total salaries and wages on a monthly basis to the pension fund deposited at the Bank of Taiwan in the name of the administered pension fund committee. Before the end of each year, the Company assesses the balance in the designated labor pension fund. If the amount is inadequate to pay pensions calculated for workers retiring in the same year, the Company will make up the difference in one appropriation before the end of March the following year.

The Ministry of Labor is in charge of establishing and implementing the fund utilization plan in accordance with the Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund. The pension fund is invested in-house or under mandation, based on a passive-aggressive investment strategy for long-term profitability. The Ministry of Labor

establishes checks and risk management mechanism based on the assessment of risk factors including market risk, credit risk and liquidity risk, in order to maintain adequate manager flexibility to achieve targeted return without over-exposure of risk. With regard to utilization of the pension fund, the minimum earnings in the annual distributions on the final financial statements shall not be less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. Treasury Funds can be used to cover the deficits after the approval of the competent authority. As the Company does not participate in the operation and management of the pension fund, no disclosure on the fair value of the plan assets categorized in different classes could be made in accordance with paragraph 142 of IAS 19. The Company expects to contribute NT\$17,555 thousand to its defined benefit plan during the 12 months beginning after December 31, 2022.

The maturities of the defined benefits plan as at December 31, 2022 and 2021 are in 2058 and 2052, respectively.

Pension costs recognized in profit or loss for the years ended December 31, 2022 and 2021.

|                              | For the years ended December 31, |         |
|------------------------------|----------------------------------|---------|
|                              | 2022                             | 2021    |
| Current period service costs | \$5,819                          | \$5,791 |
| Interest income or expense   | 4,149                            | 2,266   |
| Overestimate (underestimate) | (52)                             | 19      |

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

|                           | Defined benefit | Fair value of plan | Benefit liability |
|---------------------------|-----------------|--------------------|-------------------|
|                           | obligation      | assets             | (asset)           |
| Payments from the plan    | (21,796)        | 21,796             | -                 |
| Contributions by employer |                 | (17,556)           | (17,556)          |
| As at December 31, 2022   | \$969,496       | \$(311,652)        | \$657,844         |

The following significant actuarial assumptions are used to determine the present value of the defined benefit obligation:

|                                   | December 31, December |       |
|-----------------------------------|-----------------------|-------|
|                                   | 2022                  | 2021  |
| Discount rate                     | 1.41%                 | 0.68% |
| Expected rate of salary increases | 3.00%                 | 2.00% |

A sensitivity analysis for significant assumption as at December 31, 2022 and 2021 is shown as below:

|                                | Effect on the defined benefit obligation |            |             |             |
|--------------------------------|--|------------|-------------|-------------|
|                                | 2022                                     |            | 20          | 21          |
|                                | Increase in Decrease in                  |            | Increase in | Decrease in |
|                                | defined                                  | defined    | defined     | defined     |
|                                | benefit                                  | benefit    | benefit     | benefit     |
|                                | obligation                               | obligation | obligation  | obligation  |
| Discount rate increase by 0.5% | \$-                                      | \$(75,998) | \$-         | \$(70,995)  |
| Discount rate decrease by 0.5% | 84,013                                   | -          | 78,279      | -           |
| Future salary increase by 0.5% | 82,231                                   | -          | 76,821      | -           |
| Future salary decrease by 0.5% | -  | (75,228)   | -           | (70,449)    |

The sensitivity analyses above are based on a change in a significant assumption (for example: change in discount rate or future salary), keeping all other assumptions constant. The sensitivity analyses may not be representative of an actual change in the defined benefit obligation as it is unlikely that changes in assumptions would occur in isolation of one another.

There was no change in the methods and assumptions used in preparing the sensitivity analyses compared to the previous period.

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

#### (14) Equity

#### A. Share capital

As of December 31, 2022 and 2021, KYEC's authorized share capital was both NT\$15,000,000 thousand; issued share capital was both NT\$12,227,451 thousand (1,222,745 thousand shares), with par value of NT\$10 per share. Each share has one voting right and a right to receive dividends.

#### B. Capital surplus

|  | December 31, | December 31, |
|--|--------------|--------------|
|  | 2022         | 2021         |
| Additional paid-in capital                       | \$333,919    | \$333,919    |
| Arising from conversion of bonds                 | 3,588,848    | 3,588,848    |
| Treasury share transactions                      | 390,101      | 390,101      |
| Arising from the exercise of employee restricted |              |              |
| shares   | 30,755       | 30,755       |
| Changes in ownership interests in subsidiaries   | 610,236      | 541,511      |
| Total  | \$4,953,859  | \$4,885,134  |

According to the Company Act, the capital surplus shall not be used except for offset the deficit of the company. When a company incurs no loss, it may distribute the capital surplus generated from the excess of the issuance price over the par value of share capital and donations. The distribution could be made in cash to its shareholders in proportion to the number of shares being held by each of them.

#### C. Retained earnings and dividend policy

According to KYEC's Articles of Incorporation, net profits for each fiscal year, if any, shall be distributed in following order:

- a. reserve for tax payments;
- b. offset prior year's losses;
- c. set aside 10% of the remaining amount after deducting items (a) and (b) as legal reserve;

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

- d. set aside or reverse special reserve in accordance with law and regulations; and
- e. the distribution of the remaining portion, if any, will be recommended by the Board of Directors and resolved in the shareholders' meeting.

The policy of dividend distribution should reflect factors such as the current and future investment environment, fund requirements, domestic and international competition and capital budgets; as well as the interest of the shareholders, share bonus equilibrium and long-term financial planning, etc. The Board of Directors shall make the distribution proposal annually and present it at the shareholders' meeting. As the Company currently is still in the growth stage, funding may be required in the near future for expansion. Therefore, the current policy is to distribute cash dividends at no less than 20% of total dividends to be distributed.

According to the Company Act, the Company needs to set aside amount to legal reserve unless where such legal reserve amounts to the total authorized capital. The legal reserve can be used to offset the deficit of the Company. When the Company incurs no loss, it may distribute the portion of legal reserve which exceeds 25% of the paid-in capital by issuing new shares or by cash in proportion to the number of shares being held by each of the shareholders.

Pursuant to existing regulations, the Company is required to set aside additional special reserve equivalent to the net debit balance of the other components of shareholders' equity. For any subsequent reversal of other net deductions from shareholders' equity, the amount reversed may be distributed.

Following the adoption of TIFRS, the FSC on April 6, 2012 issued Order No. Financial-Supervisory-Securities-Corporate-1010012865, which sets out the following provisions for compliance:

On a public company's first-time adoption of the TIFRS, for any unrealized revaluation gains and cumulative translation adjustments (gains) recorded in shareholders' equity that the Company elects to transfer to retained earnings by application of the exemption under IFRS 1, the Company shall set aside an equal amount of special reserve. Following a company's adoption of the TIFRS for the preparation of its financial reports, when distributing distributable earnings, it shall set aside to special reserve, from the profit/loss of the current period and the undistributed earnings from the previous period, an amount

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

equal to "other net deductions from shareholders' equity" for the current fiscal year, provided that if the company has already set aside special reserve according to the requirements in the preceding point, it shall set aside supplemental special reserve based on the difference between the amount already set aside and other net deductions from shareholders' equity. For any subsequent reversal of other net deductions from shareholders' equity, the amount reversed may be distributed.

As of December 31, 2022 and 2021, special reserve set aside for the first-time adoption of TIFRS amounted to NT\$201,416 thousand.

The appropriations for earnings for 2021 were resolved by the shareholders in its meeting on June 29, 2022 while the proposed appropriation of earnings for 2022 were approved by Board of Directors on March 2, 2023. The appropriations and dividends per share were as follows:

|                             | Appropriation of earnings |           | Dividend per share (NTS |        |
|-----------------------------|---------------------------|-----------|-------------------------|--------|
|                             | 2022                      | 2021      | 2022                    | 2021   |
| Legal reserve               | \$678,140                 | \$479,555 |                         |        |
| Cash dividends-common stock | 4,279,608                 | 3,688,235 | \$3.50                  | \$3.00 |

On August 3, 2021, the shareholders' meeting resolved to debit capital surplus by NT\$244,549 thousand and distribute the same amounts of cash to shareholders.

Please refer to Note 6(19) for information regarding the employees' compensations (bonuses) and remunerations to directors.

#### D. Non-controlling interests

|  | For the years ended December 31, |           |
|--|----------------------------------|-----------|
|  | 2022                             | 2021      |
| Beginning balance                                  | \$693,893                        | \$7,005   |
| Net gain attributable to non-controlling interests | 145,481                          | 59,196    |
| Other comprehensive income, attributable to non-   |                                  |           |
| controlling interests, net of tax:                 |                                  |           |
| Exchange differences resulting from translating    |                                  |           |
| the financial statements of foreign operations     | 10,460                           | 986       |
| Changes in ownership interests in subsidiaries     | 5,605                            | 626,706   |
| Ending balance                                     | \$855,439                        | \$693,893 |

#### (15) Share-based payment plans

Certain employees of the Company are entitled to share-based payment awards as part of their remuneration. Services are provided by the employees in return for the equity instruments granted. These plans are accounted for as equity-settled share-based payment transactions.

#### Restricted stocks plan for employees of subsidiaries

- A. On September 28, 2022, the Board of Directors of King Long Technology (Suzhou) Ltd., ("King Long") resolved to issue restricted stocks of 5,461,000 units to qualified employees with exercise price of RMB\$1 per unit. Restrictions and vesting conditions of restricted stocks for employees are as follows:
  - (a)To issue registered capital of King Long with each unit.
  - (b)After the grant date, employee's shall remain employed by the Company for at least 5 years and achieve the specified personal performance goals during the vesting period. Restricted stocks will vest by 40%, 70%, 90%, 97%, and 100% on the first, second, third, forth and fifth anniversary after the grant date, respectively. The unvested portions will be purchased back by King Long.
  - (c)During the vesting period, employees may not sell, pledge, transfer, give to another person, create any encumbrance on, or otherwise dispose of, restricted employee stocks, excluding inheritance.
  - (d)The voting rights of restricred stocks shall be exercised by a trust or a centralized custodian institution in accordance with the contract.
  - (e)The fair value information of restricted stocks for employees is as follows:

|            |                 | Total units of    |             |            |
|------------|-----------------|-------------------|-------------|------------|
|            | Cut-off date of | restricted stocks | Total unit  | Fair value |
| Grant date | lock-up period  | issued            | outstanding | per unit   |
| 2022.10.08 | 2027.10.07      | 5,461,000         | 5,461,000   | CNY\$10.54 |

The compensation cost was recognized under the fair value method and the Black-Scholes Option Pricing model was used to estimate the fair value of options granted. The estimated compensation expenses amounted to NT\$223,855 thousand in total based on the vesting conditions and will be recognized during the vesting period.

Assumptions used in calculating the fair value are disclosed as follows:

|                             | Restricted stocks for employees |
|-----------------------------|---------------------------------|
| Expected volatility (%)     | 30.67%                          |
| Risk free interest rate (%) | 1.78%                           |
| Expected life (Years)       | 5 years                         |

The expected life of the restricted stocks is based on historical data and current expectations and is not necessarily indicative of exercise patterns that may occur. The expected volatility reflects the assumption that the historical volatility over a period similar to the life of the restricted is indicative of future trends, which may also not necessarily be the actual outcome.

B. On May 17, 2021, the Board of Directors of King Long Technology (Suzhou) Ltd., ("King Long") resolved to issue restricted stocks of 12,502,187 units and 22,282,749 units to qualified employees with exercise price of RMB\$4.18 and RMB\$7.42 per unit, respectively. Restrictions and vesting conditions of restricted stocks for employees are as follows:

(a)To issue registered capital of King Long with each unit.

- (b)During the vesting period, employees may not sell, pledge, transfer, give to another person, create any encumbrance on, or otherwise dispose of, restricted employee stocks, excluding inheritance.
- (c)The voting rights of restricred stocks shall be exercised by a trust or a centralized custodian institution in accordance with the contract.
- (d)Employee's continuous employment with King Long through the vesting dates, with no violation on any terms of the King Long's employment agreement, employee polocies, are eligible to receive the vested shares.

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

(e)The fair value information of restricted stocks for employees is as follows:

|            |                 | Total units of |             |            |
|------------|-----------------|----------------|-------------|------------|
|            | Cut-off date of | restricted     | Total unit  | Fair value |
| Grant date | lock-up period  | stocks issued  | outstanding | per share  |
| 2021.05.20 | 2026.05.19      | 34,784,936     | 34,784,936  | CNY\$7.38  |

The compensation cost was recognized under the fair value method and the Black-Scholes Option Pricing model was used to estimate the fair value of options granted. The estimated compensation expenses amounted to NT\$173,162 thousand in total based on the vesting conditions and will be recognized during the vesting period.

Assumptions used in calculating the fair value are disclosed as follows:

|                             | Restricted stocks for employees |  |
|-----------------------------|---------------------------------|--|
| Expected volatility (%)     | 44.88%                          |  |
| Risk free interest rate (%) | 0.08%                           |  |
| Expected life (Year)        | 5 years                         |  |

The expected life of the restricted stocks is based on historical data and current expectations and is not necessarily indicative of exercise patterns that may occur. The expected volatility reflects the assumption that the historical volatility over a period similar to the life of the restricted is indicative of future trends, which may also not necessarily be the actual outcome.

Share-based compensation expenses recognized for employee services received are shown in the following table:

|                                 | For the years ende | For the years ended December 31, |  |
|---------------------------------|--------------------|----------------------------------|--|
|                                 | 2022               | 2021                             |  |
| Restricted stocks for employees | \$74,414           | \$20,452                         |  |

The Company did not modify or cancel any share-based payment plans for the years ended December 31, 2022 and 2021.

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

#### (16) Operating revenue

|   | For the years end | ed December 31, |
|---|-------------------|-----------------|
|   | 2022              | 2021            |
| Assembly and testing processing revenue | \$30,876,006      | \$29,660,396    |
| Revenue from rental of machinery        | 3,692,860         | 2,555,932       |
| Rental income from property             | 30,538            | 25,237          |
| Other operating revenue                 | 2,182,592         | 1,517,824       |
| Total revenue                           | \$36,781,996      | \$33,759,389    |

Relevant information of revenue from contracts with customers for the years ended December 31, 2022 and 2021 are as follows:

#### A. Disaggregation of revenue

|                         |                          | For the years ended December 3 |              |

Note: Please refer to Note 6(18) for information regarding leases.

#### B. Contract balances

(a)Contract assets – current

|                       | December 31, | December 31, | January 1, |
|-----------------------|--------------|--------------|------------|
| Nature of revenue     | 2022         | 2021         | 2021       |
| Rendering of services | \$153,753    | \$178,880    | \$202,972  |

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

Please refer to Note 6(17) for more details on effect of impairment. Relevant information of revenue from contracts with customers for the years ended December 31, 2022 and 2021 are as follows:

|  | For the years ende | For the years ended December 31, |  |
|--|--------------------|----------------------------------|--|
|  | 2022               | 2021                             |  |
| The opening balance transferred to trade |                    |                                  |  |
| receivables                              | \$178,880          | \$202,972                        |  |
| Degree of completion measurement         | \$153,753          | \$178,880                        |  |

#### (b)Contract liabilities - current

|                         | December 31, | December 31, | January 1, |
|-------------------------|--------------|--------------|------------|
| Nature of revenue       | 2022         | 2021         | 2021       |
| Revenue from rental of  |              |              |            |
| machinery               | \$-          | \$-          | \$11,591   |
| Assembly and testing    |              |              |            |
| processing revenue      | 156,639      | 154,167      | 70,512     |
| Other operating revenue |              | 2,857        | 147,500    |
| Total                   | \$156,639    | \$157,024    | \$229,603  |

The difference of the beginning and ending balances is the net effect of the various revenue contracts signed before the opening date and the assumption of the new performance obligations for new contracts signed as of the ending date.

#### (17) Expected credit losses

Operating expenses - expected credit losses

|                   | For the years ended | d December 31, |
|-------------------|---------------------|----------------|
|                   | 2022                | 2021           |
| Contract assets   | \$-                 | \$-            |
| Notes receivable  | -                   | -              |
| Trade receivables | 3,222               | 645            |
| Other receivables | 241                 | -              |
| Total             | \$3,463             | \$645          |

Please refer to Note 12 for more details on credit risk.

The Company measures the loss allowance of its contract assets and receivables (including notes receivable and trade receivables) at an amount equal to lifetime expected credit losses. The assessment of the Company's loss allowance as at December 31, 2022 and 2021 are as follows:

- A. The gross carrying amount of contract assets is NT\$153,753 thousand and NT\$178,880 thousand, respectively. Expected credit loss ratio is estimated to be 0%.
- B. The Company considers the grouping of trade receivables by counterparties' credit ratings, geographical regions and industry sectors. Loss allowance is measured by using a provision matrix. Details are as follows:

|                   | Not yet due |           |             |              |           |             |
|-------------------|-------------|-----------|-------------|--------------|-----------|-------------|
| Group 1           | (Note)      | 1-90 days | 91-180 days | 181-365 days | >366 days | Total       |
| Gross carrying    |             |           |             |              |           |             |

Note: Although the Company wrote off the financial assets during 2022, collection activities are still underway.

#### (18)Leases

#### A. The Company as a lessee

The Company leases land and buildings with lease terms ranging from 4 to 58 years. At the end of the lease terms, the Company does not have the purchase option to acquire the leasehold land and buildings.

The Company leases machinery and equipment for operational use with lease terms of 2 years. The Company has purchase options to acquire leasehold machinery and equipment at the end of the lease terms.

The Company leases transportation equipment for operational use with lease terms of 3 years. The Company has purchase options to acquire leasehold transportation equipment at the end of the lease terms.

The effect that leases have on the financial position, financial performance and cash flows of the Company are as follows:

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

#### a. Amounts recognized in the balance sheet

(a) Right-of-use assets

The carrying amount of right-of-use assets

|                          | December 31, | December 31, |
|--------------------------|--------------|--------------|
|                          | 2022         | 2021         |
| Land                     | \$611,878    | \$554,903    |
| Buildings                | 28,757       | 36,949       |
| Machinery and equipment  | -            | 72,922       |
| Transportation equipment | 10,661       | 13,122       |
| Total                    | \$651,296    | \$677,896    |

During the years ended December 31, 2022 and 2021, the Company's additions to right-of-use assets amounted to NT\$76,557 thousand and NT\$24,275 thousand, respectively.

During the year ended December 31, 2022 and 2021, the Company exercised the purchase option and transfer the right-of-use assets to machinery and equipment amounted to NT\$67,313 thousand and NT\$538,273 thousand, respectively.

(b) Lease liabilities

|                                | December 31, | December 31, |
|--------------------------------|--------------|--------------|
|                                | 2022         | 2021         |
| Lease liabilities- current     | \$29,342     | \$92,050     |
| Lease liabilities- non-current | 465,796      | 492,615      |
| Total                          | \$495,138    | \$584,665    |

Please refer to Note 6 (20)C for the interest on lease liabilities recognized during the years ended December 31, 2022 and 2021, and refer to Note 12 (3) section E Liquidity Risk Management for the maturity analysis for lease liabilities as at December 31, 2022 and 2021.

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

#### b. Amounts recognized in the statement of profit or loss

Depreciation charge for right-of-use assets

|                          | For the years ended | d December 31, |
|--------------------------|---------------------|----------------|
|                          | 2022                | 2021           |
| Land                     | \$22,008            | \$20,853       |
| Buildings                | 9,442               | 6,069          |
| Machinery and equipment  | 5,609               | 103,436        |
| Transportation equipment | 2,460               | 1,640          |
| Total                    | \$39,519            | \$131,998      |

c. Income and costs relating to leasing activities

|  | For the years ended December 31, |           |  |
|--|----------------------------------|-----------|--|
|  | 2022                             | 2021      |  |
| The expenses relating to short-term leases   | \$232,359                        | \$100,462 |  |
| The expenses relating to leases of low-value |                                  |           |  |

| to short-term leases of low-value assets)    | 5,252                            | 4,805     |  |
| Total  | \$237,611                        | \$105,267 |  |
|  |                                  |           |  |

d. Cash outflows relating to leasing activities

During the years ended December 31, 2022 and 2021, the Company's total cash outflows for leases amounted to NT\$338,792 thousand and NT\$427,287 thousand, respectively.

e. Other information relating to leasing activities

#### Extension and termination options

Some of the Company's property rental agreements contain extension and termination options. In determining the lease terms, the non-cancellable period for which the Company has the right to use an underlying asset, together with periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option and periods covered by an option to terminate the lease if the Company is reasonably

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

certain not to exercise that option. These options are used to maximize operational flexibility in terms of managing contracts. The majority of extension and termination options held are exercisable only by the Company.

After the commencement date, the Company reassesses the lease term upon the occurrence of a significant event or a significant change in circumstances that is within the control of the lessee and affects whether the Company is reasonably certain to exercise an option not previously included in its determination of the lease term, or not to exercise an option previously included in its determination of the lease term.

B. The Company as a lessor

The Company entered into commercial property leases with remaining terms between one to two years. All leases include a clause to enable upward revision of the rental charge on an annual basis according to prevailing market conditions.

| Amortization               | \$15,438                         | \$27,878    | \$43,316    | \$19,775    | \$29,818    | \$49,593    |

In accordance with the Articles of Incorporation, no higher than 1% of the profit of the current year is distributable as remuneration to directors (including independent directors). However, the Company's accumulated losses shall have been covered (if any). The Company may, by a resolution adopted by a majority vote at a meeting of Board of Directors attended by two-thirds of the total number of directors, have the profit distributable as employees' compensation in the form of shares or in cash; and in addition thereto a report of such distribution is submitted to the shareholders' meeting. In addition, according to the Company's Articles of Incorporation, the remuneration paid to directors (including independent directors) is determined based on the Company's overall operating performance with consideration of the contribution of each director to the Company and reference to industry norm. The remuneration proposal shall be approved by more than half members of the Compensation Committee and submitted to the Board of Directors for further approval.

According to the Company's Articles of Incorporation and the Company Law, the remuneration of the Company's executives is determined based on the positions of the executives, contribution to the Company's operations, individual performance, and consideration of the Company's future risk and reference to the industry norm. The

remuneration is to be reviewed by the Compensation Committee for its plausibility and submitted to the Board of Directors for resolution.

The employee's compensation policy of the Company takes into account various factors such as individual's salary, rank, and performance evaluation, the industry norm and the Company's operating results, etc.

In accordance with the Articles of Incorporation, 8% to 10% of profit of the current year is distributable as employees' compensation and no higher than 1% of profit of the current year is distributable as remuneration to directors. However, KYEC's accumulated losses shall have been covered (if any). KYEC may, by a resolution adopted by a majority vote at a meeting of Board of Directors attended by two-thirds of the total number of directors, have the profit distributable as employees' compensation in the form of shares or in cash; and in addition thereto a report of such distribution is submitted to the shareholders' meeting. Information on the Board of Directors' resolution regarding the employees' compensation and remuneration to directors can be obtained from the "Market Observation Post System" on the website of the TWSE.

Based on profit of current period, KYEC estimated the amounts of the employees' compensation and remuneration to directors for the year ended December 31, 2022 to be 8% of profit of current period (or NT\$746,296 thousand) and 0.8% of profit of current period (or NT\$74,630 thousand), respectively, which were recognized as salary expense. If the Board of Directors resolved to distribute employees' compensation in the form of stocks, then the number of stocks distributed is calculated based on the closing price one day prior to the date of resolution. If the estimated amounts differ from the actual distribution resolved by the Board of Directors, the difference will be recognized in the profit or loss in the subsequent year. A resolution was passed at a Board of Directors meeting held on March 2, 2023 to distribute NT\$746,296 thousand and NT\$74,630 thousand in cash as employees' compensation and remuneration to directors, respectively, which were consistent with the estimated amounts recognized for the year ended December 31, 2022.

Actual distribution of employees' compensation and remuneration to directors of 2021 amounted to NT\$569,336 thousand and NT\$56,934 thousand, respectively. No material differences exist between the estimated amount and the actual distribution of the employee compensation and remuneration to directors for the year ended 31 December 2021.

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

### (22) Income tax

The major components of income tax expense are as follows:

#### Income tax expense recognized in profit or loss

|   | For the years ended December 31, |             |  |
|---|----------------------------------|-------------|--|
|   | 2022                             | 2021        |  |
| Current income tax expense:                       |                                  |             |  |
| Current income tax charge                         | \$1,737,022                      | \$1,224,207 |  |
| Adjustments in respect of current income tax of   |                                  |             |  |
| prior periods                                     | (39,120)                         | (17,093)    |  |
| Deferred tax expense (income):                    |                                  |             |  |
| Deferred tax expense (income) relating to         |                                  |             |  |
| origination and reversal of temporary differences | 286,034                          | 413,891     |  |
| Income tax expense recognized in profit or loss   | \$1,983,936                      | \$1,621,005 |  |

Income tax relating to components of other comprehensive income

|   | For the years ended December 31, |           |  |
|---|----------------------------------|-----------|--|
|   | 2022                             | 2021      |  |
| Deferred tax expense (income):                      |                                  |           |  |
| Unrealized gains (losses) from equity instrument    |                                  |           |  |
| investments measured at fair value through other    |                                  |           |  |
| comprehensive income                                | \$(369,890)                      | \$419,982 |  |
| Exchange differences resulting from translating the |                                  |           |  |
| financial statements of foreign operations          | 26,487                           | (8,448)   |  |
| Income tax relating to components of other          |                                  |           |  |
| comprehensive income                                | \$(343,403)                      | \$411,534 |  |

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

Reconciliation between tax expense and the product of accounting profit multiplied by applicable tax rates is as follows:

|  | For the years ended December 31, |             |  |
|--|----------------------------------|-------------|--|
|  | 2022                             | 2021        |  |
| Accounting profit before tax from continuing           |                                  |             |  |
| operations   | \$8,966,026                      | \$6,855,247 |  |

#### (23) Earnings per share

Basic earnings per share is calculated by dividing net profit for the year attributable to ordinary equity owners of the Company by the weighted average number of ordinary shares outstanding during the year.

Diluted earnings per share is calculated by dividing the net profit attributable to ordinary equity owners of the Company by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares.

#### B. Significant transactions with related parties

#### (a) Operating income

|                              | For the years ended December 31, |             |
|------------------------------|----------------------------------|-------------|
|                              | 2022                             | 2021        |
| MediaTek Inc.                | \$4,454,468                      | \$5,044,632 |
| MediaTek Singapore Pte. Ltd. | 3,234,155                        | 3,098,723   |
| Other related parties        | 743,442                          | 737,953     |
| Associates                   | 9,728                            | 5,626       |
| Total                        | \$8,441,793                      | \$8,886,934 |

Tading price with related parties was determined through mutual agreement based on the market demands. The trade credit terms with related parties were 45 to 90 days, while the terms with non-related parties were 30 to 120 days. The outstanding balance due from related parties as of December 31, 2022 and 2021 was unsecured, non-interest bearing and must be settled in cash. The receivables from the related parties were not guaranteed.

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

- (b) The Company purchased inventories from associates. For the years ended December 31, 2022 and 2021, the purchase amounts were NT\$103,888 thousand and NT\$164,287 thousand, respectively. The purchase price was based on the market demands. The payment terms with related parties were 30 days, while the terms with non-related parties were 30 to 120 days.
- (c) The Company appointed an associate to perform machinery repairs. For the years ended December 31, 2022 and 2021, the operating costs recognized amounted to NT\$357,188 thousand and NT\$313,541 thousand, respectively.
- (d) The Company paid rental expenses for renting machines from associates. For the years ended December 2022 and 2021, the rental expenses amounted to NT\$606 thousand and NT\$11,079 thousand, respectively. The rental price was based on the similar machine's rental price in the market. The payment terms with related parties were 30 to 90 days, while terms with non-related parties were 0 to 30 days.
- (e) Significant property transactions with related parties:
  - i. Disposal of property, plant and equipment

|               | For the year ended |               | For the year ended |               |
|---------------|--------------------|---------------|--------------------|---------------|
|               | December 31, 2022  |               | Decembe            | er 31, 2021   |
| Related party | Sales price        | Disposal gain | Sales price        | Disposal gain |
| Associates    | \$59,916           | \$18,075      | \$14,969           | \$4,613       |

The Company deferred the disposal gain derived from sales of property, plant and equipment to related parties, and then recognized such gain over depreciable lives of the disposed assets.

ii. Acquisition of property, plant and equipment

|                       | For the year ended | For the year ended |
|-----------------------|--------------------|--------------------|
|                       | December 31, 2022  | December 31, 2021  |
| Related party         | Purchase price     | Purchase price     |
| Associates            | \$194,382          | \$190,112          |
| Other related parties | 3,738              | 5,508              |
| Total                 | \$198,120          | \$195,620          |

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

The purchase price was determined through mutual agreement based on the market demand.

| Building and facility              | 1,118,526       | 2,053,506    | Long-term borrowings   |
| Machinery and equipment            | 4,794,325       | 8,004,788    | Long-term borrowings   |
| Right-of-use assets                |                 | 62,790       | Long-term borrowings   |
| Total                              | \$6,973,911     | \$11,141,653 | =                      |

#### 9. Significant Contingent Liabilities and Unrecognized Commitments

As of December 31, 2022, the following contingencies and material commitments were not included in the Company's consolidated financial statements:

- A. The Company's issued and outstanding letters of credit totaled approximately NT\$172,296 thousand.
- B. To construct the plant and factory premises, the Company had entered into several construction contracts in an aggregate amount of NT\$2,018,303 thousand with NT\$1,480,591 thousand already paid and NT\$537,712 thousand remaining unpaid (promissory notes have been issued).

- C. The promissory notes issued for secured bank loans amounted to NT\$38,226,975 thousand.
- D. The Company entered into loan agreements with Yuanta Commercial Bank, the following financial covenants shall be maintained on semi-annual and annual basis during the period from 2021 to 2025:
  - (a) Current ratio not less than 100%;
  - (b) Debt ratio not more than 150%;
  - (c) Interest coverage ratio no less than 300%.

The Company entered into a loan agreement with Far Eastern Int'l Bank, the following financial covenants shall be maintained on semi-annual and annual basis during the period from 2022 to 2025:

- (a) Current ratio not less than 100%;
- (b) Debt ratio not more than 150%;
- (c) Interest coverage ratio no less than 300%.

The Company entered into a loan agreement with JihSun International Commercial Bank, the following financial covenants shall be maintained on semi-annual and annual basis during the period from 2021 to 2024:

- (a) Current ratio not less than 100%;
- (b) Debt ratio not more than 150%;
- (c) Interest coverage ratio no less than 300%.

The Company entered into a syndicated loan agreement with 13 banks, led by Mega International Commercial Bank of Taiwan, and the Company shall maintain the following financial covenants on semi-annual and annual basis during the period from 2020 to 2025:

- (a) Current ratio not less than 100%;
- (b) Debt ratio not more than 150%;
- (c) Interest coverage ratio not less than 300%.

In the case of failure to adhere to the aforementioned financial covenants during the period from 2020 to 2025, Mega International Commercial Bank of Taiwan may assemble a meeting among the banks to govern the matter to decide on a course of action or request for each bank's written approval for such course of action, when necessary.

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

The subsidiary of King Long Technology (Suzhou) Ltd. entered into a loan agreement with China Construction Bank, the following financial covenants shall be maintained during the loan period:

- (a) Current ratio not less than 100%;
- (b) Debt ratio not more than 65%;

As of December 31, 2022, the Company did not violate any financial covenants.

- Note: Includes cash and cash equivalents, notes receivable, trade receivables (including related parties), other receivables (including related parties), other financial assets and refundable deposits.
- (2) Financial risk management objectives

The objective of the Company's financial risk management is mainly to manage the market risk, credit risk and liquidity risk derived from its operating activities. The Company identified, measured and managed the aforementioned risks based on the Company's policy and risk tendency.

The Company has established appropriate policies, procedures and internal controls for financial risk management. The plans for material treasury activities are reviewed by Board of Directors and Audit committee in accordance with relevant regulations and internal controls. The Company complies with its financial risk management policies at all times.

(3) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of the changes in market prices. Market prices comprise foreign currency risk, interest rate risk and other price risk (such as equity risk).

In practice, it is rarely the case that a single risk variable will change independently from other risk variables, there are usually interdependencies between risk variables. However, the sensitivity analysis disclosed below does not take into account the interdependencies between risk variables.

#### A. Foreign currency risk

The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense are denominated in a different currency from the Company's functional currency) and the Company's net investments in foreign operations.

Some receivables and payables are denominated in the same foreign currency, and it will result in economic hedging effect. Further, net investments in foreign operations are primarily for strategic purposes, and they are not hedged by the Company.

The Company's sensitivity analysis to foreign currency risk mainly focuses on foreign currency monetary items at the end of the reporting period. The Company's foreign currency risk is mainly from the volatility in the exchange rates of US\$ and CNY. The sensitivity analysis is as follows:

When NT\$ appreciates or depreciates against US\$ by 1%, the profit for the years ended December 31, 2022 and 2021 would have increased/decreased by NT\$13,617 thousand and NT\$24,631 thousand, respectively.

When NT\$ appreciates or depreciates against CNY by 1%, the profit for the years ended December 31, 2022 and 2021 would have increased/decreased by NT\$19,040 thousand and decreased/increased by NT\$1,843 thousand, respectively.

#### B. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's loans and receivables at variable interest rates, bank borrowings with fixed interest rates and variable interest rates.

The Company manages its risk by having a balanced portfolio of financial instruments with fixed and floating interest rates. The Company did not apply hedging accounting since such hedging activities did not qualify for criteria of hedge accounting.

The Company's sensitivity analysis to interest rate risk mainly focuses on items exposed to interest rate risk at the end of the reporting period, including investments with floating

interest rates and bank borrowings with floating rates. Assuming investments and bank borrowings had been outstanding for the entire period and all other variables were constant, a hypothetical increase/decrease of 10 basis points of interest rate in a reporting period would have resulted in a decrease/increase in profit by NT\$26,317 thousand and NT\$26,138 thousand for the years ended December 31, 2022 and 2021, respectively.

#### C. Equity price risk

The Company's equity investments, including listed and unlisted equity securities, are exposed to market price risk arising from uncertainties of future values of equity securities. The Company's investments in listed and unlisted equity securities are classified under financial assets at fair value through other comprehensive income. The Company manages the equity price risk through diversification and placing limits on individual and total equity investments. Reports on the equity portfolio are submitted to the Company's senior management on a regular basis. The Company's Board of Directors reviews and approves certain significant equity investments according to level of authority.

At the reporting date ended December 31, 2022 and 2021, a change of 20% in the price of the listed equity securities classified under equity instrument investments measured at fair value through other comprehensive income would have impact of NT\$7,872 thousand and NT\$8,606 thousand on the equity attributable to the Company.

Please refer to Note 12(3) section H for sensitivity analysis information of other equity instruments or derivatives that are linked to such equity instruments whose fair value measurement is categorized under Level 3.

#### D. Credit risk management

Credit risk is the risk that counterparty will not meet its obligations under a contract, leading to a financial loss. The Company is exposed to credit risk from operating activities (primarily for contract assets, trade receivables and notes receivable) and from its financing activities (including bank deposits and other financial instruments).

Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and controls relating to customer credit risk management. Credit limits are established for all customers based on their financial position, rating from credit rating agencies, historical experience, prevailing economic condition and the

Company's internal rating criteria, etc. Certain customer's credit risk will also be managed by taking credit enhancing procedures, such as requesting for prepayment and insurance.

As of December 31, 2022 and 2021, receivables from top ten customers represented 49% and 48% of the total trade receivables of the Company, respectively. The credit concentration risk of other accounts receivable was insignificant.

The Company manages its exposure to credit risk arising from bank deposits, fixed income securities and other financial instruments in accordance with established group policies. Since the counter-parties are selected reputable financial institutions and companies, the Company believes its exposure to credit risk is not significant.

#### E. Liquidity risk management

The Company maintained financial flexibility through the holding of cash and cash equivalents, investments in securities with high liquidity, and facilities of bank borrowings. The table below summarizes the maturity profile of the Company's financial liabilities based on the contractual undiscounted payments and contractual maturity, and the payment amount also includes the contractual interest. The undiscounted payment relating to borrowings with variable interest rates is extrapolated based on the estimated interest rate yield curve as of the end of the reporting period.

#### G. Fair values of financial instruments

a. The methods and assumptions applied in determining the fair value of financial instruments:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following methods and assumptions were used by the Company to measure or disclose the fair values of financial assets and financial liabilities:

- (a) The carrying amount of cash and cash equivalents, accounts receivable, accounts payable and other payables approximate their fair value due to their short maturities.
- (b) For financial assets and liabilities traded in an active market with standard terms and conditions, their fair value is determined based on market quotation price at the reporting date.
- (c) Fair value of equity instruments without market quotations (including private placement of listed equity securities, unquoted public company and private company equity securities) are estimated using the market method valuation techniques based on parameters such as prices based on market transactions of equity instruments of identical or comparable entities and other relevant information (for example, inputs such as discount for lack of marketability, P/E ratio of similar entities and Price-Book ratio of similar entities).
- (d) Fair value of debt instruments without market quotations, bank loans and other noncurrent liabilities are determined based on the counterparty prices or valuation method. The valuation method uses DCF method as a basis, and the assumptions such as the interest rate and discount rate are primarily based on relevant information of similar instruments.
- b. Fair value of financial instruments measured at amortized cost

The carrying amounts of the Company's financial assets and financial liabilities measured at amortized cost approximate their fair value.

# English Translation of Financial Statements Originally Issued in Chinese KING YUAN ELECTRONICS CO., LTD. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

c. Fair value measurement hierarchy for financial instruments
 Please refer to Note 12(3) section H for fair value measurement hierarchy for financial instruments of the Company.

#### H. Fair value measurement hierarchy

a. Fair value measurement hierarchy

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, based on the lowest level input that is significant to the fair value measurement as a whole. Level 1, 2 and 3 inputs are described as follows:

- Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2: Input other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly or indirectly.
- Level 3: Unobservable inputs for the assets or liabilities.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization at the end of each reporting period.

b. Fair value measurement hierarchy of the Company's assets and liabilities

The Company does not have assets measured at fair value on a non-recurring basis; the following table presents the fair value measurement hierarchy of the Company's assets and liabilities on a recurring basis:

# Valuation process used for fair value measurements categorized within Level 3 of the fair value hierarchy

The Company's Finance Department is responsible for validating the fair value measurements and ensuring that the results of the valuation are in line with market conditions, based on independent and reliable inputs which are consistent with other information, and represent exercisable prices. The Department analyses the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Company's accounting policies at each reporting date.

#### I. Significant assets and liabilities denominated in foreign currencies

thousand for the years ended December 31, 2022 and 2021, respectively.

Functional currencies of entities of the Company are varied. Accordingly, the Company is not able to disclose the information of exchange gains and losses of monetary financial assets and liabilities by each significant assets and liabilities denominated in foreign currencies. The foreign exchange gains were NT\$(124,253) thousand and NT\$134,139

#### J. Capital management

The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value. The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions. To maintain or adjust the capital structure, the Company may adjust dividend payment to shareholders, return capital to shareholders or issue new shares.

#### K. The impact of the COVID-19 pandemic on the Company

Near the end of May 2021, a foreign migrant worker cluster infection occurred at the Company's premises. The Company, following the guidence from Central Epidemic Command Center, decisively adopted series of measures to contain the infection. The measures included quarantine of infected workers, 48 hours production suspension and load reduction, etc. It is estimated that this cluster infection reduced approximately 30% of the Company's monthly sales in June 2021. Other than this one-time impact, COVID-19 dose not have any significant impact on the Company's going concern basis, funding ability and operations. No similar incident occurred in 2022.

#### 13. Additional Disclosures

- The following are additional disclosures for the Company and its affiliates as required by the R.O.C. Securities and Futures Bureau for the year ended December 31, 2022:
  - A. Financing provided to others: None.
  - B. Endorsement/Guarantee provided to others: Please refer to Attachment 1.
  - C. Securities held as of December 31, 2022: Please refer to Attachment 2.

#### English Translation of a Report Originally Issued in Chinese

#### **Independent Auditors' Report**

To the Board of Directors and Shareholders of King Yuan Electronics Co., Ltd.

#### **Opinion**

We have audited the accompany parent company only balance sheets of King Yuan Electronics Co., Ltd. as of December 31, 2022 and 2021, and the related parent company only statements of comprehensive income, changes in equity and cash flows for the years ended December 31, 2022 and 2021, and notes to the parent company only financial statements, including the summary of significant accounting policies (together "the financial statements").

In our opinion, the parent company only financial statements referred to above present fairly, in all material respects, the financial position of King Yuan Electronics Co., Ltd. as of December 31, 2022 and 2021, and its financial performance and cash flows for the years ended December 31, 2022 and 2021, in conformity with the requirements of the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

#### **Basis for Opinion**

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and the Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of King Yuan Electronics Co., Ltd. in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China (the "Norm"), and we have fulfilled our other ethical responsibilities in accordance with the Norm. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of 2022 parent company only financial statements. These matters were addressed in the context of our audit of the parent company only financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

#### Revenue recognition

King Yuan Electronics Co., Ltd. recognized NT\$27,619,107 thousand as net sales. Its main activities are providing testing and assembly services that represented 82.7%, or NT\$22,834,524 thousand in the amount, of the net operating revenue.

Since the primary activities of King Yuan Electronics Co., Ltd. are providing testing and assembly services, and the services comprise various wafers/integrated circuits testing and assembly processing and rental of machinery, timing of revenue recognition may vary due to varied nature of revenue that increases the complexity of the revenue recognition. Therefore, we determined the matter to be a key audit matter.

Our audit procedures include (but are not limited to) assessing the appropriateness of the accounting policy for revenue recognition; evaluating and testing the effectiveness of internal control relating to the timing of revenue recognition, analyzing the reasonableness of gross margin by products, performing cutoff testing for a period before and after the balance sheet date on a sampling basis, performing test of details on selected samples, reviewing the significant terms of sales agreements and examining relevant delivery documents, and reviewing the selected samples of the quantity, specification, period and relevant documents of machinery services.

We also considered the appropriateness of the disclosures of sales. Please refer to Note 4 and Note 6 in notes to the financial statements.

#### Responsibilities of Management and Those Charged with Governance for the Parent Company Only Financial Statements

Management is responsible for the preparation and fair presentation of the parent company only financial statements in accordance with the requirements of the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Financial Reporting Standards, International Accounting Standards, Interpretations developed by the International Financial Reporting Interpretations Committee or the former Standing Interpretations Committee as endorsed by Financial Supervisory Commission of the Republic of China and for such internal control as management determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company only financial statements, management is responsible for assessing the ability to continue as a going concern of King Yuan Electronics Co., Ltd. disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate King Yuan Electronics Co., Ltd. or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including audit committee, are responsible for overseeing the financial reporting process of King Yuan Electronics Co., Ltd.

# Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- 1. Identify and assess the risks of material misstatement of the parent company only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control of King Yuan Electronics Co., Ltd.

- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability to continue as a going concern of King Yuan Electronics Co., Ltd. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause King Yuan Electronics Co., Ltd. to cease to continue as a going concern.
- 5. Evaluate the overall presentation, structure and content of the parent company only financial statements, including the accompanying notes, and whether the parent company only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient appropriate audit evidence regarding the parent company only financial information of the entities or business activities within King Yuan Electronics Co., Ltd. to express an opinion on the financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of 2022 parent company only financial statements and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The accompanying notes are an integral part of the parent company only financial statements.

#### 1. Organization and Operation

King Yuan Electronics Co., Ltd. ("the Company" or "KYEC") was incorporated under the Company Law of the Republic of China ("R.O.C) on May 28, 1987 and commenced operations on July 23, 1987. The Company primarily engages in the business of design, manufacturing, selling, testing and assembly service of integrated circuits, and also engages in manufacturing and selling of IC Monitoring Burn-In machinery and related components. On May 9, 2001, the shares of KYEC were listed on the Taiwan Stock Exchange. The Company's registered office and the main business location is at No. 81, Sec. 2, Gongdaowu Road, Hsinchu City 300, Republic of China (R.O.C.).

#### 2. Date and Procedures of Authorization of Financial Statements for Issue

The parent company only financial statements of the Company were approved and authorized for issue by the Board of Directors on March 2, 2023.

#### 3. Newly Issued or Revised Standards and Interpretations

(1) Change in accounting policies resulting from applying for the first time certain standards and amendments

The Company applied for the first time International Financial Reporting Standards, International Accounting Standards, and Interpretations issued, revised or amended which are recognized by Financial Supervisory Commission ("FSC") and become effective for annual periods beginning on or after January 1, 2022. The application of these new standards and amendments had no material effect on the Company.

(2) Standards or interpretations issued, revised or amended, by International Accounting Standards Board ("IASB") which are endorsed by FSC, and not yet adopted by the Company as at the end of the reporting period are listed below:

# English Translation of Financial Statements Originally Issued in Chinese KING YUAN ELECTRONICS CO., LTD.

#### NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

|       |   | Effective Date  |
|-------|---|-----------------|
| Items | New, Revised or Amended Standards and Interpretations         | Issued by IASB  |
| А     | Disclosure Initiative - Accounting Policies - Amendments to   | January 1, 2023 |
|       | IAS 1   |                 |
| В     | Definition of Accounting Estimates – Amendments to IAS 8      | January 1, 2023 |
| C     | Deferred Tax related to Assets and Liabilities arising from a | January 1, 2023 |
|       | Single Transaction – Amendments to IAS 12                     |                 |

(A) Disclosure Initiative - Accounting Policies - Amendments to IAS 1

The amendments improve accounting policy disclosures that to provide more useful information to investors and other primary users of the financial statements.

(B) Definition of Accounting Estimates – Amendments to IAS 8

The amendments introduce the definition of accounting estimates and include other amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors to help companies distinguish changes in accounting estimates from changes in accounting policies.

(C) Deferred Tax related to Assets and Liabilities arising from a Single Transaction – Amendments to IAS 12

The amendments narrow the scope of the recognition exemption in paragraphs 15 and 24 of IAS 12 so that it no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences.

The abovementioned standards and interpretations were issued by IASB and endorsed by FSC so that they are applicable for annual periods beginning on or after January 1, 2023 and have no material impact on the Company.

(3) Standards or interpretations issued, revised or amended, by IASB but not yet endorsed by FSC and not yet adopted by the Company as at the end of the reporting period are listed below:

|       | IAS 1  |                  |

A. IFRS 10 "Consolidated Financial Statements" and IAS 28 "Investments in Associates and Joint Ventures" — Sale or Contribution of Assets between an Investor and its Associate or Joint Ventures

The amendments address the inconsistency between the requirements in IFRS 10 "Consolidated Financial Statements" and IAS 28 "Investments in Associates and Joint Ventures", in dealing with the loss of control of a subsidiary that is contributed to an associate or a joint venture. IAS 28 restricts gains and losses arising from contributions of non-monetary assets to an associate or a joint venture to the extent of the interest attributable to the other equity holders in the associate or joint venture. IFRS 10 requires full profit or loss recognition on the loss of control of a subsidiary. IAS 28 was amended so that the gain or loss resulting from the sale or contribution of assets that constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized in full.

IFRS 10 was also amended so that the gain or loss resulting from the sale or contribution of a subsidiary that does not constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized only to the extent of the unrelated investors' interests in the associate or joint venture.

#### B. IFRS 17 "Insurance Contracts"

IFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects (including recognition, measurement, presentation and disclosure requirements). The core of IFRS 17 is the General (building block) Model, under this model, on initial recognition, an entity shall measure a group of insurance contracts at the total of the fulfilment cash flows and the contractual service margin. The carrying amount of a group of insurance contracts at the end of each reporting period shall be the sum of the liability for remaining coverage and the liability for incurred claims.

Other than the General Model, the standard also provides a specific adaptation for contracts with direct participation features (the Variable Fee Approach) and a simplified approach (Premium Allocation Approach) mainly for short-duration contracts.

IFRS 17 was issued in May 2017 and it was amended in 2020 and 2021. The amendments include deferral of the date of initial application of IFRS 17 by two years to annual beginning on or after January 1, 2023 (from the original effective date of January 1, 2021); provide additional transition reliefs; simplify some requirements to reduce the costs of applying IFRS 17 and revise some requirements to make the results easier to explain. IFRS 17 replaces an interim Standard – IFRS 4 Insurance Contracts – from annual reporting periods beginning on or after January 1, 2023.

C. Classification of Liabilities as Current or Non-current – Amendments to IAS 1

These are the amendments to paragraphs 69-76 of IAS 1 Presentation of Financial statements and the amended paragraphs related to the classification of liabilities as current or non-current.

D. Lease Liability in a Sale and Leaseback - Amendments to IFRS 16

The amendments add seller-lessees additional requirements for the sale and leaseback transactions in IFRS 16, thereby supporting the consistent application of the standard.

E. Non-current Liabilities with Covenants – Amendments to IAS 1

The amendments improved the information companies provide about long-term debt with covenants. The amendments specify that covenants to be complied within twelve months after the reporting period do not affect the classification of debt as current or non-current at the end of the reporting period.

The abovementioned standards and interpretations issued by IASB have not yet been endorsed by FSC at the date when the Company's financial statements were authorized for issue, the local effective dates are to be determined by FSC. The new or amended standards and interpretations have no material impact on the Company.

#### 4. Summary of Significant Accounting Policies

#### Statement of Compliance

The parent company only financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers ("the Regulations").

#### Basis of Preparation

The Company prepares the parent company only financial statements in accordance with the Regulations. According to article 21 of the Regulations, the profit or loss and other comprehensive income presented in the parent company only financial statements will be the same as the allocations of profit or loss and of other comprehensive income attributable to owners of the parent presented in the financial statements prepared on a consolidated basis, and the owners' equity presented in the parent company only financial statements will be the same as the equity attributable to owners of the parent presented in the financial statements prepared on a consolidated basis. Therefore, the investments in subsidiaries will be disclosed under "Investments accounted for using the equity method" in the parent company only financial report and change in value will be adjusted.

The parent company only financial statements have been prepared on a historical cost basis, except for financial instruments that have been measured at fair value. The parent company only financial statements are expressed in thousands of New Taiwan Dollars ("NT\$") unless otherwise stated.

#### Foreign currency transactions

The parent company only financial statements are presented in NT\$, which is also the Company' functional currency.

Transactions in foreign currencies are initially recorded by the Company's functional currency rates prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency closing rate of exchange ruling at the reporting date. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. Non-monetary items that are measured at historical cost in a foreign currency are translated using the exchange rates as at the date of the initial transactions.

All exchange differences arising on the settlement of monetary items or on translating monetary items are taken to profit or loss in the period in which they arise except for the following:

- A. exchange differences arising from foreign currency borrowings for an acquisition of a qualifying asset to the extent that they are regarded as an adjustment to interest costs are included in the borrowing costs that are eligible for capitalization.
- B. foreign currency items within the scope of IFRS 9 "Financial Instruments" are accounted for based on the accounting policy for financial instruments.
- C. exchange differences arising on a monetary item that forms part of a reporting entity's net investment in a foreign operation is recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal of the net investment.

When a gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange component of that gain or loss is recognized in other comprehensive income. When a gain or loss on a non-monetary item is recognized in profit or loss, any exchange component of that gain or loss is recognized in profit or loss.

#### Translation of financial statements in foreign currency

Each foreign operation of the Company determines its functional currency upon its primary economic environment and items included in the financial statements of each operation are

measured using that functional currency. The assets and liabilities of foreign operations are translated into NT\$ at the closing rate of exchange prevailing at the reporting date and their income and expenses are translated at an average rate for the period. The exchange differences arising on the translation are recognized in other comprehensive income. On the disposal of a foreign operation, the cumulative amount of the exchange differences relating to that foreign operation, recognized in other comprehensive income and accumulated in the separate component of equity, is reclassified from equity to profit or loss when the gain or loss on disposal is recognized. The following partial disposals are accounted for as disposals:

- A. when the partial disposal involves the loss of control of a subsidiary that includes a foreign operation; and
- B. when the retained interest after the partial disposal of an interest in a joint arrangement or a partial disposal of an interest in an associate that includes a foreign operation is a financial asset that includes a foreign operation.

On the partial disposal of a subsidiary that includes a foreign operation that does not result in a loss of control, the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is adjustment in "investments accounted for using the equity method". In partial disposal of an associate or jointly controlled entity that includes a foreign operation that does not result in a loss of significant influence or joint control, only the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is reclassified to profit or loss.

Any goodwill and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and expressed in its functional currency.

#### Current and non-current distinction

An asset is classified as current when:

- A. the Company expects to realize the asset, or intends to sell or consume it, in its normal operating cycle;
- B. the Company holds the asset primarily for the purpose of trading;
- C. the Company expects to realize the asset within twelve months after the reporting period; or

D. the asset is cash or cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is classified as current when:

- A. the Company expects to settle the liability in its normal operating cycle;
- B. the Company holds the liability primarily for the purpose of trading;
- C. the liability is due to be settled within twelve months after the reporting period; or
- D. the Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities are classified as non-current.

#### Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short-term, highly liquid time deposits (including ones that have maturity within twelve months) or investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

#### Financial instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities within the scope of IFRS 9 "Financial Instruments" are recognized initially at fair value plus or minus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs.

#### A. Financial instruments: Recognition and Measurement

The Company accounts for regular way purchase or sales of financial assets on the trade date.

## English Translation of Financial Statements Originally Issued in Chinese KING YUAN ELECTRONICS CO., LTD. NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

The Company classifies financial assets as subsequently measured at amortized cost, fair value through other comprehensive income or fair value through profit or loss considering both factors below:

- a. the Company's business model for managing the financial assets and
- b. the contractual cash flow characteristics of the financial asset.

## Financial assets measured at amortized cost

A financial asset is measured at amortized cost if both of the following conditions are met and presented as note receivables, trade receivables, financial assets measured at amortized cost and other receivables, etc., on balance sheet as at the reporting date:

- a. the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- b. the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Such financial assets are subsequently measured at amortized cost (the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initial amount and the maturity amount and adjusted for any loss allowance) and is not part of a hedging relationship. A gain or loss is recognized in profit or loss when the financial asset is derecognized, through the amortization process or in order to recognize the impairment gains or losses.

Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:

- a. purchased or originated credit-impaired financial assets. For those financial assets, the Company applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
- b. financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Company applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

#### Financial assets measured at fair value through other comprehensive income

A financial asset is measured at fair value through other comprehensive income if both of the following conditions are met:

- a. the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and
- b. the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Recognition of gain or loss on a financial asset measured at fair value through other comprehensive income is described as below:

- a. A gain or loss on a financial asset measured at fair value through other comprehensive income is recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains and losses, until the financial asset is derecognized or reclassified.
- b. When the financial asset is derecognized the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment.
- c. Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:
  - (a) purchased or originated credit-impaired financial assets. For those financial assets, the Company applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
  - (b) financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Company applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

Besides, for certain equity investments within the scope of IFRS 9 that is neither held for trading nor contingent consideration recognized by an acquirer in a business combination to which IFRS 3 applies, the Company made an irrevocable election to present the changes of the fair value in other comprehensive income at initial recognition. Amounts presented in other

comprehensive income shall not be subsequently transferred to profit or loss (when disposal of such equity instrument, its cumulated amount included in other components of equity is transferred directly to the retained earnings) and these investments should be presented as financial assets measured at fair value through other comprehensive income on the balance sheet. Dividends on such investments are recognized in profit or loss unless the dividends clearly represent a recovery of part of the cost of investment.

## Financial assets measured at fair value through profit or loss

Financial assets are classified as measured at amortized cost or measured at fair value through other comprehensive income based on aforementioned criteria. All other financial assets are measured at fair value through profit or loss and presented on the balance sheet as financial assets measured at fair value through profit or loss.

Such financial assets are measured at fair value, the gains or losses resulting from remeasurement is recognized in profit or loss which includes any dividend or interest received on such financial assets.

B. Impairment of financial assets

The Company recognizes a loss allowance for expected credit losses on debt instrument investments measured at fair value through other comprehensive income and financial assets measured at amortized cost. The loss allowance on debt instrument investments measured at fair value through other comprehensive income is recognized in other comprehensive income and does not reduce the carrying amount in the statement of financial position.

The Company measures expected credit losses of a financial instrument in a way that reflects:

- a. an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- b. the time value of money; and
- c. reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The loss allowance is measured as follows:

- a. at an amount equal to 12-month expected credit losses: the credit risk on a financial asset has not increased significantly since initial recognition or the financial asset is determined to have low credit risk at the reporting date. In addition, the Company measures the loss allowance at an amount equal to lifetime expected credit losses in the previous reporting period, but determines at the current reporting date that the credit risk on a financial asset has increased significantly since initial recognition is no longer met.
- b. at an amount equal to the lifetime expected credit losses: the credit risk on a financial asset has increased significantly since initial recognition or financial asset that is purchased or originated credit-impaired financial asset.
- c. for trade receivables or contract assets arising from transactions within the scope of IFRS 15, the Company measures the loss allowance at an amount equal to lifetime expected credit losses.
- d. For lease receivables arising from transactions within the scope of IFRS 16, the Company measures the loss allowance at an amount equal to lifetime expected credit losses.

At each reporting date, the Company needs to assess whether the credit risk on a financial asset has increased significantly since initial recognition by comparing the risk of a default occurring at the reporting date and the risk of default occurring at initial recognition. Please refer to Note 12 for further details on credit risk.

C. Derecognition of financial assets

A financial asset is derecognized when:

- a. the rights to receive cash flows from the asset have expired.
- b. the Company has transferred the asset and substantially all the risks and rewards of the asset have been transferred.
- c. the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the consideration received or receivable including any cumulative gain or loss that had been recognized in other comprehensive income, is recognized in profit or loss.

## D. Financial liabilities and equity

## Classification between liabilities or equity

The Company classifies the instrument issued as a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definitions of a financial liability, and an equity instrument.

#### Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. The transaction costs of an equity transaction are accounted for as a deduction from equity to the extent they are incremental costs directly attributable to the equity transaction that otherwise would have been avoided.

## Compound instruments

The Company evaluates the terms of the convertible bonds issued to determine whether it contains both a liability and an equity component. Furthermore, the Company assesses if the economic characteristics and risks of the put and call options contained in the convertible bonds are closely related to the economic characteristics and risk of the host contract before separating the equity element.

For the liability component excluding the derivatives, its fair value is determined based on the rate of interest applied at that time by the market to instruments of comparable credit status. The liability component is classified as a financial liability measured at amortized cost before the instrument is converted or settled.

For the embedded derivative that is not closely related to the host contract (for example, if the exercise price of the embedded call or put option is not approximately equal on each exercise date to the amortized cost of the host debt instrument), it is classified as a liability component and subsequently measured at fair value through profit or loss unless it qualifies for an equity component. The equity component is assigned the residual amount after deducting from the fair value of the instrument as a whole the amount separately determined for the liability component. Its carrying amount is not remeasured in the subsequent accounting periods. If the

convertible bond issued does not have an equity component, it is accounted for as a hybrid instrument in accordance with the requirements under IFRS 9 "Financial Instruments".

Transaction costs are apportioned between the liability and equity components of the convertible bond based on the allocation of proceeds to the liability and equity components when the instruments are initially recognized.

On conversion of a convertible bond before maturity, the carrying amount of the liability component being the amortized cost at the date of conversion is transferred to equity.

## Financial liabilities

Financial liabilities within the scope of IFRS 9 "Financial Instruments" are classified as financial liabilities at fair value through profit or loss or financial liabilities measured at amortized cost upon initial recognition.

## Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated as at fair value through profit or loss. Gains or losses on the subsequent measurement of liabilities held for trading including interest paid are recognized in profit or loss.

A financial liability is classified as held for trading if:

- a. it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term;
- b. on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking; or
- c. it is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

If a contract contains one or more embedded derivatives, the entire hybrid (combined) contract may be designated as a financial liability at fair value through profit or loss; or a financial liability may be designated as at fair value through profit or loss when doing so results in more relevant information, because either:

- a. it eliminates or significantly reduces a measurement or recognition inconsistency; or
- b. a group of financial liabilities or financial assets and financial liabilities is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information about the group is provided internally on that basis to the key management personnel.

Gains or losses on the subsequent measurement of liabilities at fair value through profit or loss including interest paid are recognized in profit or loss.

## Financial liabilities at amortized cost

Financial liabilities measured at amortized cost include interest bearing loans and borrowings that are subsequently measured using the effective interest rate method after initial recognition. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the effective interest rate method amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or transaction costs.

## Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified (whether or not attributable to the financial difficulty of the debtor), such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

## E. Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

## Derivative financial instruments

The Company uses derivative instruments to hedge its foreign currency risks and interest rate risks. A derivative is classified in the balance sheet as assets or liabilities at fair value through profit or loss except for derivatives that are designated effective hedging instruments which are classified as derivative financial assets or liabilities for hedging.

Derivative instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of hedges, which is recognized in either profit or loss or equity according to type of hedges used.

When the host contracts are either non-financial assets or labilities, derivatives embedded in host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not designed at fair value though profit or loss.

## Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- a. in the principal market for the asset or liability, or
- b. in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming market participants in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

## <u>Inventories</u>

Inventories are valued at lower of cost and net realizable value item by item.

Costs incurred in bringing each inventory to its present location and condition are accounted for as follows:

Raw materials - Purchase cost on weighted average method

Finished goods and work in progress – Cost of direct materials and labor and a proportion of manufacturing overheads based on normal operating capacity but excluding borrowing costs.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

Rendering of services is accounted in accordance with IFRS 15 and not within the scope of inventories.

## Investments accounted for using the equity method

According to Article 21 of the Regulations, the investments in subsidiaries will be disclosed under "investments accounted for using the equity method" and changes in value will be adjusted accordingly. The profit or loss and other comprehensive income presented in the parent company only financial statements will be the same as the allocations of profit or loss and other

comprehensive income attributable to owners of the parent presented in the financial statements prepared on a consolidated basis, and the owners' equity presented in the parent company only financial statements will be the same as the equity attributable to owners of the parent presented in the financial statements prepared on a consolidated basis. The difference of the accounting treatment between the parent company only basis and the consolidated basis are adjusted under "investments accounted for using the equity method", "share of profit of subsidiaries and associates accounted for using the equity method" and "share of other comprehensive income of subsidiaries and associates accounted for using the property equity method".

The Company's investment in its associates is accounted for using the equity method. An associate is an entity over which the Company has significant influence.

Under the equity method, the investment in the associate is carried in the balance sheet at cost and adjusted thereafter for the post-acquisition change in the Company's share of net assets of the associate. After the interest in the associate is reduced to zero, additional losses are provided for, and a liability is recognized, only to the extent that the Company has incurred legal or constructive obligations or made payments on behalf of the associate. Unrealized gains and losses resulting from transactions between the Company and the associate are eliminated to the extent of the Company's related interest in the associate.

When changes in the net assets of an associate occur and not those that are recognized in profit or loss or other comprehensive income and do not affect the Company's percentage of ownership interests in the associate, the Company recognizes such changes in equity based on its percentage of ownership interests. The resulting capital surplus recognized will be reclassified to profit or loss at the time of disposing the associate on a pro rata basis.

When the associate issues new shares, and the Company's interest in an associate is reduced or increased as the Company fails to acquire shares newly issued in the associate proportionately to its original ownership interest, the increase or decrease in the interest in the associate is recognized in capital surplus and investments accounted for using the equity method. When the interest in the associate is reduced, the cumulative amounts previously recognized in other comprehensive income are reclassified to profit or loss or other appropriate items. The aforementioned capital surplus recognized is reclassified to profit or loss on a pro rata basis when the Company disposes the associate.

The financial statements of the associate are prepared for the same reporting period as the Company. Where necessary, adjustments are made to bring the accounting policies in line with those of the Company.

The Company determines at each reporting date whether there is any objective evidence that the investment in the associate or an investment in a joint venture is impaired in accordance with IAS 28 "Investments in Associates and Joint Ventures". If this is the case, the Company calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognizes the amount in the 'share of profit or loss of an associate' in the statement of comprehensive income in accordance with IAS 36 "Impairment of Assets". In determining the value in use of the investment, the Company estimates:

- A. its share of the present value of the estimated future cash flows expected to be generated by the associate, including the cash flows from the operations of the associate and the proceeds on the ultimate disposal of the investment; or
- B. the present value of the estimated future cash flows expected to arise from dividends to be received from the investment and from its ultimate disposal.

Because goodwill that forms part of the carrying amount of an investment in an associate or an investment in a joint venture is not separately recognized, it is not tested for impairment separately by applying the requirements for goodwill impairment testing in IAS 36 "Impairment of Assets".

Upon loss of significant influence over the associate or joint venture, the Company measures and recognizes any retaining investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence and the fair value of the retaining investment and proceeds from disposal is recognized in profit or loss. Furthermore, if an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate, the entity continues to apply the equity method and does not remeasure the retained interest.

## Property, plant and equipment

Property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment loss, if any. Such cost includes the cost of dismantling and removing the item and restoring the site on which it is located and borrowing costs for construction in progress if the recognition criteria are met. Each part of an item of property, plant and equipment with a cost that

is significant in relation to the total cost of the item is depreciated separately. When significant parts of property, plant and equipment are required to be replaced in intervals, the Company recognizes such parts as individual assets with specific useful lives and depreciation. The carrying amount of those parts that are replaced is derecognized in accordance with the derecognition provisions of IAS 16 "Property, Plant and Equipment". When a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in profit or loss as incurred.

Depreciation is calculated on a straight-line basis over the estimated economic lives of the following assets:

| Buildings and facilities | 31 years          |
|--------------------------|-------------------|
| Plant equipment          | $5 \sim 16$ years |
| Machinery and equipment  | $2 \sim 8$ years  |
| Transportation equipment | $3 \sim 6$ years  |
| Office equipment         | $3 \sim 5$ years  |
| Right-of-use assets      | $4 \sim 28$ years |
| Miscellaneous equipment  | $3 \sim 11$ years |
| Leasehold improvements   | 10 years          |

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognizion of the asset is recognized in profit or loss.

The assets' residual values, useful lives and methods of depreciation are reviewed at each financial year end and adjusted prospectively, if appropriate.

## <u>Leases</u>

The Company assesses whether the contract is, or contains, a lease, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset for a period of time, the Company assesses whether the contract, throughout the period of use, has both of the following:

- (a) the right to obtain substantially all of the economic benefits from use of the identified asset; and
- (b) the right to direct the use of the identified asset.

For a contract that is, or contains, a lease, the Company accounts for each lease component within the contract as a lease separately from non-lease components of the contract. For a contract that contains a lease component and one or more additional lease or non-lease components, the Company allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the nonlease components. The relative stand-alone price of lease and non-lease components shall be determined on the basis of the price the lessor, or a similar supplier, would charge the Company for that component, or a similar component, separately. If an observable stand-alone price is not readily available, the Company estimates the stand-alone price, maximizing the use of observable information.

#### A. The Company as a lessee

Except for leases that meet and elect short-term leases or leases of low-value assets, the Company recognizes right-of-use asset and lease liability for all leases which the Company is the lessee of those lease contracts.

At the commencement date, the Company measures the lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses its incremental borrowing rate. At the commencement date, the lease payments included in the measurement of the lease liability comprise the following payments for the right to use the underlying asset during the lease term that are not paid at the commencement date:

- (a) fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- (b) variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- (c) amounts expected to be payable by the lessee under residual value guarantees;
- (d) the exercise price of a purchase option if the Company is reasonably certain to exercise that option; and

## English Translation of Financial Statements Originally Issued in Chinese KING YUAN ELECTRONICS CO., LTD. NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

(e) payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

After the commencement date, the Company measures the lease liability on an amortized cost basis, which increases the carrying amount to reflect interest on the lease liability by using an effective interest method; and reduces the carrying amount to reflect the lease payments made.

At the commencement date, the Company measures the right-of-use asset at cost. The cost of the right-of-use asset comprises:

- (a) the amount of the initial measurement of the lease liability;
- (b) any lease payments made at or before the commencement date, less any lease incentives received;
- (c) any initial direct costs incurred by the lessee; and
- (d) an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

For subsequent measurement of the right-of-use asset, the Company measures the right-of-use asset at cost less any accumulated depreciation and any accumulated impairment losses. That is, the Company measures the right-of-use asset applying a cost model.

If the lease transfers ownership of the underlying asset to the Company by the end of the lease term or if the cost of the right-of-use asset reflects that the Company will exercise a purchase option, the Company depreciates the right-of-use asset from the commencement date to the end of the useful life of the underlying asset. Otherwise, the Company depreciates the right-of-use asset from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The Company applies IAS 36 "Impairment of Assets" to determine whether the right-of-use asset is impaired and to account for any impairment loss identified.

Except for those leases that the Company accounted for as short-term leases or leases of lowvalue assets, the Company presents right-of-use assets and lease liabilities in the balance sheet and separately presents lease-related interest expense and depreciation charge in the statement of consolidated comprehensive income statement.

For short-term leases or leases of low-value assets, the Company elects to recognize the lease payments associated with those leases as an expense on either a straight-line basis over the lease term or another systematic basis.

## B. The Company as a lessor

At inception of a contract, the Company classifies each of its leases as either an operating lease or a finance lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset. At the commencement date, the Company recognizes assets held under a finance lease in its balance sheet and presents them as a receivable at an amount equal to the net investment in the lease.

For a contract that contains lease components and non-lease components, the Company allocates the consideration in the contract applying IFRS 15.

The Company recognizes lease payments from operating leases as rental income on either a straight-line basis or another systematic basis. Variable lease payments for operating leases that do not depend on an index or a rate are recognized as rental income when incurred.

#### Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is its fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in profit or loss for the year in which the expenditure is incurred.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life is

reviewed at least at the end of each financial year. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimates.

Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in profit or loss when the asset is derecognized.

## A. Research and development costs

Research costs are expensed as incurred. Development expenditures, on an individual project, are recognized as an intangible asset when the Company can demonstrate:

- a. the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- b. its intention to complete and its ability to use or sell the asset;
- c. how the asset will generate future economic benefits;
- d. the availability of resources to complete the asset; and
- e. the ability to measure reliably the expenditure during development.

Following initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortization and accumulated impairment losses. During the period of development, the asset is tested for impairment annually. Amortization of the asset begins when development is complete and the asset is available for use. It is amortized over the period of expected future benefit.

## B. Computer software

The cost of computer software is amortized on a straight-line basis over the estimated useful life (3~5 years).

#### Impairment of non-financial assets

The Company assesses at the end of each reporting period whether there is any indication that an asset in the scope of IAS 36 "Impairment of Assets" may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's ("CGU") fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or cash-generating unit's recoverable amount. A previously recognized impairment loss is reversed only if there has been an increase in the estimated service potential of an asset which in turn increases the recoverable amount. However, the reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years.

A cash generating unit, or groups of cash-generating units, to which goodwill has been allocated is tested for impairment annually at the same time, irrespective of whether there is any indication of impairment. If an impairment loss is to be recognized, it is first allocated to reduce the carrying amount of any goodwill allocated to the cash generating unit (group of units), then to the other assets of the unit (group of units) pro rata on the basis of the carrying amount of each asset in the unit (group of units). Impairment losses relating to goodwill cannot be reversed in future periods for any reason.

An impairment loss of continuing operations or a reversal of such impairment loss is recognized in profit or loss.

## Treasury shares

Acquisitions of the shares of the Company (treasury shares) are recognized at cost and deducted from equity. Any difference between the carrying amount and the consideration, if reissues, is recognized in capital surplus under equity.

When the retirement of treasury shares, capital surplus – share premiums and share capital are debited proportionately, gains on retirement of treasury shares should be recognized under existing capital surplus arising from similar types of treasury shares; losses on retirement of treasury shares should be offset against existing capital surplus form similar types of treasury shares. If there are insufficient capital reserves to be offset against, then such losses should be accounted for under retained earnings.

#### Revenue recognition

The Company's revenue arising from contracts with customers are mainly rendering of processing services and rental of testing machinery. The accounting policies are explained as follows:

#### A. Rendering of services

The Company's primary activity is to conduct testing and assembly services based on customer's specification demand. According to the customer contract, the ownership of the work in process belongs to the customer. The customer controls the work in process when the Company provides services to create or enhance it. Accordingly, the Company's performance obligation is satisfied over time and the Company, based on the consideration stated in the customer contract (less estimated volume discount), recognizes service revenue over time. The Company estimates the volume discounts using the expected value method based on historical experiences. However, revenue is only recognized to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur and when the uncertainty associated with the variable consideration is subsequently resolved. During the period specified in the contract, refund liability is recognized for the expected volume discounts.

The credit period of the Company's service revenue is from 30 to 120 days. For most of the contracts, when the Company transfers those processed assets to customers and has a right to an amount of consideration that is unconditional, these contracts are recognized as trade receivables. The Company usually collects the payments shortly after transferring those processed assets to customers; therefore, there is no significant financing component to the contract. For some of the contracts, the Company transfers those processed assets to customers but does not have a right to an amount of consideration that is unconditional, these contacts should be presented as contract assets. Besides, in accordance with IFRS 9, the Company

measures the loss allowance for a contract asset at an amount equal to the lifetime expected credit losses.

#### B. Revenue from rental of machinery

The Company provides rental services for testing machineries based on customers' demand. According to the contract, the Company provides tailored machineries to customers for testing purposes for a certain period of time. During the contract period, those machineries are for the contracted customers' use only, and will not be mixed with other testing machineries. Meanwhile, during the contract period, those machineries are still under control of the Company, the customer does not have the right to control over or to direct the right of use of the rented machineries. Usually, the unit price is fixed and is stated in the contract. Accordingly, the Company's performance obligation is satisfied over time and the Company recognizes revenue from rental of the machinery by rental hours or testing volume multiplied by the fixed unit price, or over the rental period on a straight line basis.

The credit period of the Company's service revenue is from 30 to 120 days. For most of the contracts, the Company recognizes trade receivables upon the completion of rental period. These trade receivables usually have short period and no significant financial component is arisen.

For some machinery rental contracts, prepayments are received from customers upon signing the contract, the Company then has the obligation to provide the services subsequently. Accordingly, these amounts are recognized as contract liabilities.

## C. Sales of machinery

The Company manufactures and sells professional testing machinery. Those machineries must be tested for specifications according to the contract signed by both parties before being delivered to customers. The Company performs the specification test in accordance with the contract and issues a machinery inspection report to the customer. After the customer's confirmation that the operating data and function of the machineries have met the specification stated in the inspection report, the machinery can be delivered to the customer's designated location stated in the contract and the control of the machinery can be transferred. At this time, the customer has the right to determine the sales channels and price of those testing machineries, and has the ability to prevent other companies from directing the use and obtaining the benefits

of these products. Thus, the Company recognizes the revenue generated from the sales of machineries at this time.

Considering the fact that assisting customers for the machinery installation and providing safety guidance are not significant, so the Company issues an invoice with total consideration to the customer and recognizes the amount as trade receivables upon the delivery of the machinery. In addition, the period between the sales of machinery and the actual receipt of the payment is within one year, therefore, there is no significant financial component. The Company provides its customer with a warranty for refund for defectives products. Such warranty is accounted for in accordance with IAS 17 as liability provision.

#### Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective assets. All other borrowing costs are expensed in the period when they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

## Post-employment benefits

All regular employees of the Company are entitled to a pension plan that is managed by an independently administered pension fund committee. Fund assets are deposited under the committee's name in the specific bank account and hence not associated with the Company. Therefore, fund assets are not included in the Company's parent company only financial statements.

For the defined contribution plan, the Company will make a monthly contribution of no less than 6% of the monthly wages of the employees subject to the plan. The Company recognizes expenses for the defined contribution plan in the period in which the contribution becomes due.

Post-employment benefit plan that is classified as a defined benefit plan uses the Projected Unit Credit Method to measure its obligations and costs based on actuarial assumptions. Remeasurements, comprising of the effect of the actuarial gains and losses, the effect of the asset ceiling (excluding net interest) and the return on plan assets, excluding net interest, are recognized

as other comprehensive income with a corresponding debit or credit to retained earnings in the period in which they occur. Past service costs are recognized in profit or loss on the earlier of:

- A. the date of the plan amendment or curtailment, and
- B. the date that the Company recognizes restructuring-related costs.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset, both as determined at the start of the annual reporting period, taking account of any changes in the net defined benefit liability (asset) during the period as a result of contribution and benefit payment.

## Share-based payment transactions

The cost of equity-settled transactions between the Company and its employees is recognized based on the fair value of the equity instruments granted. The fair value of the equity instruments is determined by using an appropriate pricing model.

The cost of equity-settled transactions is recognized, together with a corresponding increase in other capital reserves in equity, over the period in which the performance and/or service conditions are fulfilled. The cumulative expense recognized for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Company's best estimate of the number of equity instruments that will ultimately vest. The income statement expense or credit for a period represents the movement in cumulative expense recognized as at the beginning and end of that period.

No expense is recognized for awards that do not ultimately vest, except for equity-settled transactions where vesting is conditional upon a market or non-vesting condition, which are treated as vesting irrespective of whether or not the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

Where the terms of an equity-settled transaction award are modified, the minimum expense recognized is the expense as if the terms had not been modified, if the original terms of the award are met. An additional expense is recognized for any modification that increases the total fair value of the share-based payment transaction, or is otherwise beneficial to the employee as measured at the date of modification.

Where an equity-settled award is cancelled, it is treated as if it vested on the date of cancellation, and any expense not yet recognized for the award is recognized immediately. This includes any award where non-vesting conditions within the control of either the entity or the employee are not met. However, if a new award is substituted for the cancelled award, and designated as a replacement award on the date that it is granted, the cancelled and new awards are treated as if they were a modification of the original award, as described in the previous paragraph.

The dilutive effect of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share.

The cost of restricted stocks issued is recognized as salary expense based on the fair value of the equity instruments on the grant date, together with a corresponding increase in other capital reserves in equity, over the vesting period. The Company recognizes unearned employee salary which is a transitional contra equity account; the balance in the account will be recognized as salary expense over the passage of vesting period.

## Income taxes

Income tax expense (income) is the aggregate amount included in the determination of profit or loss for the period in respect of current tax and deferred tax.

## A. Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. Current income tax relating to items recognized in other comprehensive income or directly in equity is recognized in other comprehensive income or equity and not in profit or loss.

The income tax for unappropriated earnings is recognized as income tax expense in the subsequent year when distribution proposal is approved by the shareholders' meeting.

## B. Deferred tax

Deferred tax is provided on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- a. where the deferred tax liability arises from the initial recognition of goodwill of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- b. in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, the carry forward of unused tax credits and unused tax losses can be utilized, except:

- a. where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- b. in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date. The measurement of deferred tax assets and deferred tax liabilities reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity. Deferred tax assets are reassessed at each reporting date and are recognized accordingly.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current income tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

#### 5. Significant Accounting Judgments, Estimates and Assumptions

The preparation of the Company's parent company only financial statements require management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

#### Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

A. Fair value of Level 3 financial instruments

Where the fair value of financial assets and financial liabilities recorded in the balance sheet cannot be derived from active markets, they are determined using valuation techniques including the income approach (for example the discounted cash flows model) or market approach. Changes in assumptions about these factors could affect the reported fair value of the financial instruments. Please refer to Note 12 for more details.

B. Revenue recognition - sales returns and discounts

The Company estimates sales returns and allowance based on historical experience and other known factors at the time of sale, which reduces the operating revenue. In assessing the aforementioned sales returns and allowance, on the basis of highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur. Please refer to Note 6. (10) for more details.

Financial assets at fair value through other comprehensive income were not pledged.

#### (3) Notes receivable

|  | December 31, | December 31, |
|--|--------------|--------------|
|  | 2022         | 2021         |
| Notes receivable from operating activities | \$7,218      | \$7,706      |
| Less: loss allowance                       |              |              |
| Total                                      | \$7,218      | \$7,706      |

Notes receivable were not pledged.

The Company adopted IFRS 9 for impairment assessment. Please refer to Note 6.(15) for more details on accumulated impairment. Please refer to Note 12 for more details on credit risk.

#### (4) <u>Trade receivables and trade receivables from related parties</u>

|  | December 31, 2022 | December 31,<br>2021 |
|--|-------------------|----------------------|
| Trade receivables  | \$3,504,945       | \$3,929,879          |
| Less: loss allowance   | (13,107)          | (25,158)             |
| Subtotal   | 3,491,838         | 3,904,721            |
| Trade receivables from related parties<br>Less: loss allowance | 1,782,489         | 2,081,340            |
| Subtotal   | 1,782,489         | 2,081,340            |
| Total  | \$5,274,327       | \$5,986,061          |
|  |                   |                      |

No trade receivables were pledged.

The receivables are generally on 30 to 120 days terms. Please refer to Note 6.(15) for more details on loss allowance of trade receivables for the years ended December 31, 2022 and 2021. Please refer to Note 12 for more details on credit risk.

#### (5) Inventories

|                  | December 31, | December 31, |
|------------------|--------------|--------------|
|                  | 2022         | 2021         |
| Raw materials    | \$825,077    | \$751,224    |
| Work in progress | 294,806      | 278,556      |
| Finished goods   |              |              |
| Total            | \$1,119,883  | \$1,029,780  |

The cost of inventories recognized in operating costs for the year ended December 31, 2022 amounted to NT\$18,093,056 thousand, including the reversal gain of inventories of NT\$31,879 thousand, and scrap loss of NT\$65,834 thousand, respectively. The reversal is due to the fact that previous write-down of inventories had been scrapped.

The cost of inventories recognized in operating costs for the year ended December 31, 2021 amounted to NT\$18,476,736 thousand, including the reversal gain of inventories of NT\$17,680 thousand, and scrap loss of NT\$42,674 thousand, respectively. The reversal is due to the fact that previous write-down of inventories had been scrapped.

No inventories were pledged.

## (6) Prepayments

|                   | December 31, | December 31, |
|-------------------|--------------|--------------|
|                   | 2022         | 2021         |
| Prepaid equipment | \$20,649     | \$-          |
| Prepaid expenses  | 13,838       | 10,533       |
| Input tax         | 29,859       | 27,472       |
| Others            | 18,043       | 15,279       |
| Total             | \$82,389     | \$53,284     |

Note: Certain property, plant and equipment were pledged. Please refer to Note 8 for more details.

- a. Please refer to Note 9 for the financial covenants during the loan period.
- b. The Company's unused short-term lines of credits amounted to NT\$4,691,138 thousand and NT\$5,113,404 thousand as of December 31, 2022 and 2021, respectively.

## (12) <u>Post-employment benefits</u>

#### Defined contribution plan

The Company adopts a defined contribution plan in accordance with the Labor Pension Act of the R.O.C. The Company has made monthly contribution of 6% of each individual employee's salaries or wages to employee's pension accounts.

Pension benefits for employees of overseas subsidiaries and branches are provided in accordance with the local regulations.

Pension expenses under the defined contribution plan for the years ended December 31, 2022 and 2021 were NT\$201,466 thousand and NT\$197,769 thousand, respectively.

# Defined benefit plan

The Company adopts a defined benefit plan in accordance with the Labor Standards Act of the R.O.C. The pension benefits are disbursed based on the units of service years and the average salaries in the last month of the service year. Two units per year are awarded for the first 15 years of services while one unit per year is awarded after the completion of the 15th year. The total units shall not exceed 45 units. Under the Labor Standards Act, the Company contributes an amount equivalent to 2% of the employees' total salaries and wages on a monthly basis to the pension fund deposited at the Bank of Taiwan in the name of the administered pension fund committee. Before the end of each year, the Company assesses the balance in the designated labor pension fund. If the amount is inadequate to pay pensions calculated for workers retiring in the same year, the Company will make up the difference in one appropriation before the end of March the following year.

The Ministry of Labor is in charge of establishing and implementing the fund utilization plan in accordance with the Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund. The pension fund is invested in-house or under mandation, based on a passive-aggressive investment strategy for long-term profitability. The Ministry of Labor establishes checks and risk management mechanism based on the assessment of risk factors including market risk, credit risk and liquidity risk, in order to maintain adequate manager flexibility to achieve targeted return without over-exposure of risk. With regard to utilization of the pension fund, the minimum earnings in the annual distributions on the final financial statements shall not be less than the earnings attainable from the amounts accrued from twoyear time deposits with the interest rates offered by local banks. Treasury Funds can be used to cover the deficits after the approval of the competent authority. As the Company does not participate in the operation and management of the pension fund, no disclosure on the fair value of the plan assets categorized in different classes could be made in accordance with paragraph 142 of IAS 19. The Company expects to contribute NT\$17,555 thousand to its defined benefit plan during the 12 months beginning after December 31, 2022.

The maturities of the defined benefits plan as at December 31, 2022 and 2021 are in 2058 and 2052.

#### NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

# English Translation of Financial Statements Originally Issued in Chinese KING YUAN ELECTRONICS CO., LTD. NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

A sensitivity analysis for significant assumption as at December 31, 2022 and 2021 is shown as below:

|                                | Effect on the defined benefit obligation |            |             |             |
|--------------------------------|--|------------|-------------|-------------|
|                                | 20                                       | 2022       |             | 21          |
|                                | Increase in Decrease in                  |            | Increase in | Decrease in |
|                                | defined                                  | defined    | defined     | defined     |
|                                | benefit                                  | benefit    | benefit     | benefit     |
|                                | obligation                               | obligation | obligation  | obligation  |
| Discount rate increase by 0.5% | \$-                                      | \$(75,998) | \$-         | \$(70,995)  |
| Discount rate decrease by 0.5% | 84,013                                   | -          | 78,279      | -           |
| Future salary increase by 0.5% | 82,231                                   | -          | 76,821      | -           |
| Future salary decrease by 0.5% | -  | (75,228)   | -           | (70,449)    |

The sensitivity analyses above are based on a change in a significant assumption (for example: change in discount rate or future salary), keeping all other assumptions constant. The sensitivity analyses may not be representative of an actual change in the defined benefit obligation as it is unlikely that changes in assumptions would occur in isolation of one another.

There was no change in the methods and assumptions used in preparing the sensitivity analyses compared to the previous period.

# (13) <u>Equity</u>

## A. Share capital

As of December 31, 2022 and 2021, the Company's authorized share capital was both NT\$15,000,000 thousand; issued share capital was both NT\$12,227,451 thousand (1,222,745 thousand shares), with par value of NT\$10 per share. Each share has one voting right and a right to receive dividends.

## B. Capital surplus

#### NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

|  | December 31, | December 31, |
|--|--------------|--------------|
|  | 2022         | 2021         |
| Additional paid-in capital                       | \$333,919    | \$333,919    |
| Arising from conversion of bonds                 | 3,588,848    | 3,588,848    |
| Treasury share transactions                      | 390,101      | 390,101      |
| Arising from the exercise of employee restricted |              |              |
| shares   | 30,755       | 30,755       |
| Changes in ownership interests in subsidiaries   | 610,236      | 541,511      |
| Total  | \$4,953,859  | \$4,885,134  |

According to the Company Act, the capital surplus shall not be used except for offset the deficit of the company. When a company incurs no loss, it may distribute the capital surplus generated from the excess of the issuance price over the par value of share capital and donations. The distribution could be made in cash to its shareholders in proportion to the number of shares being held by each of them.

## C. Retained earnings and dividend policy

According to the Company's Articles of Incorporation, net profits for each fiscal year, if any, shall be distributed in following order:

- a. reserve for tax payments;
- b. offset prior year's losses;
- c. set aside 10% of the remaining amount after deducting items (a) and (b) as legal reserve;
- d. set aside or reverse special reserve in accordance with law and regulations; and
- e. the distribution of the remaining portion, if any, will be recommended by the Board of Directors and resolved in the shareholders' meeting.

The policy of dividend distribution should reflect factors such as the current and future investment environment, fund requirements, domestic and international competition and capital budgets; as well as the interest of the shareholders, share bonus equilibrium and long-term financial planning, etc. The Board of Directors shall make the distribution proposal annually and present it at the shareholders' meeting. As the Company currently is still in the growth stage, funding may be required in the near future for expansion. Therefore, the current policy is to distribute cash dividends at no less than 20% of total dividends to be distributed.

According to the Company Act, the Company needs to set aside amount to legal reserve unless where such legal reserve amounts to the total authorized capital. The legal reserve can be used to offset the deficit of the Company. When the Company incurs no loss, it may distribute the portion of legal reserve which exceeds 25% of the paid-in capital by issuing new shares or by cash in proportion to the number of shares being held by each of the shareholders.

Pursuant to existing regulations, the Company is required to set aside additional special reserve equivalent to the net debit balance of the other components of shareholders' equity. For any subsequent reversal of other net deductions from shareholders' equity, the amount reversed may be distributed.

Following the adoption of TIFRS, the FSC on April 6, 2012 issued Order No. Financial-Supervisory-Securities-Corporate-1010012865, which sets out the following provisions for compliance:

On a public company's first-time adoption of the TIFRS, for any unrealized revaluation gains and cumulative translation adjustments (gains) recorded in shareholders' equity that the Company elects to transfer to retained earnings by application of the exemption under IFRS 1, the Company shall set aside an equal amount of special reserve. Following a company's adoption of the TIFRS for the preparation of its financial reports, when distributing distributable earnings, it shall set aside to special reserve, from the profit/loss of the current period and the undistributed earnings from the previous period, an amount equal to "other net deductions from shareholders' equity" for the current fiscal year, provided that if the company has already set aside supplemental special reserve based on the difference between the amount already set aside and other net deductions from shareholders' equity. For any subsequent reversal of other net deductions from shareholders' equity, the amount reversed may be distributed.

As of December 31, 2022 and 2021, special reserve set aside for the first-time adoption of TIFRS amounted to NT\$201,416 thousand.

The appropriations for earnings for 2021 were resolved by the shareholders in its meeting on June 29, 2022, while the proposed appropriation of earnings for 2022 were approved by Board of Directors on March 2, 2023. The appropriations and dividends per share were as follows:

## NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS

| Notes receivable  | -                                | -   |  |
| Trade receivables |                                  |     |  |
| Total             | \$-                              | \$- |  |

Please refer to Note 12 for more details on credit risk.

The Company measures the loss allowance of its contract assets and receivables (including notes receivable and trade receivables) at an amount equal to lifetime expected credit losses. The assessment of the Company's loss allowance as at December 31, 2022 and 2021 are as follows:

- A. The gross carrying amount of contract assets is NT\$143,710 thousand and NT\$178,596 thousand, respectively. Expected credit loss ratio is estimated to be 0%.
- B. The Company considers the grouping of trade receivables by counterparties' credit ratings, geographical regions and industry sectors. Loss allowance is measured by using a provision matrix. Details are as follows:

|                   | Not yet due | Overdue   |             |              |           |             |

Note: Although the Company wrote off the financial assets during 2022, collection activities are still underway.

#### (16) Leases

#### A. The Company as a lessee

The Company leases land and buildings with lease terms ranging from 4 to 28 years. At the end of the lease terms, the Company does not have the purchase option to acquire the leasehold land and buildings.

The Company leases machinery and equipment for operational use with lease terms of 2 years. The Company has purchase options to acquire leasehold machinery and equipment at the end of the lease terms.

The Company leases transportation equipment for operational use with lease terms of 3 years. The Company has purchase options to acquire leasehold transportation equipment at the end of the lease terms.

### NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

The effect that leases have on the financial position, financial performance and cash flows of the Company are as follows:

## a. Amounts recognized in the balance sheet

(a) Right-of-use assets

The carrying amount of right-of-use assets

|                          | December 31, | December 31, |
|--------------------------|--------------|--------------|
|                          | 2022         | 2021         |
| Land                     | \$440,501    | \$457,989    |
| Buildings and facilities | 5,985        | 9,513        |
| Machinery and equipment  | -            | 72,922       |
| Transportation equipment | 10,662       | 13,122       |
| Total                    | \$457,148    | \$553,546    |

During the year ended December 31, 2021, the Company's additions to right-of-use assets amounted to NT\$24,275 thousand. No such transaction occurred in 2022.

During the year ended December 31, 2022 and 2021, the Company exercised the purchase option and transfer the right-of-use assets to machinery and equipment in the amount of NT\$67,313 thousand and NT\$538,273 thousand, respectively.

#### (b) Lease liabilities

|                                | December 31, | December 31, |
|--------------------------------|--------------|--------------|
|                                | 2022         | 2021         |
| Lease liabilities- current     | \$22,581     | \$86,364     |
| Lease liabilities- non-current | 447,885      | 469,377      |
| Total                          | \$470,466    | \$555,741    |

Please refer to Note 6(18) C for the interest on lease liabilities recognized during the years ended December 31, 2022 and 2021, and refer to Note 12(3) section E Liquidity Risk Management for the maturity analysis for lease liabilities as at December 31, 2022 and 2021.

### NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS

| assets (not including the expenses relating  |                                  |          |  |
| to short-term leases of low-value assets)    | 556                              | 505      |  |
| Total  | \$37,223                         | \$47,579 |  |

#### d. Cash outflows relating to leasing activities

During the years ended December 31, 2022 and 2021, the Company's total cash outflows for leases amounted to NT\$132,220 thousand and NT\$363,642 thousand, respectively.

e. Other information relating to leasing activities

#### Extension and termination options

Some of the Company's property rental agreements contain extension and termination options. In determining the lease terms, the non-cancellable period for which the Company has the right to use an underlying asset, together with periods covered by an

# English Translation of Financial Statements Originally Issued in Chinese KING YUAN ELECTRONICS CO., LTD. NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

option to extend the lease if the Company is reasonably certain to exercise that option and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option. These options are used to maximize operational flexibility in terms of managing contracts. The majority of extension and termination options held are exercisable only by the Company.

After the commencement date, the Company reassesses the lease term upon the occurrence of a significant event or a significant change in circumstances that is within the control of the lessee and affects whether the Company is reasonably certain to exercise an option not previously included in its determination of the lease term, or not to exercise an option previously included in its determination of the lease term.

## B. The Company as a lessor

The Company entered into commercial property leases with remaining terms between one to two years. All leases include a clause to enable upward revision of the rental charge on an annual basis according to prevailing market conditions.

|   | For the years ended December 31, |          |
|---|----------------------------------|----------|
|   | 2022 2021                        |          |
| Lease income for operating leases           |                                  |          |
| Income relating to fixed lease payments and |                                  |          |
| variable lease payments that depend on an   |                                  |          |
| index or a rate                             | \$55,492                         | \$36,132 |

Please refer to Note 6(8) for relevant disclosure of property, plant and equipment for operating leases under IFRS 16. For operating leases entered by the Company, the undiscounted lease payments to be received and a total of the amounts for the remaining years as at December 31, 2022 and 2021 are as follow:

|   | December 31, | December 31, |
|---|--------------|--------------|
|   | 2022         | 2021         |
| Not later than one year                           | \$29,212     | \$16,600     |
| Later than one year and not later than five years | 8,828        | 347          |

| Amortization      | \$15,159                         | \$25,740    | \$40,899    | \$19,775    | \$27,475    | \$47,250    |  |

The average total number of employees was 7,314 and 7,453 as of December 31, 2022 and 2021, respectively. The total number of Board of Directors who has not served as employees was 7 and 7, respectively.

- A. The average amount of employee benefits expense was NT\$942 thousand and NT\$894 thousand as of December 31, 2022 and 2021, respectively.
- B. The average amount of salaries was NT\$809 thousand and NT\$764 thousand as of December 31, 2022 and 2021, respectively.
- C. The change rate of average amount of salaries was 5.9% and 10.7% for the years ended December 31, 2022 and 2021, respectively.
- D. The remuneration to supervisors were estimated at 0 thousand and 0 thousand for the years ended December 31, 2022 and 2021, respectively.

In accordance with the Articles of Incorporation, no higher than 1% of the profit of the current year is distributable as remuneration to directors (including independent directors). However,

the Company's accumulated losses shall have been covered (if any). The Company may, by a resolution adopted by a majority vote at a meeting of Board of Directors attended by twothirds of the total number of directors, have the profit distributable as employees' compensation in the form of shares or in cash; and in addition thereto a report of such distribution is submitted to the shareholders' meeting. In addition, according to the Company's Articles of incorporation, the remuneration paid to directors (including independent directors) is determined based on the Company's overall operating performance with consideration of the contribution of each director to the Company and reference to industry norm. The remuneration proposal shall be approved by more than half members of the Compensation Committee and submitted to the Board of Directors for further approval.

According to the Company's Articles of Incorporation and the Company Law, the remuneration of the Company's executives is determined based on the positions of the executives, contribution to the Company's operations, individual performance, and consideration of the Company's future risk and reference to the industry norm. The remuneration is to be reviewed by the Compensation Committee for its plausibility and submitted to the Board of Directors for resolution.

The employee's compensation policy of the Company takes into account various factors such as individual's salary, rank, and performance evaluation, the industry norm and the Company's operating results, etc.

In accordance with the Articles of Incorporation, 8% to 10% of profit of the current year is distributable as employees' compensation and no higher than 1% of profit of the current year is distributable as remuneration to directors. However, the Company's accumulated losses shall have been covered (if any). The Company may, by a resolution adopted by a majority vote at a meeting of Board of Directors attended by two-thirds of the total number of directors, have the profit distributable as employees' compensation in the form of shares or in cash; and in addition thereto a report of such distribution is submitted to the shareholders' meeting. Information on the Board of Directors' resolution regarding the employees' compensation and remuneration to directors can be obtained from the "Market Observation Post System" on the website of the TWSE.

Based on profit of current period, the Company estimated the amounts of the employees' compensation and remuneration to directors for the year ended December 31, 2022 to be 8% of profit of current period (or NT\$746,296 thousand) and 0.8% of profit of current period (or

NT\$74,630 thousand), respectively, which were recognized as salary expense. If the Board of Directors resolved to distribute employees' compensation in the form of stocks, then the number of stocks distributed is calculated based on the closing price one day prior to the date of resolution. If the estimated amounts differ from the actual distribution resolved by the Board of Directors, the difference will be recognized in the profit or loss in the subsequent year. A resolution was passed at a Board of Directors meeting held on March 2, 2023 to distribute NT\$746,296 thousand and NT\$74,630 thousand in cash as employees' compensation and remuneration to directors, respectively, which were consistent with the estimated amounts recognized for the year ended December 31, 2022.

Actual distribution of employees' compensation and remuneration to directors of 2021 amounted to NT\$569,336 thousand and NT\$56,934 thousand, respectively. No material differences exist between the estimated amount and the actual distribution of the employee compensation and remuneration to directors for the year ended December 31, 2021.

## The assessment of income tax returns

As of December 31, 2022, the assessment of the income tax returns of the Company is as follows:

EntitiesThe assessment of income tax returnsThe CompanyAssessed and approved up to 2019

## (21) Earnings per share

Basic earnings per share is calculated by dividing net profit for the year attributable to ordinary equity owners of the Company by the weighted average number of ordinary shares outstanding during the year.

Diluted earnings per share is calculated by dividing the net profit attributable to ordinary equity owners of the Company by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares.

## (2) Financial risk management objectives

The objective of the Company's financial risk management is mainly to manage the market risk, credit risk and liquidity risk derived from its operating activities. The Company identified, measured and managed the aforementioned risks based on the Company's policy and risk tendency.

# English Translation of Financial Statements Originally Issued in Chinese KING YUAN ELECTRONICS CO., LTD. NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

The Company has established appropriate policies, procedures and internal controls for financial risk management. The plans for material treasury activities are reviewed by Board of Directors and Audit committee in accordance with relevant regulations and internal controls. The Company complies with its financial risk management policies at all times.

## (3) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of the changes in market prices. Market prices comprise foreign currency risk, interest rate risk and other price risk (such as equity risk).

In practice, it is rarely the case that a single risk variable will change independently from other risk variables, there are usually interdependencies between risk variables. However, the sensitivity analysis disclosed below does not take into account the interdependencies between risk variables.

## A. Foreign currency risk

The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense are denominated in a different currency from the Company's functional currency) and the Company's net investments in foreign operations.

Some receivables and payables are denominated in the same foreign currency, and it will result in economic hedging effect. Further, net investments in foreign operations are primarily for strategic purposes, and they are not hedged by the Company.

The Company's sensitivity analysis to foreign currency risk mainly focuses on foreign currency monetary items at the end of the reporting period. The Company's foreign currency risk is mainly from the volatility in the exchange rates of US\$. The sensitivity analysis is as follows:

When NT\$ appreciates or depreciates against US\$ by 1%, the profit for the years ended December 31, 2022 and 2021 would have increased / decreased by NT\$2,931 thousand and NT\$520 thousand, respectively.

### English Translation of Financial Statements Originally Issued in Chinese KING YUAN ELECTRONICS CO., LTD. NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS (Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

### B. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's loans and receivables at variable interest rates.

The Company manages its risk by having a balanced portfolio of financial instruments with fixed and floating interest rates. The Company did not apply hedging accounting since such hedging activities did not qualify for criteria of hedge accounting.

The Company's sensitivity analysis to interest rate risk mainly focuses on items exposed to interest rate risk at the end of the reporting period, including investments with floating interest rates and bank borrowings with floating rates. Assuming investments and bank borrowings had been outstanding for the entire period and all other variables were constant, a hypothetical increase/decrease of 10 basis points of interest rate in a reporting period would have resulted in a decrease/increase in profit by NT\$20,512 thousand and NT\$21,303 thousand for the years ended December 31, 2022 and 2021, respectively.

### C. Equity price risk

The Company's equity investments, including listed and unlisted equity securities, are exposed to market price risk arising from uncertainties of future values of equity securities. The Company's investments in listed and unlisted equity securities are classified under financial assets at fair value through other comprehensive income. The Company manages the equity price risk through diversification and placing limits on individual and total equity investments. Reports on the equity portfolio are submitted to the Company's senior management on a regular basis. The Company's Board of Directors reviews and approves certain significant equity investments according to level of authority.

At the reporting date ended December 31, 2022 and 2021, a change of 20% in the price of the listed equity securities classified under equity instrument investments measured at fair value through other comprehensive income would have impact of NT\$7,872 thousand and NT\$8,606 thousand on the equity attributable to the Company.

### NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

Please refer to Note 12(3) section H for sensitivity analysis information of other equity instruments or derivatives that are linked to such equity instruments whose fair value measurement is categorized under Level 3.

### D. Credit risk management

Credit risk is the risk that counterparty will not meet its obligations under a contract, leading to a financial loss. The Company is exposed to credit risk from operating activities (primarily for contract assets, trade receivables and notes receivable) and from its financing activities (including bank deposits and other financial instruments).

Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and controls relating to customer credit risk management. Credit limits are established for all customers based on their financial position, rating from credit rating agencies, historical experience, prevailing economic condition and the Company's internal rating criteria, etc. Certain customer's credit risk will also be managed by taking credit enhancing procedures, such as requesting for prepayment and insurance.

As of December 31, 2022 and 2021, receivables from top ten customers represented 53% and 52% of the total trade receivables of the Company, respectively. The credit concentration risk of other accounts receivable was insignificant.

The Company manages its exposure to credit risk arising from bank deposits, fixed income securities and other financial instruments in accordance with established group policies. Since the counter-parties are selected reputable financial institutions and companies, the Company believes its exposure to credit risk is not significant.

### E. Liquidity risk management

The Company maintained financial flexibility through the holding of cash and cash equivalents, investments in securities with high liquidity, and facilities of bank borrowings. The table below summarizes the maturity profile of the Company's financial liabilities based on the contractual undiscounted payments and contractual maturity, and the payment amount also includes the contractual interest. The undiscounted payment relating to borrowings with variable interest rates is extrapolated based on the estimated interest rate yield curve as of the end of the reporting period.

### G. Fair values of financial instruments

a. The methods and assumptions applied in determining the fair value of financial instruments:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following methods and assumptions were used by the Company to measure or disclose the fair values of financial assets and financial liabilities:

### NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

- (a) The carrying amount of cash and cash equivalents, accounts receivable, accounts payable and other payables approximate their fair value due to their short maturities.
- (b) For financial assets and liabilities traded in an active market with standard terms and conditions, their fair value is determined based on market quotation price at the reporting date.
- (c) Fair value of equity instruments without market quotations (including private placement of listed equity securities, unquoted public company and private company equity securities) are estimated using the market method valuation techniques based on parameters such as prices based on market transactions of equity instruments of identical or comparable entities and other relevant information (for example, inputs such as discount for lack of marketability, P/E ratio of similar entities and Price-Book ratio of similar entities).
- (d) Fair value of debt instruments without market quotations, bank loans and other noncurrent liabilities are determined based on the counterparty prices or valuation method. The valuation method uses DCF method as a basis, and the assumptions such as the interest rate and discount rate are primarily based on relevant information of similar instruments.
- b. Fair value of financial instruments measured at amortized cost

The carrying amounts of the Company's financial assets and financial liabilities measured at amortized cost approximate their fair value.

c. Fair value measurement hierarchy for financial instruments

Please refer to Note 12(3) section H for fair value measurement hierarchy for financial instruments of the Company.

### English Translation of Financial Statements Originally Issued in Chinese KING YUAN ELECTRONICS CO., LTD. NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS

(Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

### H. Fair value measurement hierarchy

a. Fair value measurement hierarchy

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, based on the lowest level input that is significant to the fair value measurement as a whole. Level 1, 2 and 3 inputs are described as follows:

- Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2: Input other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly or indirectly.
- Level 3: Unobservable inputs for the assets or liabilities.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization at the end of each reporting period.

b. Fair value measurement hierarchy of the Company's assets and liabilities

The Company does not have assets measured at fair value on a non-recurring basis; the following table presents the fair value measurement hierarchy of the Company's assets and liabilities on a recurring basis:

| December 31, 2022        |          |         |             |             |

### English Translation of Financial Statements Originally Issued in Chinese KING YUAN ELECTRONICS CO., LTD. NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS (Amounts are expressed in thousands of New Taiwan dollars unless otherwise stated)

# Valuation process used for fair value measurements categorized within Level 3 of the fair value hierarchy

The Company's Finance Department is responsible for validating the fair value measurements and ensuring that the results of the valuation are in line with market conditions, based on independent and reliable inputs which are consistent with other information, and represent exercisable prices. The Department analyses the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Company's accounting policies at each reporting date.

I. Significant assets and liabilities denominated in foreign currencies

Information regarding the significant assets and liabilities denominated in foreign currencies is listed below:

Functional currencies of entities of the Company are varied. Accordingly, the Company is not able to disclose the information of exchange gains and losses of monetary financial assets and liabilities by each significant assets and liabilities denominated in foreign currencies. The foreign exchange gains were NT\$119,898 thousand and NT\$70,474 thousand for the years ended December 31, 2022 and 2021, respectively.

The above information is disclosed based on the carrying amount of foreign currency (after conversion to functional currency).

### J. Capital management

The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value. The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions. To maintain or adjust the capital structure, the Company may adjust dividend payment to shareholders, return capital to shareholders or issue new shares.

### K. The impact of the COVID-19 pandemic on the Company

Near the end of May 2021, a foreign migrant worker cluster infection occurred at the Company's premises. The Company, following the guidence from Central Epidemic Command Center, decisively adopted series of measures to contain the infection. The measures included quarantine of infected workers, 48 hours production suspension and load reduction, etc. It is estimated that this cluster infection reduced approximately 30% of the Company's monthly sales in June 2021. Other than this one-time impact, COVID-19 dose not have any significant impact on the Company's going concern basis, funding ability and operations. No similar incident occurred in 2022.

Note 1: The information of transactions between the Company and the conlidated subsidiaries should be noted in "Number" column.

(1) Number 0 represents the Company.

(2) The consolidated subsidiaries are numbered in order from number 1.

Note 2: The transaction relationships with the counterparties are as follows:

(1) The Company to the consolidated subsidiary.

(2) The consolidated subsidiary to the Company.

(3) The consolidated subsidiary to another consolidated subsidiary.

Note 3: In calculating the ratio, the transaction amount is divided by consolidated total assets for balance sheet accounts and is divided by consolidated total revenues for income statement accounts.
